SUBSTANTIAL IMPROVEMENT OR SUBSTANTIAL DAMAGE

NOTICE TO PROPERTY OWNERS

We will use the assessed value of your structure (excluding the land) recorded by the Property Appraiser’s Office. If you disagree with the Property Appraiser’s Valuation of the structure, you may engage a State of Florida licensed property appraiser to submit a comparable property appraisal for the total market value of the structure.

You must obtain and submit to us a detailed and complete cost estimate for the addition, remodeling, reconstruction or for repair of all damages sustained by your home, prepared and signed by a licensed general contractor. The contractor must sign an affidavit indicating that the cost estimate submitted includes all damages or all improvements to your home, not just structural. The signed contract document must be submitted. If the owner is the contractor, the owner is responsible for submitting the cost estimate, and providing documentation, including subcontractor bids, to document the cost estimate.

We will evaluate the cost of improvements or repairs and determine if they are fair and reasonable. For damage repairs, pre-storm prices and rates will be utilized. The cost of improvements or repairs does not include items not considered a permanent part of the structure. (i.e., plans, surveys, permits, sidewalks, pools, screens, sheds, gazebos, fences, etc.) (See attached copy)

If your home is determined to have “substantial damage” or is proposed to be “substantially improved”, then an elevation certificate must be submitted to us to determine the lowest floor elevation. Garages and carports are not considered to be the “lowest floor”.

If the lowest floor is below the 100-year flood elevation, the building must be elevated to, or above, that level. Likewise, all electrical and mechanical equipment (heating and cooling, etc.), bathrooms, and laundry rooms must be elevated to, or above, the 100-year floor level. Only parking, building access, and limited, incidental storage is allowed below the flood level. Non-residential buildings may be “floodproofed” instead of being elevated.

If the lowest floor of the structure, including electrical and mechanical equipment and bathroom are already above the 100-year flood elevation, the building can be repaired and reconstructed without having to comply with the fifty percent (50%) rule.

Building plans must be prepared to show how the building is to be elevated. If located in a V-zone, Coastal High Hazard Area, or if the building is to be floodproofed, these plans must be prepared and certified by a registered professional engineer or architect. Certificates for this purpose are available from the Building and Zoning Department.

Donated or Discounted Materials:

The value placed on materials should be equal to the actual or estimated cost of all materials to be used. Where materials or servicing equipment are donated or discounted below normal market values, the value should be adjusted to an amount equivalent to that estimated through normal market transaction.

Self or Volunteer Labor:

The value placed on labor should be equal to the actual or estimated labor charge for repairs of all damages sustained by the structure. Where non-reimbursed (volunteer) labor is involved, the value of the labor should be estimated based on applicable minimum hourly wage scales for the type of construction work to be completed. The local permitting official based on his/her professional judgment and knowledge of local/regional wages scales can provide additional guidance to determine reasonable labor rates for professional trades (i.e. electricians, plumbers, block masons, framing, HVAC).

Subtotals

Total Estimate Cost (all three subtotals added together)

1) A copy of the signed construction contract must accompany this estimate.
2) Subcontractor bids may be used for any item of material and/or labor cost breakdown.
3) If any amounts appear in the “Sub-contractor” column, a copy of each signed and dated bid must accompany this form.
4) Cost backup must be provided for every line item entry. If any amounts appear in the “Sub-contractor” column, a copy of each signed and dated bid must accompany this form. For all other costs, you must list the quantity of materials to be installed and their unit cost on a separate sheet that references the line number. For example, the backup document may contain a section called “Drywall to be installed (line 10)”:

<table>
<thead>
<tr>
<th>This Sheet (line 10)</th>

</thead>
<tbody>
<tr>
<td>Materials: $2,000.00</td>
<td>1,000 sq ft ½” Drywall @ $2.00/sq ft = $2,000.00</td>
</tr>
<tr>
<td>Labor: $320.00</td>
<td>16 Man Hours to Hang Drywall @ $20.00/MH = $320.00</td>
</tr>
</tbody>
