In accordance with Florida Statutes Ch. 190, the Verandah West Community Development District has petitioned the Board of County Commissioners to conduct a public hearing for the purpose of adopting a non-emergency ordinance to:

1. expand the Verandah West Community Development District to include a 3.34 acre parcel, contiguous to the original district property, and amend the district external boundary; and
2. remove 3.23 acres from the Verandah West Community Development District property, and amend the District boundary.

Adding 3.34 acres to the Verandah West District and removing 3.23 acres will cause an increase of less than 1% to the District area, which is well below the 10% statutory maximum set forth in F.S. § 190.046(5)(f).

The Verandah West District's requests for boundary modification is consistent with the Lee County Comprehensive Plan. All development activity within the boundaries of the District will be subject to the Lee Plan and all related land development regulations.

At the subject public hearing, inquiry will focus on whether or not a change has occurred since the creation of the District that would render authorization for modification of the boundaries inappropriate. Staff has reviewed the factors set forth in F.S. § 190.005(1)(e) and finds no new information relevant to those factors that is inconsistent with the expansion of District boundaries.

The Office of the County Attorney and Planning Staff recommend that the Board of County Commissioners grant the Verandah West Community Development District petition by adopting the proposed amendment to LCO 02-13.

**ANALYSIS OF THE VERANDAH WEST UNIFORM COMMUNITY DEVELOPMENT
DISTRICT PETITION TO AMEND BOUNDARIES**

**Prepared for
Board of County Commissioners
by
Lee County Division of Planning
January 12, 2005**

The Uniform Community Development District Act was originally adopted in 1980. The act sets forth the procedure for the establishment and amendment of such a district, the district's powers and duties for public improvements and community facilities, and additional special powers that the district may petition for. The Verandah West Community Development District was established by the Lee County Board of County Commissioners through Ordinance No. 02-13 on March 26, 2002, with an effective date of April 2, 2002.

The Verandah West Community Development District, hereafter called "District", has petitioned the Lee County Board of County Commissioners to adopt an ordinance to add approximately 3.34 acres to the District and remove approximately 3.23 acres from the District. Currently the District covers approximately 777.95 acres of land. The amendment proposes new boundaries covering approximately 778.06 acres of land. Both the lands to be added and the lands to be removed have a future land use designation of Suburban and Wetlands.

The current property within the district is located in Lee County, Florida, lying within Sections 25 and 36, Township 43 South, Range 25 East and Sections 29, 30, 31, and 32, Township 43 South, Range 26 East. The land area is bounded on the West by large tracts of undeveloped land, on the North by S.R. 80, on the East by large tracts of undeveloped property and on the South by the Orange River. The subject petition specifically involves land on the eastern edge of the district boundaries in Sections 29 and 32, Township 43 South, Range 26 East. The petition states that the land being added to the District is part of a neighborhood and the amended boundary will include the entire neighborhood. The petition also states that the land being deleted from the District is part of an adjacent neighborhood.

When established in 2002, the District was granted the power to finance, fund, plan, establish, acquire, construct or reconstruct, enlarge or extend, equip, operate, and maintain systems and facilities for the following basic infrastructure: water management; water supply, sewer, and waste water management; bridges or culverts; district roads; and other projects within or without the district boundary for which a Development Order is issued. In addition in 2003, the District was granted the ability to exercise the optional special powers for parks and facilities for indoor and outdoor recreational, cultural, and educational uses; and, for security, including, but not limited to, guard houses, fences and gates, electronic-intrusion detection systems, and patrol cars as listed under F.S. Section 190.012(2)(a) and (d).

A petition to amend the District boundaries was received by Lee County from the District on October 19, 2004. Lee County Planning staff has reviewed the petition and finds it to be sufficient. At this time, the District has petitioned the Board of County Commissioners to conduct a hearing for the purpose of adopting an ordinance amending Ordinance 02-13 that will add approximately 3.34 acres to the District and remove approximately 3.23 acres from the District.

At the subject hearing the focus of the inquiry will not be the appropriateness of the established district, rather, the focus will be consideration of the contents of the petition and whether the petition for amendment should be supported. Staff has reviewed the factors set forth in 190.046 Florida Statutes involving the

expansion or contraction of a district and can find no change in circumstance or condition which would be inconsistent with consenting to the boundary amendment. In addition staff finds that granting the amendment will afford benefits to the people owning property within the district.

