

**FY 2016/17 Local Government Funding Request
Beach and Inlet Management Project Supplemental**

Project Name : Estero Island Restoration

Project Description:

The project consists of the restoration and maintenance of approximately 1.2 miles of critically eroded shoreline on the northern portion of Estero Island in Lee County. The segment is a reduction of the federally authorized 4.6 mile project (R-175 to R196.5). The reduced project extends from 400 feet north of DEP reference monument R-175 (Bowditch Point Regional Park), which is adjacent to Matanzas Pass, to approximately R-181.5.

The restoration was completed in December 2011 and included nourishment with a beachfill volume of approximately 402,805 cubic yards in conjunction with a terminal groin on the south side of Matanzas Pass. The pass is a federally maintained channel that requires maintenance dredging approximately every 3 years. The groin is 240 feet long and situated perpendicular to the shoreline with 150 feet seaward of the 2000 MHWL. The structure will anchor the beach fill and discourage material from infiltrating the federal channel. It is anticipated that nourishment will be the primary responsibility of the Town of Fort Myers Beach. Opportunities will be sought for regionalization of future projects.

The shoreline from R-176 through R-200, inclusive, has been designated as critically eroded by FDEP.

Use of Requested Program Funds: Funds requested for Fiscal Year 2016/2017 will be used for permit required post-construction physical monitoring expected to begin in FY17.
