Some benefits are subject to limitations or visit maximums. Certain services require precertification, or prior approval of coverage. Failure to precertify for these services may lead to substantially reduced benefits or denial of coverage. Some of the benefits requiring precertification may include, but are not limited to, inpatient hospital, inpatient mental health, inpatient skilled nursing, outpatient surgery, substance abuse (detoxification, inpatient and outpatient rehabilitation). When the Member's preferred provider is coordinating care, the preferred provider will obtain the precertification. When the member utilizes a non-preferred provider, Member must obtain the precertification. Precertification requirements may vary. Depending on the plan selected, new prescription drugs not yet reviewed by our medication review committee are either available under plans with an open formulary or excluded from coverage unless a medical exception is obtained under plans that use a closed formulary.

They may also be subject to precertification or step-therapy. Non-prescription drugs and drugs in the Limitations and Exclusions section of the plan documents (received after open enrollment) are not covered, and medical exceptions are not available for them.