As described in the petition, the subject lands are small in size and reflect a correction being made to include a portion of a neighborhood being served by the District and removing a portion of an adjacent neighborhood. Staff concludes that the amendment to the district is not inconsistent with any applicable element or portion of either the state comprehensive plan or the Lee County local government comprehensive plan, the Lee Plan. The petitioner has provided that no additional facilities will be required to service the lands being added and that no existing facilities currently serve the lands to be removed.

The District's request for consent by the County to amend the boundaries is not inconsistent with, and shall always be subject to, the Lee County Comprehensive Plan and all of the County's related land development regulations.

Planning staff recommends that the Lee County Board of County Commissioners adopt an ordinance amending Ordinance 02-13 granting the amendment to the boundaries of the Verandah West Community Development District and establishing the external boundaries of the district which are set forth in ordinance Attachment A.

LEE COUNTY ORDINANCE NO. _____

AN ORDINANCE CONSENTING TO AND AUTHORIZING THE MODIFICATION OF BOUNDARIES OF THE VERANDAH WEST COMMUNITY DEVELOPMENT DISTRICT AS SET FORTH IN FLORIDA STATUTE §190.046; PROVIDING FOR ORDINANCE AUTHORITY; AUTHORIZATION TO MODIFY BOUNDARIES; STATUTORY PROVISIONS GOVERNING THE DISTRICT; AND PROVIDING FOR CONFLICT, SEVERABILITY, AND AN EFFECTIVE DATE.

WHEREAS, The Verandah West Community Development District was established in accordance with Florida Statutes §190.005(2) pursuant to Lee County Ordinance No. 02-13, and adopted by the Lee County Board of County Commissioners on March 26, 2002; and

WHEREAS, The Verandah West Community Development District has requested the Lee County Board of County Commissioners for authorization to modify its boundaries pursuant to Florida Statutes §190.046; and

WHEREAS, Florida Statutes §190.046 provides that an established community development district can modify its boundaries only after the Lee County Board of County Commissioners consent to the modification of its boundaries; and

WHEREAS, The Verandah West Community Development District specifically requests permission to add the lands set forth in Exhibit 1 to the District and remove the lands set forth in Exhibit 2 from the District and establish new boundaries as set forth in Exhibit 3; and

WHEREAS, staff review of the request to modify the boundaries of the Verandah West Community Development District and all related information indicates there is no rational basis to refuse the requests set forth in the District's petition; and

WHEREAS, the requested modification of the District's boundaries is not inconsistent and will always be subject to the Lee County Comprehensive Land Use Plan and all related land development regulations and are activities of the District.

NOW, THEREFORE, BE IT ORDAINED BY THE BOARD OF COUNTY COMMISSIONERS OF LEE COUNTY, FLORIDA:

SECTION ONE: ORDINANCE AUTHORITY

This ordinance is adopted in accordance with Florida Statutes Chapter 190 and other applicable provisions of law governing County Ordinances.

SECTION TWO: AUTHORIZATION TO MODIFY BOUNDARIES

The Lee County Board of County Commissioners consent to and authorize modification of The Verandah West Community Development District boundaries as set forth in Florida Statutes §190.046.

Specifically, The Verandah West Community Development District boundaries are to be modified as follows:

1. The lands described in Exhibit 1, comprising of approximately 3.34 acres are added to the District.
2. The lands described in Exhibit 2, comprising of approximately 3.23 acres are removed from the District.
3. The District boundaries are amended to include all of the lands described in Exhibit 3.

SECTION THREE: STATUTORY PROVISIONS GOVERNING THE DISTRICT

The Verandah West Community Development District will continue to be governed by the provisions of Florida Statutes, Chapter 190.

SECTION FOUR: CONFLICT AND SEVERABILITY

In the event this Ordinance conflicts with any other Lee County ordinance or other applicable law, the more restrictive will apply. If any phase or portion of this Ordinance is held invalid or unconstitutional by any court of competent jurisdiction, such portion will be deemed a separate, distinct and independent provision and such holding will not affect the validity of the remaining portion.

SECTION FIVE: EFFECTIVE DATE

This Ordinance becomes effective upon filing with the Office of the Secretary of the Florida Department of State.

