

FORT MYERS, FL (Jan. 8, 2016) – Lee County Solid Waste produces award-winning compost from two waste streams, yard waste and biosolids, at its compost processing facility at the Lee/Hendry landfill. The organization was recognized in August 2015 by BioCycle magazine, a trade publication for the organics recycling industry, for the compost's acceptance and use within the agriculture community. The resulting [article](#) was one of BioCycle's top 10 most viewed stories for 2015.
