

**EAGLE TECHNICAL ADVISORY COMMITTEE
Community Development/Public Works Center
1500 Monroe Street, Ft. Myers, FL
Second Floor Conf. Rm. 2C**

**TUESDAY, NOVEMBER 13, 2018
3:00 P.M.**

AGENDA

- 1) Call to Order
- 2) Approval of Minutes – October 9, 2018
- 3) Review request letter for LE-028C. Determine if territory meets definition of lost or abandoned.
- 4) Elections for Chair and Vice-chair
- 5) Meeting Dates for 2018-2019 Nesting Season
- 6) Adjournment – Next Meeting Date: December 11, 2018

In accordance with the Americans with Disabilities Act, Lee County will not discriminate against qualified individuals with disabilities in its services, programs, or activities. To request an auxiliary aid or service for effective communication or a reasonable modification to participate, contact Joan LaGuardia, (239) 533-2314, ADArequests@leegov.com or Florida Relay Service 711. Accommodation will be provided at no cost to the requestor. Requests should be made at least five business days in advance.

Draft

MINUTES REPORT EAGLE TECHNICAL ADVISORY COMMITTEE (ETAC) Tuesday, October 9, 2018

Committee Members Present:

Laura Greeno, Chair Ed Elms Betsie Hiatt

Committee Members Absent:

Cindy Bear Mike Myers

Lee County Government & Representatives Present:

Becky Sweigert, DCD Planning, Principal Environmental Planner
Pam Hendry, DCD Administration

Public Participants: None

Introduction

Ms. Greeno called the meeting to order at 3:03 PM in the second floor conference room 2C of the Community Development/Public Works Center, 1500 Monroe Street, Ft. Myers, Florida.

Approve Meeting Minutes – May 15, 2018

Ms. Greeno pointed out a typo on page 2 where Luckett should be Lockett. Ms. Hiatt pointed out on page 3 where Ms. Elms should be Mr. Elms.

Mr. Elms moved to approve the May 15, 2018 meeting minutes. Ms. Hiatt seconded. The motion passed unanimously.

Elections for Chair and Vice-Chair

Ms. Sweigert said we can hold elections until next month to have a full board since Mr. Myers and Ms. Bear couldn't be here today. Ms. Hiatt asked Ms. Greeno if she would be willing to accept nomination as chair again. Ms. Greeno said yes.

Nest Assignments

Ms. Sweigert said she currently has no nest assignment changes. She said to let her know if there's a problem getting to anything or scheduling.

Ms. Hiatt said is the nest on Esther Lane, on the west side of Stringfellow that Ms. Sweigert had her take a look at, a new nest for her? Ms. Sweigert said yes, or she could ask Ms. Bear. She said they're not building the home there right now and she understands the birds are back. The owners want to put up a no trespassing sign to keep people from disturbing them. Ms. Hiatt said she can monitor the nest.

Ms. Hiatt said the Pacosin nest was gone at the end of the season. She said someone in the golf course area that has a spotting scope watches the nest. Ms. Sweigert said

someone called her worried that the nest was gone and said they'd keep watching it. Ms. Hiatt said she hasn't seen any activity. Ms. Sweigert said they're fine with us monitoring it, and Ms. Bear can help monitor if you can't get to it.

Ms. Sweigert handed out observation sheets. She said if there're any other changes, let her know, and we'll talk about it again next month with a full board to make sure they don't have any changes.

Review Request Letter for LE-028C Coconut Point Timeshare

Ms. Sweigert said the applicant called to say they want to be here when you discuss it so they asked to defer it as one attorney is coming from Tallahassee and can't come due to Hurricane Michael. She said we can schedule it for next month. Mr. Elms asked if the general rule for abandoned nests is 3 or 5 year. Ms. Sweigert said 5 years according the County ordinance, the Federal ordinance is 4 years and the State used to be 5. Lost is 3 years, and that's lost by natural causes. Mr. Elms asked if there's a nest there now. Ms. Sweigert said no. Ms. Greeno asked if there is a nest close that they might have gone to. Ms. Sweigert said the birds ultimately moved over 10 years ago to a pine tree by the timeshare. It's Pelican Landing and their DRI requires that if there're nests they have to monitor within 1,500 feet. The pair was successful in this area and a management plan was done in 2006 for Raptor Bay communities high-rises, but for the last few years the eagles have not been utilizing the territory and we don't know where they've gone. The consultant has surveyed in a 1,500 foot radius around this area, with aerial flights and they haven't located the pair, and they will continue monitoring until the nest is determined to be abandoned. Stantec is doing the monitoring weekly. Mr. Myers regularly monitors the nest also.

