When all, or any portion, of the CONSULTANT'S compensation to provide and perform the services and work necessary and required pursuant to the Tasks set forth in Agreement Exhibit "A", and any Change Orders, Supple-
mental Task Authorizations, and Work Orders authorized thereto, is established to be made on a NOT-TO-EXCEED (N.T.E.) amount basis, it is mutually understood and agreed that such compensation for each completed Task shall be made on the following basis:

With the understanding and agreement that the CONSULTANT'S invoices and all payments to be made for all Not-to-Exceed amounts shall be subject to the review, acceptance and approval of the COUNTY; and

In the event the amount of compensation for any Task(s) or Sub-Task(s) to which the CONSULTANT is entitled on the Not-to-Exceed basis set forth above is determined to be necessary, required and actually expended and is determined to be actually less than the Not-to-Exceed amount established for the specific Task or Sub-Task, it is understood and agreed that any unexpended amount under a specific Task or Sub-Task may not be used, applied, transferred, invoiced or paid for services or work provided or performed on any other Task(s) or Sub-Task(s).
ARTICLE 3.00 - OBLIGATIONS OF THE CONSULTANT

The obligations of the CONSULTANT with respect to all the BASIC SERVICES and ADDITIONAL SERVICES authorized pursuant to this Agreement shall include, but not be limited to, the following:

(2) CONSULTANT'S PROJECT DIRECTOR

The CONSULTANT agrees to employ and designate, in writing, a qualified and, if required by law, a licensed professional to serve as the CONSULTANT'S Project Director. The CONSULTANT'S Project Director shall be authorized and responsible to act on behalf of the CONSULTANT with respect to directing, coordinating and administering all aspects of the services to be provided and performed under this Agreement thereto. The CONSULTANT'S Project Director shall have full authority to bind and obligate the CONSULTANT on any matter arising under this Agreement unless substitute arrangements have been furnished to the COUNTY in writing. The CONSULTANT agrees that the Project Director shall devote whatever time is required to satisfactorily direct, supervise and manage the services provided and performed by the CONSULTANT throughout the entire period this Agreement is in effect. The person selected by the CONSULTANT to serve as the CONSULTANT'S Project Director shall be subject to the prior approval and acceptance of the COUNTY.

(3) REMOVAL OF PERSONNEL

The CONSULTANT agrees, within thirty (30) calendar days of receipt of a written request from the COUNTY, to promptly remove and replace the CONSULTANT'S Project Director, or any other personnel employed or retained by the CONSULTANT, or personnel of the sub-consultant(s) or subcontractor(s) engaged by the CONSULTANT to provide and/or perform services and/or work pursuant to the requirements of this Agreement, who the COUNTY shall request, in writing, be removed, which request may be made by the COUNTY with or without cause.

Date: 09/25/01
3.03 TIMELY ACCOMPLISHMENT OF SERVICES

The timely performance and completion of the required services, work and materials is vitally important to the interests of the COUNTY. Time is of the essence for all of the duties and obligations contained in this Agreement thereto. The COUNTY may suffer damages in the event that the CONSULTANT does not accomplish and complete the required services in a timely manner. The CONSULTANT agrees to employ, engage, retain and/or assign an adequate number of personnel throughout the period of this Agreement so that all BASIC SERVICES and ADDITIONAL SERVICES will be provided, performed and completed in a timely and diligent manner throughout.

3.04 STANDARDS OF PROFESSIONAL SERVICE

The work and/or services to be provided and/or performed by the CONSULTANT and by any Sub-consultant(s) and/or Subcontractor(s) engaged by the CONSULTANT as set forth in the Scope of Professional Services, Exhibit "A", shall be done in accordance with the generally accepted standards of professional practice and in accordance with the laws, rules, regulations, ordinances, codes, policies, standards or other guidelines issued by those governmental agencies which have jurisdiction over all or a portion of this project and which are in effect at the time the COUNTY approves this Agreement, or which may subsequently be changed or revised. Any subsequent change or revision to such laws, rules, regulations, ordinances, codes, policies, standards or other guidelines which requires the CONSULTANT to provide and/or perform work and/or services which are significantly different from that set forth in the Scope of Professional Services, Exhibit "A", shall serve as a basis for the COUNTY to consider the development and issuance of a Change Order to provide for a change to, or Additional Services to the services set forth in the Agreement.