THE FOREGOING ORDINANCE was offered by Commissioner _____,
who moved its adoption. The motion was seconded by Commissioner _____

BOARD OF COUNTY COMMISSIONERS

LEE COUNTY, FLORIDA

RE: PETITION TO AMEND LEE COUNTY ORDINANCE
NO. 02-13, PURSUANT TO SECTION 190.046,
FLORIDA STATUTES, TO MODIFY THE
BOUNDARIES OF THE VERANDAH WEST
COMMUNITY DEVELOPMENT DISTRICT

**PETITION TO AMEND LEE COUNTY ORDINANCE
NO. 02-13 AND TO MODIFY THE BOUNDARIES OF
VERANDAH WEST COMMUNITY DEVELOPMENT DISTRICT**

THE BOARD OF SUPERVISORS OF THE VERANDAH WEST COMMUNITY DEVELOPMENT DISTRICT, (hereinafter "Petitioner") by and through its undersigned attorney, hereby petitions the BOARD OF COUNTY COMMISSIONERS OF LEE COUNTY, FLORIDA (hereinafter "Commission") to adopt an ordinance amending Lee County Ordinance No. 02-13, which established the Verandah West Community Development District (hereinafter "District"), in order to modify the boundaries of the District pursuant to the Uniform Community Development District Act of Florida, Section 190.046, Florida Statutes, (2003), as amended, and specifically to add certain lands to the District and to remove certain other lands from the District. In support thereof, Petitioner submits:

1. Current Location and Size. The District is located entirely within Lee County, Florida. Exhibit 1 depicts the general location of the project. The District covers approximately 777.95 acres of land. The District is located in Sections 25 and 36, Township 43 South, Range 25 East, and Sections 29, 30, 31, and 32, Township 43 South,

Range 26 East, all of Lee County Florida. A metes and bounds description of the external boundaries of the District is set forth in Exhibit 2.

2. Lands to be Added. A metes and bounds description of the land to be added to the District is set forth in Exhibit 3. The land to be added to the District is approximately 3.34 acres in size and is contiguous with the existing boundaries of the District.

3. Lands to be Removed. A metes and bounds description of the land to be removed from the District is shown in Exhibit 4. The land to be removed from the District is approximately 3.23 acres in size.

4. New Boundaries. Exhibit 5 sets forth a metes and bounds description of the proposed boundaries of the District. The District boundaries, as modified, will cover approximately 778.06 acres of land.

5. Landowner Consent. At the time of filing this Petition, all of the land to be added or deleted from the District is owned by Verandah Development, LLC. A statement of consent to this petition and the proposed modification is attached as Exhibit 6.

6. District Services and Facilities. The lands to be added and deleted from the District are of sufficiently small size that no additional facilities are required to service the lands being added other than those contemplated by the original petition. Similarly, there are no existing facilities serving the lands to be removed from the District that will have any adverse impact on the District.

7. Future Land Uses. The future general distribution, location, and extent of the public and private land uses, by future land use plan element of the County's Future Land Use Plan, for the lands proposed to be added to the District is identified on Exhibit 7. The Lee County Comprehensive Plan ("Lee Plan") designates the land to be added to the

District as Wetlands and Suburban. The Lee Plan designates the land to be removed from the District as Suburban and Wetlands.

8. Statement of Estimated Regulatory Costs. Due to the small size of the lands to be added and removed from the District, and the counterbalancing effect of the similar sizes and uses of these two parcels, the Petitioner asserts that the proposed modification to the boundaries of the District will not alter the regulatory costs set forth in the original petition establishing the District. The statement of estimated regulatory costs ("SERC") prepared for the original petition establishing the District, in accordance with the requirements of Section 120.541, Florida Statutes (2003), is attached as Exhibit 8.

10. Authorized Agent. The authorized agent for the Petitioner is:

Neale Montgomery, Esq.
Pavese Law Firm
P.O. Drawer 1507
Ft. Myers, FL 33902-1507

See Exhibit 9 – Authorization of Agent. Copies of all correspondence and official notices should go to the Authorized Agent.

11. This petition to amend Lee County Ordinance No. 02-13, amending the boundaries of the District should be granted for the following reasons:

A. Modifying the boundaries of the District is not inconsistent with applicable elements or portions of the effective State Comprehensive Plan or the Lee County Comprehensive Plan.

B. The area of land to be added to the District is part of a neighborhood located within the Verandah and the District boundary and will include the entire neighborhood. The land to be deleted from the District is not a part of any of the neighborhoods within the District, but rather, is part of an adjacent planned neighborhood.

Therefore, the boundaries of the District, as modified, are of sufficient size and are sufficiently compact and contiguous to be developed as one functional and interrelated neighborhood.

C. The District is the best alternative for delivering community development service and facilities to the lands to be added to the District, which lands are part of the planned neighborhood. The lands to be deleted from the District are no longer part of the neighborhoods included in the District and, therefore, this District is not the best alternative for delivering community services to those lands to be deleted.