Territories with Active Construction

Ms. Sweigert said Mr. Myers' and Ms. Bear's territories are the ones with construction. In Jonathan Harbour where they cut down the tree last year on Connie Mack Island there was a single-family residence being built where the tree was dead because of pine boring beetles. The owner was very concerned that the tree would fall on the house, so he obtained a permit from the Federal government to remove it. She said she got word that the birds are now building a structure in another tree in a common area at the entrance of the subdivision. It's a gated community so not a lot of traffic, but she doesn't know which tree yet. Ms. Hiatt asked if there had been a nest in the tree at the time of removal. Ms. Sweigert said just a few twigs, not a substantial nest, but the birds hang out in that territory throughout the nesting season. The Homeowners' Association tried injections for the pine boring beetles that were safe for the eagles, but, there are beautiful slash pines in the area so there's still the potential.

Mr. Elms said the Vacation Lane nest when he monitored it was surrounded by homes. Was the construction where the nest is? Ms. Sweigert said no it's around there, not on the property. The community ended up buying that property together because they wanted to save the eagles. Mr. Elms asked if they had a successful year. Ms. Sweigert said yes.

Ms. Sweigert said she didn't finish the season summary. Mike Laskowski couldn't be with us today and we've been working on creating the map for ETAC, but he's overloaded with other work. She said she didn't want to show it to ETAC without him.

Ms. Sweigert said St. Jude was not successful last year. The birds are present but not nesting and she suspects they have another nest. She gets reports about birds but no nest structure.

Meeting Dates for 2018-2019 Nesting Season

Ms. Sweigert said we'll do the normal meeting dates, 2nd Tuesday of the month, so next month it's November 13th. Ms. Greeno said she will not be available to attend next month. Ms. Hiatt said she'd put it on her calendar. Ms. Sweigert said to let her know if they need to change the date as they need to meet in November for the item that was deferred. Ms. Sweigert said we may skip December and meet in January. Ms. Greeno said she will not be able to attend January 8th. Ms. Sweigert said maybe we'll have to meet in December or change the date. She understood that two projects came in recently that are near eagle zones that would need management plans but she hasn't heard anything more.

Member Reports

Mr. Elms said the Bayshore Commons nest looks good but he didn't see the eagles. Ms. Sweigert said she got word from a resident that both adults were there. He said at the Donald/Bayshore Road he saw 2 adults around the first of October. He asked about the Lalonde nest. Ms. Sweigert said she hasn't been there but she's been talking to the contractor and they finally got a certificate of occupancy. She said she will check it out. She said at Moody she hasn't seen anything but she drove up Pondella the other night looking at the cell tower where they were seen before but didn't see anything. At the beginning of September the residents in Moody said that they saw some eagle activity in Moody, maybe the eagles were just stopping by. Mr. Elms said he will check out the Lalonde nest next week and check out Moody on a regular basis to see if there is anything. Ms. Sweigert said they show up periodically but no nest has been found yet.

Ms. Greeno asked if Ms. Sweigert got any new nest numbers from the State this year. Ms. Sweigert said not yet. She said it's not a huge priority for them with the changes that they've made, so she's trying to work with Jarrod Zimmerman who updates the FWC web site to get some of that straightened out.

ADJOURNMENT

The meeting adjourned at 3:40 p.m.

The next meeting is tentatively scheduled for November 13, 2018.