3.05 CORRECTION OF ERRORS, OMISSIONS OR OTHER DEFICIENCIES

(1) RESPONSIBILITY TO CORRECT

The CONSULTANT agrees to be responsible for the professional quality, technical adequacy and accuracy, timely completion, and the coordination of all data, studies, surveys, designs, specifications, calculations, estimates, plans, drawings, construction documents, photographs, reports, memoranda, other documents and instruments, and other services, work and materials performed, provided, and/or furnished by CONSULTANT or by any sub-consultant(s) and/or subcontractor(s) retained or engaged by the CONSULTANT pursuant to this Agreement. The CONSULTANT shall, without additional compensation, correct or revise any errors, omissions or other deficiencies in such data, studies, surveys, designs, specifications, calculations, estimates, plans, drawings, construction documents and instruments, and other services, work and materials resulting from the negligent act, errors or omissions or intentional misconduct of CONSULTANT or any sub-consultant(s) or subcontractor(s) engaged by the CONSULTANT.
Neither review, approval, or acceptance by the COUNTY of data, studies, surveys, designs, specifications, calculations, estimates, plans, drawings, construction documents, photographs, reports, memoranda, other documents and instruments, and incidental professional services, work and materials furnished hereunder by the CONSULTANT, or any sub-consultant(s) or subcontractor(s) engaged by the CONSULTANT, shall in any way relieve CONSULTANT of responsibility for the adequacy, completeness and accuracy of its services, work and materials and the services, work and materials of any and all sub-consultants and/or subcontractors engaged by the CONSULTANT to provide and perform services in connection with this Agreement. Neither the COUNTY'S review, approval or acceptance of, nor payment for, any of the CONSULTANT'S services, work and materials shall be construed to operate as a waiver of any of the COUNTY'S rights under this Agreement, or any cause of action it may have arising out of the performance of this Agreement.

3.06 LIABILITY

(1) CONSULTANT TO HOLD COUNTY HARMLESS

The CONSULTANT shall be liable and agrees to be liable for and shall indemnify and hold the COUNTY harmless for any and all claims, suits, judgements or damages, losses and expenses including court costs and attorney's fees arising out of the CONSULTANT'S errors, omissions, and/or negligence, or those of any and all sub-consultants and/or subcontractors engaged by the CONSULTANT during the providing, performing and furnishing of services, work and materials pursuant to this Agreement and any and all Change Orders, Supplemental Task Authorizations thereto. The CONSULTANT shall not be liable to nor indemnify the COUNTY for any portions of damages arising out of any error, omission, and/or negligence of the COUNTY, its employees, agents, or representatives or third parties. The CONSULTANT hereby acknowledges that the compensation to be paid the CONSULTANT by the COUNTY as set forth in Agreement Exhibit "B" entitled "COMPENSATION AND METHOD OF PAYMENT" includes compensation as consideration for the indemnification provided herein.

3.07 NOT TO DIVULGE CERTAIN INFORMATION

CONSULTANT agrees, during the term of this Agreement, not to divulge, furnish or make available to any third person, firm, or organization, without COUNTY'S prior written consent, or unless incident to the proper performance of CONSULTANT'S obligations hereunder, or in the course of judicial or legislative proceedings where such information has been properly subpoenaed, any non-public information concerning the services to be rendered by CONSULTANT or any sub-consultant(s) or subcontractor(s) pursuant to this Agreement. CONSULTANT shall require all of its employees, sub-consultant(s) and subcontractor(s) to comply with the provisions of this paragraph.

Date: 09/25/01
CONSULTANT agrees to promptly repair and/or replace, or cause to have repaired and/or replaced, at its sole cost and expense and in a manner acceptable to and approved by the COUNTY, any property damage arising out of, or caused by, the willful or negligent acts of the CONSULTANT, or of its sub-consultants and/or subcontractors. This CONSULTANT'S obligation under this sub-article does not apply to property damage caused by any other Consultant or Contractor engaged directly by the COUNTY. The COUNTY reserves the right, should the CONSULTANT fail to make such repairs and/or replacement within a reasonable period of time, to cause such repairs and/or replacement to be made by others and for all costs and expenses associated with having such repairs and/or replacement done to be paid for by the CONSULTANT, or by the CONSULTANT reimbursing the COUNTY for all such costs and expenses.

3.09 RESPONSIBILITY FOR ESTIMATES

(1) In the event the services required pursuant to this Agreement include the CONSULTANT preparing and submitting to the COUNTY, cost estimates, the CONSULTANT, by exercise of his experience, effort, knowledge and judgment, shall develop such cost estimates as are set forth in, or as may be required under the Agreement and shall be held accountable, responsible and liable for the accuracy, completeness, and correctness of any and all such cost estimates. For purposes of the Liability Provisions of this Article only, the CONSULTANT'S estimate(s) shall be considered valid and effective for a period of six (6) months from the date of the COUNTY'S acceptance of the estimate(s).

(2) The cost estimates of CONSULTANTS or SUB-CONSULTANTS engaged by CONSULTANTS, for the appraisal or valuation of property or easements, or the estimate of damages or costs associated with the acquisition of property or easements are exempted from the provisions of Article 3.09.

(3) Cost Estimates

(A) ORDER OF MAGNITUDE ESTIMATE

This is an approximate estimate made without detailed architect/engineering data. Examples include, but are not limited to, an estimate from cost-capacity curves, an estimate using scale-up or scale-down factors, and an approximate ratio estimate. This type of estimate shall be accurate within plus fifty percent (50.0%). If the bids, as described above, fail to meet this prescribed accuracy, the cost associated with the preparation and development of the ORDER OF MAGNITUDE ESTIMATE shall be recoverable by the COUNTY.

(B) BUDGET ESTIMATE

Budget in this case applies to the COUNTY'S budget and not to the budget as a project controlled document. A budget is prepared with the use of flowsheets, layouts, and equipment details. This type of estimate shall be accurate within plus twenty-five
percent (25.0%). If the bids, as described above, fail to meet this prescribed accuracy, the cost associated with the preparation and development of the BUDGET ESTIMATE shall be recoverable by the COUNTY.