D. The community development services and facilities of the District serving the lands to be added will not be incompatible with the capacity and use of existing local and regional community development services and facilities. In addition, the establishment of the District over these lands will provide a perpetual entity capable of making reasonable provisions for the operation and maintenance of the District's services and facilities in the lands to be added.

E. The lands to be added to the District are part of the planned community currently being served by the District and are amenable to separate special-district government. The lands to be deleted from the District are no longer part of any of the neighborhoods within the District and are, therefore, not amenable to separate special-district government.

WHEREFORE, Petitioner respectfully requests the Board of County Commissioners of Lee County, Florida to:

1. Direct its staff to schedule a public hearing in accordance with the requirements of Section 190.046, Florida Statutes (2003) and in the same manner and with the same public notice as other ordinance amendments;

2. Grant the petition and adopt an ordinance to amend Lee County Ordinance No. 02-13, adding the lands set forth in Exhibit 3 to the District, removing the lands set forth in Exhibit 4 from the District, and establishing the new boundaries of the District as set forth in Exhibit 5.

RESPECTFULLY SUBMITTED this 9th day of SEPTEMBER, 2004.

**CONSENT AND JOINDER OF LANDOWNERS
TO THE MODIFICATION OF THE BOUNDARIES
OF THE VERANDAH WEST COMMUNITY DEVELOPMENT DISTRICT**

The undersigned is the owner of certain lands more fully described in Exhibit A to this Consent, attached hereto and made a part hereof.

The undersigned understands and acknowledges that The Board of Supervisors of the Verandah West Community Development District ("Petitioner") intends to submit an application to modify and amend the boundaries of a Community Development District in accordance with the provisions of Chapter 190 of the Florida Statutes.

As the owner of the lands which are intended be added to and deleted from the boundaries of the Community Development District, the undersigned understands and acknowledges that pursuant to the provisions of Section 190.046, Florida Statutes, the Petitioner is required to include the written consent to the amendment to the Community Development District of one hundred percent (100%) of the owners of the lands to be added to or deleted from the Community Development District.

The undersigned, on behalf of the Verandah Development, L.L.C., does hereby consent to the proposed modification of the boundaries of the Community Development District which will include the lands to be added to and deleted from the Community Development District and agrees to further execute any documentation necessary or convenient to evidence this Consent and Joinder during the application process for the modification to the boundaries to the Community Development District.

The undersigned acknowledges that the consent will remain in full force and effect until the community Development District is modified or three years from the date hereof, whichever shall occur first. The undersigned further agrees that it will provide to the next purchaser or successor in interest of all or any portion of the Property a copy of this Consent form.

The undersigned hereby represents and warrants that it has taken all actions and obtained all consents necessary to duly authorize the execution of this Consent and Joinder by the officer executing this instrument.

dwelling units per acre (4 du/acre) to ten dwelling units per acre (10 du/acre) and a maximum density of fifteen dwelling units per acre (15 du/acre). (Amended by Ordinance No. 94-30, 02-02)

POLICY 1.1.4: The Urban Community areas are areas outside of Fort Myers and Cape Coral that are characterized by a mixture of relatively intense commercial and residential uses. Included among them, for example, are parts of Lehigh Acres, San Carlos Park, Fort Myers Beach, South Fort Myers, the city of Bonita Springs, Pine Island, and Gasparilla Island. Although the Urban Communities have a distinctly urban character, they should be developed at slightly lower densities. As the vacant portions of these communities are urbanized, they will need to maintain their existing bases of urban services and expand and strengthen them accordingly. As in the Central Urban area, predominant land uses in the Urban Communities will be residential, commercial, public and quasi-public, and limited light industry (see Policy 7.1.6). Standard density ranges from one dwelling unit per acre (1 du/acre) to six dwelling units per acre (6 du/acre), with a maximum of ten dwelling units per acre (10 du/acre). (Amended by Ordinance No. 94-30, 02-02)

POLICY 1.1.5: The Suburban areas are or will be predominantly residential areas that are either on the fringe of the Central Urban or Urban Community areas or in areas where it is appropriate to protect existing or emerging residential neighborhoods. These areas provide housing near the more urban areas but do not provide the full mix of land uses typical of urban areas. The standard residential densities are the same as the Urban Community category. Higher densities, commercial development greater than neighborhood centers, and industrial land uses are not permitted. Bonus densities are not allowed. (Amended by Ordinance No. 94-30)