Becky,

Good morning. I hope all is well with you. I am writing on behalf of my client Hyatt Hotel and Time Share Condos (Hyatt) concerning the former eagle nest on its property. Hyatt is continuing to develop the property at Coconut Pointe. Hyatt has been monitoring the tree which was formerly the location of an eagle nest. The eagle nest was last occupied by an eagle in a failed attempt at breeding in 2013- 14. The nest showed signs of failing at that time and was subsequently taken over by owls the following season. The nest collapsed and at present nothing remains. Attached is monitoring and reporting information submitted on behalf of Hyatt to the USFWS.

As you know this former eagle nest required the imposition of several conditions on the Lee County development approval for this project. These conditions were to comply with local eagle protection ordinances which mirror the Federal protections to avoid the harm or disturbance of protected eagles. We have recently provided the USFWS with County and private monitoring of the former nest tree and requested relief from further monitoring and construction restriction requirements. In response we received the attached letter agreeing that given that the last nesting attempt was in the 2013-2014 season and the disintegration and disappearance of the nest since 2015, that monitoring and construction restrictions are no longer necessary.

Therefore given the abandonment, then loss and destruction of this eagle nest, as recognized by the USFWS, we would request on behalf of our client, agreement to allow the cessation for this development of any County requirements for eagle monitoring and construction restrictions for the protection of eagles concerning this former nest site.

If you would like to meet or have a conference call to discuss this request we will make ourselves available at your convenience. Since the eagle nesting season will resume in October we would appreciate your prompt consideration of this matter. Thank you.

Sincerely,

Kevin

Dear Ulgonda:

Reference: **Hyatt Coconut Plantation-Bald Eagle Tree LE-028C**
USFWS Take Permit No. MB218239-0; Biological Opinion No. 4-1-05-PL-9465
2017-2018 Bald Eagle Monitoring Summary Report Submittal

This letter is written to provide the U.S. Fish and Wildlife Service (USFWS) and the Florida Fish and Wildlife Conservation Commission (FWC) with a copy of the 2017-2018 bald eagle monitoring summary report regarding nest tree LE-028C, located in Lee County, Florida. Below please find a final summary of the bald eagle monitoring performed from February 21, 2017 to May 15, 2018:

On February 21, 2017, Stantec senior ecologist Tom Trettis, CSE, PWS, performed a site review of the Hyatt Coconut Plantation property to observe LE-028C. During the site visit, no nest, branches, twigs, or any remnant of a bald eagle nest occurring within the LE-028C tree was observed. During the site review, two (2) adult bald eagles were observed within the 330' buffer zone established for LE-028C. No bald eagle mating, courtship, or nest building activities were observed during the referenced site review.

On April 10 and 11, 2017, Mr. Trettis performed a bald eagle nesting season survey of habitats occurring within the LE-028C 660' eagle nest protection zone. No nest, branches, twigs, or any remnant of a bald eagle nest within the LE-028C tree was observed during the survey. No new or "alternate" bald eagle nests were observed occurring within the LE-028C protection zone. This bald eagle nesting season survey was conducted to determine whether a new or "alternate" bald eagle nest had been constructed within the LE-028C 660' protection zone. Meandering pedestrian transects were performed in suitable bald eagle nesting habitats within the LE-028C 660' protection zone. During this survey, two (2) adult bald eagles were observed within the 330' buffer zone established for LE-028C. No bald eagle mating, courtship, or nest building activities were observed during the site reviews.

During August 2017, Mr. Trettis contacted Ms. Ulgonda Kirkpatrick (USFWS) to discuss performing a helicopter fly-over of the LE-028C project area to search for bald eagle nests prior to the start of the 2017-2018 bald eagle nesting season. On September 29, 2017 a helicopter fly-over of bald eagle nest tree LE-028C, and adjacent lands, was performed by pilot Joe Frangione (London Aviation) and Mr. Trettis. The purpose of the flight was to determine whether any bald eagle nests occur within a 660' radius of the Hyatt Coconut Plantation property boundary. No bald eagle individuals or nests were observed occurring within 660' of the Hyatt Coconut Plantation property boundary during the helicopter fly-over. Additional time was spent

bald eagle nesting season. ETAC data documented the bald eagle nest had fallen out of the LE-028C tree during the 2015-2016 eagle nesting season and only small twigs and branches remained. ETAC documented no bald eagle nesting activity in LE-028C during the 2016-2017 bald eagle nesting season and no nest material was present in the tree. Based on ETAC data, and data from the Stantec 2017-2018 bald eagle nesting season monitoring, LE-028C has been inactive for a period of four (4) consecutive years.