(C) CONSTRUCTION COST ESTIMATE.

A construction cost estimate for purposes of this Agreement is an estimate prepared on the basis of well defined engineering/architectural data and on detailed information set forth in specifications, designs or drawings which are to be used as a basis for obtaining bids or price proposals for constructing the project. This type of estimate shall be accurate within plus or minus ten percent (10%) of the cost of the construction of the project. The accuracy and reliability of a CONSTRUCTION COST ESTIMATE is vital to the COUNTY'S interests because it may be used for such purposes as, but not limited to the following; budgeting, obtaining, allocating or obligating funds for the project; evaluating and determining the reasonableness and acceptableness of bids or price proposals for construction projects; or establishing the assessment amounts for Municipal Service Benefit Units (M.S.B.U.).

In the event the COUNTY solicits and receives bids or price proposals from contractors on a construction project based on specifications, design, drawings and a CONSTRUCTION COST ESTIMATE prepared by the CONSULTANT, and the lowest bid or price proposal, submitted by a responsive and responsible bidder or proposer, which bid or price proposal exceeds the amount of the CONSULTANT'S CONSTRUCTION COST ESTIMATE by more than the percent accuracy set forth hereinabove, the CONSULTANT shall, upon notification by the COUNTY, assume responsibility for and proceed to provide and perform the following service without additional compensation:

The CONSULTANT will, subject to the review and approval of the COUNTY, modify at its expense the specifications, design, drawings and related bidding and contract documents to the extent necessary to reduce the anticipated construction costs so that the re-solicitation of bids or price proposals will realize bids or price proposals being received that are within the range of accuracy established for the CONSTRUCTION COST ESTIMATE prepared by the CONSULTANT. Any such modifications made by the CONSULTANT shall not conflict with the functional or operational requirements established by the COUNTY for the project and set forth in the Agreement or Change Order(s) or Supplemental Task Authorization(s) issued thereto, nor shall any such modifications conflict with established rules, regulations, requirements or professional standards pertaining to the design, specifications or drawings prepared by the CONSULTANT, nor shall such modifications adversely affect the safe use or operation of the constructed project.
In the event (1) the CONSULTANT'S modification of the design, specifications, drawings and related bidding and contract documents, and (2) the re-solicitation of bids or price proposals do not result in bids or price proposals being received from a responsive and responsible bidder or proposer that are within the established percent accuracy of the CONSULTANT'S CONSTRUCTION COST ESTIMATE, the costs associated with the CONSULTANT'S preparation and development of the CONSTRUCTION COST ESTIMATE shall be recoverable by the COUNTY by an appropriate reduction in the CONSULTANT's invoice requesting payment for services rendered.

For determination of compliance with the accuracy requirement established for the CONSTRUCTION COST ESTIMATE prepared by the CONSULTANT, the amount of the CONSTRUCTION COST ESTIMATE submitted by the CONSULTANT shall be adjusted from the date the CONSTRUCTION COST ESTIMATE was received by the COUNTY until the date bids or price proposals are received by the COUNTY, by applying the percent change in the "20 Cities Cost Index" as published in the ENR (formerly ENGINEERING NEWS-RECORD) a McGraw-Hill, Inc. publication.

If, in response to its solicitation, the COUNTY receives less than three bids or priced proposals for a project, there is the potential that such bids or priced proposals may not be a realistic representation of the costs expected to be associated with the project. If under such circumstances, and if in the professional judgment of the CONSULTANT, the low bid or the low priced proposal received from a responsive bidder or proposer does not realistically represent the costs associated with the project, the CONSULTANT may deem it appropriate to recommend the COUNTY reject any such bid(s) or priced proposal(s). If under such circumstances the COUNTY concurs with the CONSULTANT'S recommendation and rejects the bid(s) or priced proposal(s), the COUNTY will not hold the CONSULTANT responsible to, nor will the COUNTY require the CONSULTANT to, modify the specifications, design, drawings and related bidding and contract documents as set forth hereinbefore.

3.10 PERMITS

The CONSULTANT will be responsible for preparing and submitting all required applications and other supportive information necessary to assist the COUNTY in obtaining all reviews, approvals and permits, with respect to the CONSULTANT'S design, drawings and specifications required by any governmental body having authority over the project. Any fees required for such reviews, approvals or permits will be covered by a check issued by the COUNTY and made payable to the respective governmental body upon the CONSULTANT furnishing the COUNTY satisfactory documentation of such fees. The CONSULTANT will be similarly responsible for preparing and submitting all required applications and other supportive information necessary to assist the COUNTY in obtaining any renewals and/or extensions of reviews, approvals or permits that may be required while this Agreement is in effect. The COUNTY shall, at the CONSULTANT'S request, assist in obtaining required signatures and provide the CONSULTANT with all information known.
to be available to the COUNTY so as to assist the CONSULTANT in the preparation and submittal of any original, renewal or extension of required reviews, approvals or permits.

3.11 ADDITIONAL SERVICES

Should the COUNTY request the CONSULTANT to provide and perform professional services for this project which are not set forth in EXHIBIT "A", the CONSULTANT agrees to provide and perform such ADDITIONAL SERVICES as may be agreed to in writing by both parties to this Agreement.

