W	**ENDING SHELTER COUNT (date)**	**82**	**74**	**156**

In a perfect world, the Ending Count is equal to the Beginning Count (A) plus Total Intake (F) minus all Outcomes (R+V). -------> 58 71 129

If your reported Ending Count does not match these numbers, please go back through your data and be sure you didn't miss something (i.e., animals in foster, adoptions, transfers, etc.). If all animals have been accounted for and the reported Ending Count is different, please indicate in the comment section.

The organizations inside the Target Community are Gulf Coast Humane Society, Spay Lee, PAWS, ARC, Helping Paws and Golden Retriever Rescue.The statistics listed are the best estimates possible based on our numbers and veterinary examinations at LCDAS. Due to the occurrence of managerial turnover at the highest level in our facility and time spent on adjusting our animal control ordinance throughout the year, switching from our current outcome categories to the Asilomar Accords was unexpectedly delayed. This was instituted in February, 2015 but I was unable to go back through all records due to time constraints.

With regards to the Ending Count, the intake in our system also takes into account animals born in the shelter and DOA at intake. The outcomes also include deaths (in kennel, in surgery) and DOA. The Ending Count does not take into consideration that animals on hold through the beginning and end of the year and the discrepancy calculated may reflect these animals.

I agree that in completing this form, we have used the Maddie's Fund definitions of "Healthy," "Treatable - Manageable," "Treatable - Rehabilitatable," and "Unhealthy & Untreatable" as set forth in the attached document titled, "Maddie's Fund® Categorizations/Definitions of Shelter Animals."