We trust the provided information, photographs, exhibits, and documents are sufficient for staff review and approval. Please feel free to contact me if you have any questions regarding this matter.

Sincerely,

September 19, 2018

Mr. Kevin Hennessey
Lewis/Longman/Walker
100 Second Avenue South, Suite 501-S
St. Petersburg, Florida 33701

Dear Mr. Hennessey:

We have received your request regarding construction restrictions and monitoring for a Lee County, Florida, Bald Eagle nest identified as LE-028C. Bald Eagle nest LE-028C was located on property originally owned by WCI Communities Inc. for a project titled Pelican Landing Golf Resort Ventures, LLC, which was subject of a Service Biological Opinion # 4-1-05-PL-9465 under the Endangered Species Act and a subsequent Bald Eagle EAESA Permit MB 218239 under the Bald and Golden Eagle Protection Act. Your client, Hyatt Hotel Time Share Cordos, purchased this property from WCI Communities Inc. and has continued monitoring the eagle nest site. The eagle's last suspected nesting attempt, which was a failure, was in 2013-2014 and the nest has been disintegrating since 2015 and has now disappeared from the nest tree.

We have reviewed the pertinent federal regulations and the file for the Bald Eagle Take Exempted Under the Endangered Species Act (EAESA) Permit MB 218239 issued to WCI Communities Inc. on June 17, 2009, authorizing the take of Bald Eagles in accordance with the terms and conditions of the Endangered Species Act (ESA) Section 7 incidental take statement and Biological Opinion # 4-1-05-PL-9465, titled Pelican Landing Golf Resort Ventures, LLC, and dated November 16, 2004.

We have determined that Federal regulation 50 CFR 13.25 restricts transfer of permits to Eagle Take (Disturbance) permits issued under 50 CFR 22.26 permits and to EAESA incidental take permits issued under 50 CFR 22.28. Therefore, WCI Communities Inc. had no authority to transfer the EAESA permit to Hyatt with the sale of the property. Accordingly, Hyatt is under no legal obligation to carry out any conservation measures related to the 50 CFR 22.28 EAESA permit.

We have also consulted with the Service's South Florida Ecological Services Office who issued the original Biological Opinion for this project property. Their response was that the National Bald Eagle Management Guidelines (2007) state that if there's information showing a nest has not been active during the preceding 5 breeding seasons, guidelines for avoiding disturbance around the nest site may no longer be warranted. If there has been no activity in 5 years, the Service has no objection to discontinue eagle monitoring. These Guidelines can be found at <https://catalog.data.gov/dataset/national-bald-eagle-management-guidelines>.

Hyatt Coconut Point Plantation
Meeting with Lee County
Bald Eagle Nest LE-028C

Boylan Environmental Consultants were under contract with the previous property owner to monitor bald eagle nest LE-028C from 2003 – 2007. Here are there results:

- **Nest Constructed December 2003 – no nesting documented**
- **2004 - 2005 – (2) chicks confirmed**
- **2005 - 2006 – (1) Nesting failure documented**
- **2006 - 2007 – (2) chicks confirmed**

The Lee County Eagle Technical Advisory Committee (ETAC) monitored nest LE-028C from 2008 to the current date. Here are the results:

- **2008 – 2009 = (2) chicks confirmed**
- **2009 – 2010 = Unknown**
- **2010 – 2011 = (2) chicks confirmed**
- **2011 – 2012 = (2) chicks confirmed**
- **2012 – 2013 = (1) chick confirmed**
- **2013 – 2014 = Nesting failure documented**
- **2014 – 2015 = Great horned owls documented occupying the nest**
- **2015 – 2016 = No fledging observed; nest falling apart consisting of small twigs/branches.**
- **2016 – 2017 = No fledging observed; no nest material in tree.**
- **2017-2018 = No fledging observed; no nest material in tree.**