Such ADDITIONAL SERVICES shall constitute a continuation of the professional services covered under this Agreement and shall be provided and performed in accordance with the covenants, terms, and provisions set forth in this Agreement thereto.

ADDITIONAL SERVICES shall be administered and authorized as "SUPPLEMENTAL TASK AUTHORIZATIONS" or "CHANGE ORDERS" under the Agreement. The CONSULTANT shall not provide or perform, nor shall the COUNTY incur or accept any obligation to compensate the CONSULTANT for any ADDITIONAL SERVICES unless and until a written "SUPPLEMENTAL TASK AUTHORIZATIONS" or "CHANGE ORDER" shall have been agreed to and executed by both parties.

Each such "SUPPLEMENTAL TASK AUTHORIZATION" or "CHANGE ORDER" shall set forth a comprehensive, detailed description of: (1) the Scope of the ADDITIONAL SERVICES requested; (2) the basis of compensation; and (3) the period of time and/or schedule for performing and completing said ADDITIONAL SERVICES.

3.12 TRUTH-IN-NEGOTIATIONS CERTIFICATE

The COUNTY may request the CONSULTANT to execute a Truth-in-Negotiations Certificate ("Certificate"), in a form attached as EXHIBIT "F". The Certificate shall state that wage rates and other factual unit costs supporting the compensation are accurate, complete and current at the time this Agreement is executed. The original contract price and any additions thereto shall be adjusted to exclude any significant sums by which the COUNTY determines the contract price was increased due to inaccurate, incomplete or non-current wage rates or other factual unit costs.

3.13 COMPLETION OF TASKS

Unless otherwise set forth in the Agreement the CONSULTANT shall be responsible for providing and performing whatever services, work, equipment, material, personnel, supplies, facilities, transportation and administrative support that are necessary and required to complete all of the tasks set forth in Agreement Exhibit "A" entitled "Scope of Professional Services" and Change Orders, and Supplemental Task Authorizations authorized. The compensation to be paid the CONSULTANT as set forth in Agreement Exhibit "B" entitled "Compensation and Method of Payment" and Change Orders, and Supplemental Task Authorizations authorized thereto shall be understood and agreed to adequately and completely compensate the CONSULTANT for providing and performing whatever services, work, equipment, material, personnel, supplies, facilities, transportation and administrative support that are necessary and required to complete the
3.14 AFFIRMATIVE ACTION BY CONSULTANT WHEN ENGAGING SUB-CONSULTANTS

Florida Statute #287.042(4)(f) establishes that agencies, including Lee County, are encouraged to spend twenty-five (25%) percent of the monies actually spent for contractual services for the purpose of entering into contracts with certified Minority Business Enterprises. Accordingly, the CONSULTANT is encouraged, when selecting or engaging the services of sub-consultants or subcontractors pursuant to this Agreement, to spend twenty-five (25%) percent of the amount of compensation established in this Agreement and in subsequent CHANGE ORDERS, and SUPPLEMENTAL TASK AUTHORIZATIONS authorized thereto for the engagement of the services of certified Minority Business Enterprise sub-consultants or subcontractors.

In furtherance of this statutory goal the COUNTY expects the CONSULTANT to take affirmative action towards achieving this goal. "Affirmative Action" as used herein shall constitute a good faith effort by the CONSULTANT to achieve the stated goal of engaging certified Minority Business Enterprise sub-consultants or subcontractors to provide or perform services and/or work pursuant to the SCOPE OF SERVICES required under this Agreement. Efforts taken by the CONSULTANT to assist the COUNTY in meeting this statutory goal must be documented in detail, records of sub-consultants or subcontractors contacted maintained, including negotiation efforts, and written Agreements maintained for services or work awarded to sub-consultants or subcontractors.

The CONSULTANT, upon receipt of a written request by the COUNTY, shall within ten (10) calendar days thereafter submit to the COUNTY copies of records and supporting documentation to show evidence of its affirmative action efforts to achieve the above stated goal.

5.02 ADDITIONAL SERVICES

The COUNTY shall pay the CONSULTANT for all such ADDITIONAL SERVICES as have been requested and authorized by the COUNTY and agreed to, in writing, by both parties to this Agreement and which have been rendered as ADDITIONAL SERVICES by the CONSULTANT and completed in accordance with the requirements, provisions, and/or terms of this Agreement and accepted by the COUNTY in accordance with the provisions for compensation and payment of said ADDITIONAL SERVICES as set forth and prescribed in EXHIBIT "B", entitled "COMPENSATION AND METHOD OF PAYMENT", which EXHIBIT "B" is attached hereto and made a part of this Agreement, or on the basis of such changes to the established compensation as may be mutually agreed to by both parties to this Agreement as evidenced by a written Change Order or Supplemental Task Authorization executed by both parties.