POLICY 1.1.6: The Outlying Suburban areas are characterized by their peripheral location in relation to established urban areas. In general, these areas are rural in nature or contain existing low-density development. Some, but not all, of the requisite infrastructure needed for higher density development is generally planned or in place. It is intended that these areas will develop at lower residential densities than other Future Urban Areas. As in the Suburban areas, higher densities, commercial development greater than neighborhood centers, and industrial land uses are not permitted. The standard density range is from one dwelling unit per acre (1 du/acre) to three dwelling units per acre (3 du/acre). Bonus densities are not allowed. In the Outlying Suburban area in North Fort Myers east of I-75 and in the Buckingham area (see Goal 17), the maximum density permitted is two dwelling units per acre (2 du/acre). (Amended by Ordinance 91-19)

POLICY 1.1.7: The Industrial Development areas play an important role in strengthening the county's economic base and will become increasingly important as the county grows in size and urban complexity. To a great extent these are the areas to which Lee County must look for expanded job opportunities, investments and production opportunities, and a balanced and sufficient tax base. These areas have special locational requirements that are more stringent than those for residential areas, including transportation needs (e.g., air, rail, highway); industrial levels of water, sewer, fire protection, and other urban services; and locations that are convenient for employees to reach. Whereas the other Future Urban Areas will include a broad combination of residential, commercial, public, and limited industrial land uses, the Industrial Development area is to be reserved mainly for industrial activities per se, as well as for selective land use mixtures such as the combined uses of industrial, manufacturing, research, properly buffered recreational uses (except where precluded by airport hazard zone regulations), and office complexes (if specifically related to adjoining industrial uses) that constitute a growing part of Florida's economic development sector. New natural resource extraction (mining) activities and fill dirt operations must be approved through the Industrial Planned Development rezoning

OBJECTIVE 1.5: WETLANDS. Designate on the Future Land Use Map those lands that are identified as Wetlands in accordance with F.S. 373.019(17) through the use of the unified state delineation methodology described in FAC Chapter 17-340, as ratified and amended in F.S. 373.4211. (Amended by Ordinance No. 94-30)

POLICY 1.5.1: Permitted land uses in Wetlands consist of very low density residential uses and recreational uses that will not adversely affect the ecological functions of wetlands. All development in Wetlands must be consistent with Goal 84 of this plan. The maximum density is one dwelling unit per twenty acres (1 du/20 acre) except as otherwise provided in Table 1(a) and Chapter XIII of this plan. (Amended by Ordinance No. 94-30)

POLICY 1.5.2: When the exact location of Wetlands boundaries is in question, Chapter XIII of this plan provides an administrative process, including a field check, to precisely define the boundary. (Amended by Ordinance No. 94-30)

POLICY 1.5.3: Wetlands that are conservation lands will be subject to the provisions of Policy 1.4.6 as well as the provisions of Objective 1.5. The most stringent provisions of either category will apply. Conservation wetlands will be identified on the FLUM to distinguish them from non-conservation wetlands. (Added by Ordinance No. 98-09)

OBJECTIVE 1.6: NEW COMMUNITY. Designate on the Future Land Use Map areas which are suitable for the development of large-scale multi-use communities developed pursuant to an overall master plan. This category is also considered a Future Urban Area.

POLICY 1.6.1: New Community areas are lands that are capable of being planned and developed as a cohesive unit in order to better achieve conservation of important environmental resources and to initiate areawide surface water management. New Community land must be located such that the area is capable of being developed with a balance of residential and non-residential uses and that major impacts of the development are internalized and/or alleviated by infrastructure that is existing or will be funded privately. New Community areas will be developed as freestanding economic units and will not impose negative fiscal impacts on the county (other than those associated with the delay in placing property improvements on the tax rolls).

New Communities will not exceed a residential density of six dwelling units per gross acre and must have at least the following characteristics:

1. The land will be developed under a well-conceived overall master plan;
2. The land can be served with all necessary facilities and services at no expense to the county. Uniform Community Development Districts and special taxing districts may be utilized toward achieving this objective;
3. Population, recreation, open space, educational, office, and research facilities are distributed in an orderly and attractive manner;
4. The land must be developed in such a manner as to protect environmentally sensitive areas;
5. The land must be developed as a free-standing community offering a complete range of land uses (e.g. a full mix of housing types for a range of household incomes, industrial and office employment centers, and community facilities such as fire departments, schools, law enforcement offices, public recreational areas, health care facilities, and community commercial areas);
6. Off-site impacts must be mitigated; and,

"EXHIBIT 7"

STATEMENT OF ESTIMATED REGULATORY COSTS

1.0 Introduction

1.1 Purpose and Scope

This Statement of Estimated Regulatory Costs ("SERC") supports the petition to establish the state created and chartered **Verandah West Community Development District** ("District"). The land proposed for the District is approximately 777.95 acres of land located in unincorporated Lee County, Florida. The limitations on the scope of this SERC are explicitly set out in Section 190.002 (2) (d), F.S. (governing District establishment or alteration) as follows:

"That the process of establishing such a district pursuant to uniform general law shall be fair and based only on factors material to managing and financing the service delivery function of the district, so that any matter concerning permitting or planning of the development is not material or relevant (emphasis added)."

