Dear Mr. Stadtler,

Per our conversation, I have prepared a list of ATIA logging and management software functions of which, Genesis is the sole source supplier. They are as follows:

- Commercially available, off the shelf software product for use with Motorola's ATIA data stream
- 100% Windows
- Operates in Windows XP or Window 7.0 environment
- 100% GUI (Graphic User Interface) screens
- Utilizes Microsoft SQL Databases
- Stores years of data for multiple systems with no loss of data resolution
- Reports all written using Microsoft Excel
- Allows Ad Hoc reports to be run with Microsoft Access
- Allows Ad Hoc reports to be run from Microsoft Query Analyzer
- Allows reporting from several GUI, 'off the shelf' reporting packages
- Gives real-time reports and graphs
- Allows viewing system-wide activity from any location on a LAN or WAN
- Open and available database structure information

If you have any questions or need any additional information, please feel free to contact us.

Sincerely,

President