6.04 FAILURE TO PERFORM IN A TIMELY MANNER

Should the CONSULTANT fail to commence, provide, perform and/or complete any of the services and work required pursuant to this Agreement in a timely and diligent manner, the COUNTY may consider such failure as justifiable cause to terminate this Agreement. As an alternative to termination, the COUNTY at its option, may, upon written notice to the CONSULTANT, withhold any or all payments due and owing to the CONSULTANT, not to exceed the amount of the compensation for the work in dispute, until such time as the CONSULTANT resumes performance of his obligations in such a manner as to get back on schedule in accordance with the time and schedule of performance requirements set forth in this Agreement, or any CHANGE ORDER(S), or SUPPLEMENTAL TASK AUTHORIZATION(S) issued thereto.

If the COUNTY determines that there is a conflict of interest, CONSULTANT or such sub-consultant shall decline the representation upon written notice by the COUNTY.

If the COUNTY determines that there is not such conflict of interest, then the COUNTY shall give its written consent to such representation. If CONSULTANT or sub-consultant accepts such a representation without obtaining the COUNTY'S prior written consent, and if the COUNTY subsequently determines that there is a conflict of interest between such representation and the work being performed by CONSULTANT or such...
sub-consultant under this Agreement, then the CONSULTANT or such
sub-consultant agrees to promptly terminate such representation. CONSULTANT shall require each of such sub-consultants to comply with the provisions of this Section.

Should the CONSULTANT fail to advise or notify the COUNTY as provided hereinabove of representation which could, or does, result in a conflict of interest, or should the CONSULTANT fail to discontinue such representation, the COUNTY may consider such failure as justifiable cause to terminate this Agreement.

SCOPE OF SERVICES

for CN-06-04 LEE COUNTY GREEN MEADOWS WTP EXPANSION

BASIC SERVICES

Section 1. GENERAL SCOPE STATEMENT

The CONSULTANT shall provide and perform the following services, which shall constitute the GENERAL SCOPE of the BASIC SERVICES under the covenants, terms, and provisions of this SERVICE PROVIDER AGREEMENT.

The Green Meadows expansion project will be divided into the following four phases.

- Phase 1. Evaluate treatment process expansion options, perform bench-scale testing of selected treatment processes and prepare a Preliminary Process Design Report
- Phase 2. Drill new test production and observation wells
- Phase 3. Design of new treatment facilities and wellfield
- Phase 4. Perform services during construction

This scope of services includes the engineering services for the first phase (Phase 1) of the Green Meadows expansion project. As part of the treatment process evaluation phase, the ENGINEER will:

- Evaluate the existing facilities, current and future regulations, and available technologies to determine the preferred treatment process expansion option that best fits the County’s needs
- Examine the benefits of reusing existing treatment facilities versus constructing new facilities as appropriate
- Evaluate existing well conditions for flow rate, discharge pressure, drawdown and water quality (WQ)
- Evaluate proposed well sites, routing of new raw water transmission main, existing water use permit limitations, review future well head protection ordinance, and regulations related to well easements (i.e. determine need for additional well site easement, relocation of existing easements and need for additional easements)
- Prepare and submit SFWMD Water use Permit Renewal Application
- Perform bench-scale testing to determine proposed process feasibility and refine cost estimates
- Prepare progress reports and technical memorandums summarizing observations, testing and recommendations
- Conduct workshops and meetings with the County to review the progress reports, technical memorandums, and the Preliminary Process Design Report
SCOPE OF SERVICES (Continued)

Section 2. TASKS

Task 1 – Existing Facility and Data Evaluation
The ENGINEER will build on previous work and develop a further understanding of the process, mechanical, electrical, and operating conditions and limitations of the Green Meadows WTP. The ENGINEER, working with County management staff, will compile and review existing facility process and electrical equipment information, operational data, design drawings, studies, O&M manuals and permits. The ENGINEER will interact with County management and operations staff to determine existing facility limitations and needs.

The ENGINEER will visit the Green Meadows WTP site to visually inspect the facility, collect operations and maintenance information, and interview County operations staff. The ENGINEER will prepare a progress report that summarizes the condition and limitation of existing facilities and the need for new facilities based on County staff input. The progress report will also identify information limitations and assumptions for future work.

Assumptions

- Evaluation of existing facilities will be based upon the information visually available to the ENGINEER and on information provided by the County.
- The County will provide to the ENGINEER all available Green Meadows WTP operational data, logs, drawings, previous studies, O&M manuals and permits.
- The County operations staff will tour the Green Meadows facilities with ENGINEER.
- The ENGINEER will interview and discuss WTP operations and maintenance with County operations staff

Deliverables

- Progress Report #1 summarizing existing facility information, plant limitations, and staff-identified needs.

Task 2 – Wellfield and Water Quality Review
The ENGINEER will examine the condition (from plant records and above ground observation) of the existing wells and pumps and prepare a summary of findings. The Team will also collect water quality data from existing wells; estimate water quality from proposed new wells; review existing water use permit; prepare and submit Water Use Permit Renewal Application; identify issues associated with proposed new well sites and easements; verify proposed raw water transmission main routing and easements; prepare plans, specifications, and provide construction cost estimate for one Lower Hawthorn Observation Well, one Lower Hawthorn Test production well, and one Sandstone Test production well.
SCOPE OF SERVICES (Continued)

Existing Wellfield Review
The ENGINEER will evaluate flow, drawdown, discharge pressure, operational log and WQ data from each of the existing surficial and sandstone aquifer wells. This information will be used to determine if the possibility exists to increase pumping capacity of the existing wells or if the wells should be rehabilitated or replaced as an alternative. The ENGINEER will also analyze operational logs to identify well trends and operational issues that need to be addressed. This work will serve as an aide to the treatment process evaluation, maximization of the future wellfield expansion, and maximize utilization of the existing wellfield.