1.2 Overview of the Verandah West Community Development District

The District will comprise of approximately 777.95 acres within unincorporated Lee County, Florida. The District is designed to provide infrastructure systems, services, and facilities along with certain ongoing operations and maintenance to the Verandah Community (the "Development"). The portion of the community development proposed to be within the Verandah West Community Development is planned for approximately 786 residential units, comprising 538 single-family units and 248 multi-family units.

A Community Development District ("CDD") is an independent unit of special and single purpose local government created and chartered by Chapter 190, Florida Statutes, to plan, finance, construct, operate and maintain community-wide infrastructure in large, planned community developments. CDD's provide a "solution to the state's planning, management and financing needs for delivery of capital infrastructure to service projected growth without overburdening other governments and their taxpayers." Section 190.002 (1) (a) F.S.

A CDD is not a substitute for the local, general purpose, government unit, e.g., the county in which the CDD lies. A CDD does not have the permitting, zoning or police powers possessed by general purpose governments. A CDD is an alternative means of financing, constructing, operating, and maintaining community infrastructure for planned developments, such as the Verandah community. The scope of this SERC is limited to evaluating the consequences approving the proposal to establish the District.

1.3 Requirements for Statement of Estimated Regulatory Costs

Section 120.541 (2), F.S. (1997), defines the elements a statement of estimated regulatory costs for rules and rulemaking (which pursuant to section 190.005 (1)(a)8, Fla. Stat., by way of section 190.005(2)(c), Fla. Stat., applying the estimated regulatory costs statement to ordinance establishment) must contain:

- (a) A good faith estimate of the number of individuals and entities likely to be required to comply with the rule, together with a general description of the types of individuals likely to be affected by the rule.
- (b) A good faith estimate of the cost to the agency, and to any other state and local government entities, of implementing and enforcing the proposed rule, and any anticipated effect on state and local revenues.
- (c) A good faith estimate of the transactional costs likely to be incurred by individuals and entities, including local governmental entities, required to comply with the requirements of the rule. As used in this paragraph, "transactional costs" are direct costs that are readily ascertainable based upon standard business practices, and include filing fees, the cost of obtaining a license, the cost of equipment required to be installed or used or procedures required to be employed in complying with the rule, additional operating costs incurred, and the cost of monitoring and reporting.
- (d) An analysis of the impact on small businesses as defined by Section 288.703, F.S., and an analysis of the impact on small counties and small cities as defined by Section 120.52, F.S. Lee County is not defined as a small county for purposes of this requirement.
- (e) Any additional information that the agency determines may be useful.
- (f) In the statement or revised statement, whichever applies, a description of any good faith written proposal submitted under paragraph (1) (a) and either a statement adopting the alternative or a statement of the reasons for rejecting the alternative in favor of the proposed rule.

2.0 A good faith estimate of the number of individuals and entities likely to be required to comply with the ordinance, together with a general description of the types of individuals likely to be affected by the ordinance.

As noted above, the portion of the community development proposed to be within the Verandah West Community Development District is designed for up to approximately 786 residential units. Establishment of the District would provide storm water management, mitigation and conservation and landscaping, systems, facilities and services to all of the proposed property through the District operations in the exercise of District general and specific powers. It is not anticipated that anyone outside the Development would be affected by the ordinance establishing the state created and chartered District, although the State of Florida and the County would be required to honor and apply with the general law establishment of the District by county ordinance. The number of people includes residents within the District some of whom are landowners (including the Developer). The number of entities required to comply with the ordinance are the State, the County and the District itself upon establishment.

3.0 Good faith estimate of the cost to state and local government entities, of implementing and enforcing the proposed rule, or in the case of Districts under 1000 acres, an ordinance of the general purpose government establishing the District, and any anticipated effect on state and local revenues.

3.1 Costs to Governmental Agencies of Implementing and Enforcing Rule

State Government Entities

There will be only modest costs to various State governmental entities to implement the proposed establishment of the District. The District as proposed on the property set-forth in the petition will encompass under 1,000 acres; therefore, the County is the establishing entity under 190.005 (2) F.S. The modest costs to various State entities to implement the proposed ordinance relate strictly to the receipt and processing of various reports that the District is required to file with the State and its various entities. Appendix A lists the reporting requirements. The costs to those State agencies that will receive and process the District's reports are very small because the District is only one of many governmental units that are required to submit the various reports. Therefore, the marginal cost of processing one additional set of reports is inconsequential. Additionally, pursuant to section 189.412, F.S., the District must pay an annual fee to the State of Florida Department of Community Affairs, which offsets such costs.

Lee County

The proposed land for the District is in the Lee County ("County") and consists of less than 1,000 acres. The County and its staff will process, analyze, and review the petition and its attachments and related information and then conduct public hearings (the EROC Hearing and the County Establishment Hearing) and vote upon the petition to establish the District. There is no charter to create which would otherwise require substantial time, effort and cost of the County and its staff. Therefore, these activities will absorb some but only a few resources. The costs to review and consider the petition, its attachments

"EXHIBIT 8"

and related information dealing with the six (6) statutory establishment factors will however, be offset by the processing fee required under section 190.005 (2) F.S., of up to \$15,000.00 as set forth in section 190.05(1)(b)2, F.S., as determined by the County.

These costs to the County are modest for a number of reasons. First, according to Chapter 190, F.S., review of the petition to establish the District does not include analysis of the Development itself. Second, the petition and related filings itself provides much of the information needed for a staff review. Third, existing local governments already possess the staff needed to conduct the review without the need for new staff. Fourth, there is no capital required to review the petition. Fifth, the potential costs are offset by the required filing fee. Finally, local governments routinely process petitions for land uses and zoning changes that are far more complex than is the petition to establish a CDD.

The annual costs to the County, because of the establishment of the District, are also very small. The District is an independent unit of specialized and single purpose local government. The only annual costs the County faces are the minimal costs of receiving and reviewing the various reports that the District is required to provide to the County.

3.2 Impact on State and Local Revenues

Adoption of the proposed ordinance establishing the CDD will have no negative impact on State and local revenues. The District is an independent unit of local government. It is designed to provide community systems facilities and services to serve the lands comprising the Verandah development project. It has its own sources of revenue. No State or local subsidies are required or expected.

In this regard it is important to note that any debt obligations incurred by the District to construct its infrastructure, or for any other reason, are not debts of the State of Florida, the County, or any other unit of local government. In accordance with State law, debts of the District are strictly its own responsibility.

4.0 A good faith estimate of the transactional costs likely to be incurred by individuals and entities required to comply with the requirements of the ordinance.

The term "transactional costs" means those costs incurred by state and local government agencies reviewing reports and receiving information from the District as well as by land owners, both present and future, who receive notices from the District and eventually qualified electors who live within the District and who will vote for election of District Board of Supervisors whose members manage District projections. Table 1 provides an outline of the various District systems, facilities and services and how they are to be managed, owned and funded.

The petitioner has estimated the design and development costs for managing and financing the provision of the capital facilities as outlined in Table 1. The cost estimates are shown in Table 2 below. Total design and development costs for these facilities are estimated to be approximately \$102,695,000. The District may levy non-ad valorem special assessment and issue revenue bonds to fund the provision of these facilities. These bonds would be repaid through non ad valorem assessments levied on all properties in the District that may meet the lienability requirements of law in regard to the law of non-ad valorem special assessments as applied to the District's capital improvement program as outlined in Table 2.

Accordingly, prospective future landowners in the Development may be required to pay non ad valorem assessments levied by the District to secure any debt incurred through bond issuance. In addition to the levy of non-ad valorem assessments for debt service, the District may also levy a non ad valorem assessment to fund the operations and maintenance by the District of its systems, facilities and services. However, locating in the District by new residents is completely voluntary. So, ultimately, all owners and users of the affected property choose to accept the non ad valorem assessments as a tradeoff for the special and peculiar benefits, as apportioned reasonably and fairly, that flow to the property within the District from the systems, facilities and services that the District will provide to the property. In addition, state law requires all non-ad valorem special assessments levied by the District to be disclosed under various sets of laws both by the District and by the seller of property to prospective purchasers within the boundaries of the District.