Water Quality Data Analysis and Testing
The ENGINEER will compile and evaluate the WQ data as available in County records. The ENGINEER will examine trends and identify additional WQ data needs. This work will help in the determination of applicable treatment processes.

Water Use Permit Review
The ENGINEER will review the existing water use permit to evaluate existing withdrawal limits and aquifer allocations relative to withdrawals and aquifer allocations needed for the expansion. The ENGINEER will identify water needs and determine the feasibility of expansion based on water use permit. The review will be used as supplemental information for the treatment process evaluation from a water resources sustainability and permitting aspect. Additionally, the water use permit review will identify if a permit modification will be required and if the proposed (missing) well site easement that was not originally recorded is needed.

Prepare and Submit Water Use Permit Renewal Application
Lee County Utilities has a valid water use permit (Permit No. 36-00003-W) issued by the South Florida Water Management District (SFWMD) for all of its public water supply withdrawal facilities. This permit needs to be renewed and modified to include additional demand (both current and future demands) which may involve permitting future wells to provide additional water. As development continues within Lee County, the demand is increasing, which will be met by these future wells.

Renewing this existing SFWMD permit will include the preparation of an application packet and the associated modeling and analyses, in addition to required sufficiency responses. The permit renewal is predicated by the completion of construction and testing of the test wells.

The ENGINEER will assist the County with the renewal of a SFWMD water use permit issued to Lee County Utilities. The renewal will include a requested increase in allocation and proposed additional groundwater production wells to meet the future demand. ENGINEER will calculate additional demands based on County population projections, prepare required SFWMD forms, tables, site location maps, aerial photographs, and site plans, prepare a SFWMD required water conservation plan, perform groundwater modeling of aquifer drawdowns, and review regulatory records of potential contamination sites near the future well sites. ENGINEER anticipates a cumulative impact analysis will be requested by the SFWMD. ENGINEER anticipates that SFWMD will raise concerns about wetland impacts and use of the Sandstone Aquifer and Water
Table Aquifer. ENGINEER’s fees are based on responding to three requests for additional information from the SFWMD. ENGINEER will not perform any wetland mapping or evaluation, which shall be considered outside of this scope of services. The County recognizes that water use permitting is a regulatory function and as such ENGINEER cannot guarantee issuance of any permit. It is assumed that all permit application fees will be paid by the County and additional work not described as inclusive in this proposal shall be performed on a time and-expense basis in accordance with the ENGINEER’s approved Rate Schedule.

**Easement Verification**
The ENGINEER will contact Hole Montes who recorded the existing easements, Florida Rock Properties, Inc. who is the local land owner, the LCDOH, and the County to verify well and transmission main easement requirements. The ENGINEER will evaluate the existing easements, the future Wellhead Protection Ordinance, and surrounding land to determine if FDEP rules (FAC 62-555) will be met. The ENGINEER will identify potential modifications or acquisitions of easements to meet County water needs and regulatory requirements, minimize wetland impacts, and correspond to existing land features such as roads. The easement verification will identify easements, if any, to be modified or obtained, helping to expedite future easement acquisitions, if needed.

**Prepare Legal and Description(s) for Easement(s)**
The scope and fee for this work, if needed, will be determined at a later date.

**Prepare Plans, Specifications, and Construction Cost Estimate for Test Wells**
The ENGINEER will prepare plans and specifications necessary for a water well contractor to construct one Lower Hawthorn Observation Well, one Lower Hawthorn Test production well, and one Sandstone Test production well and provide a cost for the work.

**Other Assumptions**
- The County will provide all available wellfield data including permits, easement maps, reports, WQ analyses, latest groundwater model, and well operational logs.
- The ENGINEER will conduct site investigations to determine well flow, discharge pressure, and drawdown. The County will modify well operation as needed so that the ENGINEER can collect the specific data needed to calibrate the hydraulic wellfield model.
- Water samples will be analyzed for TOC, color, UV254 absorbance, turbidity, pH, total alkalinity, sulfide, dissolved oxygen, calcium hardness, total hardness, conductivity, iron, manganese, barium, strontium, chloride, sulfate, sodium, fluoride, total nitrogen, nitrate, ammonia, silica and temperature.
- The ENGINEER will assist the County’s chosen laboratory in the collection of water samples.
- The County will pay for the water analysis which is not included in this scope of work.
- The ENGINEER will make recommendations for well and transmission main easement modifications or acquisitions.
SCOPE OF SERVICES (Continued)

Deliverables
- Progress Report #2 summarizing existing wellfield operation and water quality, potential easement modifications or acquisitions, water use permitting issues as it relates to the treatment process evaluation
- Plans, specifications, and construction cost estimate for one Lower Hawthorn Observation Well, one Lower Hawthorn Test production well, and one Sandstone Test production well
- Draft Water Use Permit Renewal Application
- Revised Water Use Permit Renewal Application

Regulatory and Process Review
The ENGINEER will summarize applicable current and pending drinking water regulations and relate these rules to current and future Green Meadows WTP operation and expansion options. A summary of the regulatory requirements will be prepared to help define treatment goals based on current and pending regulations.