The District is an alternative means to manage (with related financing powers) necessary community development systems, facilities and services constituting infrastructure, improvements or projects. The District is a highly specialized single purpose local

government as an alternative way to manage the delivery of such infrastructure. The District has financing powers to pay for these management functions. There are alternative ways to manage and finance the provision of such infrastructure to the property constituting the community development within the jurisdiction of the District. The District is a public alternative. There are other public alternatives including independent Districts that may be created by special act so long as pursuant to the general law provisions consistent with state policy in section 189.404.F.S. Other public alternatives include the county or the city where the land proposed for the state chartered District is located. If the land is located within a county, a general purpose local government and a political subdivision of the state, the county can manage the delivery of the infrastructure and finance it through such financing mechanisms as municipal service taxing units (for ad valorem taxation) and municipal service benefit units (for types of non-ad valorem special assessments or non-lienable service charges). Another alternative is creation by the county by home rule ordinance of a dependent district to that both the function of management and the related function of financing the management would be by the dependent district (the financing through the auspices of the dependent district could involve ad valorem taxation, non-ad valorem special assessments or non-lienable service charges or fees). If the land area proposed for the District is within the jurisdiction of a municipality, then the municipality may decide under its charter powers to create a dependent district to manage the delivery of the infrastructure with related financing by ad valorem taxes, non-ad valorem special assessments or non-lienable charges and fees. There are also private alternatives for the management of the delivery of such basic infrastructure to the property constituting a community development. These private management alternatives include the developer itself and any related developer business entities and organizations such as partnerships or limited liability companies. In these instances, the management of the infrastructure would be financed by developer equity or other private sources. Other private alternatives include such non-profit entities as homeowner associations in which case the management would be by a selected board of homeowners consisting of homeowners in order to deliver the infrastructure but primarily on common areas. The financing of the management of the infrastructure would be by homeowner assessments (which are not government levies of any type and which are not enforced by government enforcement capabilities). In comparison to other public alternatives to manage and finance infrastructure, and also in comparison to private alternatives for such management and financing, the District through notice and continuing disclosure of its management decisions and related public financing and though its enhancement of the intrinsic value of the property with less costly overhead enables the District to put in higher quality infrastructure at marginally less cost, especially when tax exempt financing is used.

In considering these costs it shall be noted that occupants of the lands to be included within the Development will receive three major classes of benefits. First, those residents and businesses in the Development will receive timely a higher level of quality service from the public provision of systems, facilities and services than would otherwise be the case.

"EXHIBIT 8"

Second, a CDD is a mechanism for assuring that the community services will be completed concurrently with development of lands within the Development. This satisfies the revised properly managed provision of infrastructure systems, facilities and services constitutes the basis for the observation that growth management legislation, and it assures that growth pays for itself without undue burden on other consumers. Establishment of the District will ensure that only these landowners pay for the provision of facilities, services and improvements to these lands.

Third, a CDD is a unique form of governance created by state general law as a growth management tool which allows District landowners, through landowner voting and ultimately qualified elector voting for resident qualified elector membership elected boards, as applicable, to determine the type, quality and expense of the District systems, facilities and services their property receives, provided they meet the County's overall requirements.

The cost impact on the ultimate landowners in the Development is not the total cost for the District to provide infrastructure systems services and facilities. Instead, it is the incremental costs above what the landowners would have paid to install infrastructure via an alternative financing mechanism. Given the low cost of capital for a CDD, the cost impact to landowners is negligible. This incremental cost of the high quality infrastructure provided by the District is likely to be fairly low.

5.0 An analysis of the impact on small businesses as defined by Section 288.703, F.S., and an analysis of the impact on small counties and small cities as defined by Section 120.52, F.S.

There will be little impact on small businesses from the establishment of the state created District on the property proposed in the petition. If anything, the impact may be positive because, among other things, the District Board of Supervisors must bid competitively certain contracts and negotiate competitively certain consulting contracts. These requirements afford small businesses the opportunity to bid or to negotiate competitively on District work. Also, the District adds intrinsic value to the property which the county has already enhanced by working with the developer on the county entitlements. It is the management by the District in a pinpointed focused way in the provision of infrastructure subject to county entitlements that enhances the intrinsic value of the property. This makes the entire community development more attractive to small businesses. The county has an estimated population that is greater than 75,000 according to the Lee County Government website. Therefore, Lee County is not a "small" county according to section 120.52, F.S. and the proposed land areas on which the state created District would be established is not within a municipality.

6.0 Any additional useful information.

The analysis provided above is based on a straightforward application of economic theory, especially as it relates to tracking the incidence of regulatory costs and benefits. Inputs were received from the Petitioner's Engineer and other professionals associated with the Petitioner.