The ENGINEER will conduct a review of available treatment technologies that could be used to treat current and proposed raw water to meet County finished water goals, operational constraints, and regulatory requirements. The ENGINEER will consider multiple treatment technologies, including enhanced lime softening with excess lime or coagulant, membrane softening, anion exchange, UV, and ozone. The continued use, modification and expansion of existing Green Meadows facilities will be considered as one treatment process option.

Assumptions
- The regulatory review will summarize applicable drinking water regulations including current and known pending FDEP and EPA rules related to the Green Meadows wellfield, treatment process, and downstream distribution system.
- The regulatory review will update the previous regulatory review TM dated July 9, 2004.
- The technology review will only consider proven treatment processes deemed appropriate and generally feasible for the Green Meadows facility, as required by new and existing regulations and selected by the ENGINEER based on his experience. The technology review will not seek to discover or evaluate unproven treatment processes or processes that are not applicable to this facility.

Deliverables
- Progress Report #3 summarizing regulatory requirements and technology alternatives. This report will be an update of the previously written regulatory review technical memo dated July 9, 2004.

Treatment Goal Definition Workshop
The ENGINEER will prepare a preliminary screening matrix for each of the treatment technologies and qualitatively relate them in their ability to meet current and future regulations. The ENGINEER will conduct a Workshop with the County to discuss the evaluation of the existing
facilities, regulatory and technology review results and define/develop goals for the Green Meadows WTP expansion. A “short list” of viable technologies will be developed at the Workshop.

The ENGINEER, prior to the Workshop, will:

- Prepare and deliver to the County, one week prior to the Workshop, a PowerPoint presentation that summarizes findings of previous tasks and presents the selection methods to be used at the Workshop.
- Develop goals and define fatal flaw criteria and minimum performance requirements of treatment alternatives to be used to eliminate non-viable process alternatives at the Workshop.
- Propose decision criteria representing important non-monetary benefits or other attributes of alternatives that are independent, provide differentiation, and are qualitatively important.
- Propose a weighting method for the decision criteria in order to prioritize the importance of each benefit or attribute used in the decision process, and propose a quantitative measurement or scoring methodology to rank the suitability of each alternative relative to the others.
- Prepare “straw man” criteria and quantitative measures to facilitate the Workshop process, with the intent of developing a short list of viable process alternatives for further study after the Workshop.

The ENGINEER, along with County staff at the Workshop, will:

- Finalize decision criteria representing important non-monetary benefits or other attributes of alternatives that are independent, provide differentiation, and are qualitatively important.
- Finalize the weighting of the chosen decision criteria and develop a quantitative measurement or scoring methodology to rank the suitability of each alternative relative to the others. Rank the process alternatives.
- Eliminate non-viable alternatives and develop a short list of viable process alternatives for further study after the Workshop. A maximum of five processes will be short-listed, including the continued use, modification and expansion of the existing Green Meadows facilities as one process option.

Meetings

- Treatment goal and technology review workshop: Workshop participants will brainstorm process alternatives and eliminate alternatives that do not pass the fatal flaw criteria.

Assumptions

- The Workshop will be conducted at the County’s offices.
Deliverables

- Pre-workshop: PowerPoint Treatment Goal Definition Workshop Presentation
- Post-workshop: Progress Report #4 summarizing goals and criteria development results including a list of the weighted decision criteria, and presenting a short list of treatment process alternatives agreed to for further study.

**Process Alternative Development and Cost Benefit Analysis**
The ENGINEER will further study and develop the remaining short-listed process alternatives selected at the Treatment Goal Definition Workshop. The ENGINEER will develop preliminary design criteria, proposed layouts, and opinions of probable cost for each alternative. These short-listed process alternatives will be evaluated in a multi-attribute decision model and ranked with respect to cost benefit, based on County criteria.

**Assumptions**

- Order-of-magnitude, capital and operating cost estimates for each alternative will be developed using CH2M HILL’s proprietary Parametric Cost Estimating System
- Operations and maintenance cost will be developed based on unit chemical, power, and labor costs provided by the County.

Deliverables

- Progress Report #5 and PowerPoint Process Selection Meeting Presentation summarizing the short-listed process alternatives, cost/benefit analysis, and processes recommended for further consideration, to be delivered one week prior to the Process Selection Meeting. The report and presentation will rank and summarize the short-listed process options and how they relate to regulatory requirements, cost/benefit and County goals. The presentation will briefly describe further bench testing goals.

**Process Selection Meeting**
The ENGINEER will conduct a Process Selection Meeting with the County to review the previously selected goals and decision matrices, and choose a final list of the two or three best water treatment alternatives for this project, as appropriate, for further evaluation, with the intent of ultimately selecting one optimum process for eventual design. The ENGINEER will present the costs and benefit/cost ratios for the alternatives previously selected for further study. The ENGINEER will perform a sensitivity analyses to demonstrate the decision process’ robustness.

**Meetings**
- Process Selection Meeting

**Assumptions**
- The Meeting will be conducted at the County’s offices.
SCOPE OF SERVICES (Continued)

Deliverables
- Meeting minutes, including a final list of two or three treatment process alternatives selected for bench-scale testing and the reasons used to determine this final list.

Task 4 – Bench-Scale Testing

Bench-scale testing will be used to further evaluate the two or three best treatment process selected at the Process Selection Meeting, and help determine expected finished water quality, treatment system performance, address concerns raised by the FDEP or LCHD, and refine design criteria needed for cost estimation and eventual design.

The ENGINEER will build on existing bench-scale treatability study information, including the enhanced softening testing performed by CH2M HILL. Likely testing options may include a series of bench-scale coagulation and softening jar tests, membrane flat-sheet tests, or ion exchange column tests. The bench test will ultimately determine which process can best be used to meet the treatment process objectives, and will yield preliminary design criteria for the proposed water treatment expansion and improvements. The test data will also be used to optimize the sizing of water treatment system components, and will be used as a basis for the final evaluation criteria and estimated costs.

- Raw water samples will be analyzed for chlorine demand/decay kinetics, DBP formation kinetics, TOC, color, UV254 absorbance, turbidity, pH, total alkalinity, sulfide, dissolved oxygen, calcium hardness, total hardness, conductivity, iron, manganese, barium, strontium, chloride, sulfate, sodium, fluoride, total nitrogen, nitrate, ammonia, silica and temperature.
- The bench tests will look at removal of chlorine demand, DBP precursors, color, turbidity, TOC, UV254 absorbance, conductivity, hardness and alkalinity.

Assumptions
- One sample will be taken from each of the three water sources (surficial, intermediate, and lower Hawthorn aquifers). The ENGINEER will be responsible for collection and shipping of water samples. Blending of the waters will be performed at the ENGINEER’S laboratory as needed.
- The bench tests and water quality analyses will be conducted at the CH2M HILL Applied Sciences Laboratory.
- Simultaneous testing will be performed for the selected two or three process treatment alternatives, as determined at the Process Selection Meeting.

Deliverables
- Progress Report #6 summarizing bench testing results, final process alternative ranking and recommendations.
SCOPe OF SERVICES (Continued)

- Conduct a Workshop with the County staff to present the results of the bench-scale testing and final analysis of process applicability and ranking.
- Present the monetary and non-monetary benefits evaluation of the alternatives studied in bench scale testing. Conduct a final benefits sensitivity analyses through modification of criteria weights, if necessary. Select the Green Meadows WTP expansion process design approach for future design.

Meetings

- Process Design Selection Workshop

Assumptions

- Cost opinions developed as part of this task will be order-of-magnitude (+50%/-30%) Operations and maintenance cost will be developed based on unit chemical, power, and labor costs provided by the County
- The Workshop will be conducted at the County’s offices.

Deliverables

- PowerPoint Process Design Selection Workshop Presentation

Preliminary Process Design Report

The ENGINEER will prepare a draft Preliminary Process Design Report presenting a brief summary of the progress reports from previous tasks, a summary of the selected treatment process design approach, and the projected performance of the selected treatment process in relation to existing and future anticipated regulations, and customer acceptance. The ENGINEER will deliver the draft report to Lee County Utilities (LCU) staff. The ENGINEER will revise and modify the Preliminary Process Design Report based on comments received back from the LCU staff.
SCOPE OF SERVICES (Continued)

Together with the County's project manager, the ENGINEER will contact Lee County Health Department (LCHD) staff to discuss the selected process approach and identify LCHD issues and concerns, and define methods and steps to attain LCHD approval. The ENGINEER will finalize the report to address and/or define approaches to meet LCHD issues and concerns.

PROJECT GUIDELINES AND CRITERIA

for CN-06-04 GREEN MEADOWS WATER TREATMENT PLANT EXPANSION

The COUNTY has established the following Guidelines, Criteria, Goals, Objectives, Constraints, Schedule, Budget and/or Requirements which shall serve as a guide to the CONSULTANT in performing the professional services and work to be provided pursuant to this Agreement:

(If none, enter the word "none" in the space below)

Background

Lee County (County) owns and operates the Green Meadows Water Treatment Plant (WTP), which is currently permitted to produce 9 million gallons per day (mgd) of finished water. The Green Meadows WTP removes sulfide, color, organics, hardness, and turbidity from a blend of surficial and intermediate aquifer water. Process components include degasifiers, reactor/clarifiers, rapid sand filters, a finished water clearwell, transfer pumps and chemical feed systems (lime, alum, hypochlorite, ammonia, and sulfuric acid). The finished water is transferred to the existing Airport Haul Reservoir that stores and distributes blended Green Meadows WTP and Corkscrew WTP finished water.

To meet increases in potable water demand, the County is preparing to expand the Green Meadows WTP and upgrade or replace its aging infrastructure to improve plant safety and system reliability. In addition, the WTP will also require modifications to meet recently promulgated and upcoming water quality regulations. Accordingly, the County has requested the services of the CH2M HILL team (ENGINEER) to evaluate, design, and perform services during construction for the expansion and improvements.