Mike Myers - 2016-2017 ETAC Monitoring Assignments

Nest No. & Local Nest Name	Date (Time) of Observation	No. of Adults	Incubate	Brood	No. of Chicks	No. Fledged	Notes
LE-002 St. Charles Harbour	2016						
	Oct. 2nd (1540)	0	N	N	0	0	The slash pine nest tree appeared healthy and a new nest structure was in place. No adult bald eagles were heard or observed in the vicinity.
	Nov. 5th (1345)	0	N	N	0	0	No adult bald eagles were heard or observed in the vicinity.
	Dec. 9th (1715)	0	N	N	0	0	No adult bald eagles were heard or observed in the vicinity. Lot owner said she has seen the pair in the area frequently.
2017							
Jan. 6th (1715)	2	N	Y	1?	0	Observed one adult bald eagle fly in with food and at least one young (approximately three weeks old) feeding. Second adult bald eagle was perched in nest tree.	
Feb. 4th (0950)	1	N	Y	1?	0	One young eagle (approximately six to seven weeks old) was perched on the edge of the nest while one adult was standing in the nest. Second adult was not observed in the area.	
Mar. 13th (1830)	0	N	N	0	1	No young or adult bald eagles were observed at the nest or in the vicinity. Assume young eagle fledged (approximately 11 to 12 weeks old), unless County staff has been notified otherwise.	
Apr. 2nd (1100)	0	N	N	0	1	No young or adult bald eagles were observed at the nest or in the vicinity. Assume young eagle successfully fledged. Monitoring is complete for this monitoring season.	
LE-028C Coconut Point Timeshare	2016						
	Oct. 4th (1130)	0	N	N	0	0	The slash pine nest tree appeared healthy. Only a few sticks remain in the tree crotch from last year's nest. No adult bald eagle activity was observed or heard in the vicinity.
	Nov. 4th (1100)	0	N	N	0	0	No adult bald eagle activity was observed or heard in the vicinity.
	Dec. 1st (0930)	0	N	N	0	0	No adult bald eagle activity was observed or heard in the vicinity.
2017							
Jan. 6th (1000)	0	N	N	0	0	No adult bald eagle activity was observed or heard in the vicinity.	
Feb. 2nd (0945)	0	N	N	0	0	No adult bald eagle activity was observed or heard in the vicinity. Monitoring is complete for this monitoring season.	
LE-034B Days Road (Patty - mobile home owner)	2016						
	Oct. 2nd (1520)	1	N	N	0	0	The old nest tree is dead with no remnants of the nest observed. One adult bald eagle was seen perched in a pine approximately 200 feet south of the old nest tree.
	Nov. 5th (1330)	0	N	N	0	0	No activity was observed at the old nest tree or in the vicinity. Patty, the mobile homeowner, said that she saw a pair earlier in the week mating in a Norfolk pine to the northeast of the mobile home.
	Dec. 9th (1650)	0	N	N	0	0	No activity was observed at the old nest tree or in the vicinity.
2017							
Jan. 6th (1700)	0	N	N	0	0	No activity was observed at the old nest tree or in the vicinity.	
Feb. 4th (0940)	0	N	N	0	0	No activity was observed at the old nest tree or in the vicinity. Monitoring is complete for this monitoring season.	
LE-038C A & W Bulb Road	2016						
	Oct. 1st (1550)	0	N	N	0	0	The Australian pine nest tree was present but dead with the upper branches gone. The nest was present but in disrepair. No adult bald eagles activity was observed at the nest or in the vicinity.
	Nov. 1st (1800)	1	N	N	0	0	One adult bald eagle was perched in the nest, which appears to have had sticks added to it. No second adult bald eagle was observed. Interesting side note: two pileated woodpeckers have excavated a large cavity in the tree six to eight feet below the nest. Heavy winds or a storm event could result in the tree breaking and the nest falling.
	Dec. 1st (1600)	1	Y	N	0	0	One adult bald eagle was sitting in the nest. It appeared to be incubating. Second adult bald eagle was not observed in the vicinity.
2017							
Jan. 4th (1225)	2	N	Y	?	0	Initially observed two adult bald eagles standing on the edge of the nest, then one flew off at 1230. The adult at the nest walked cautiously around the nest a couple of times often looking down in the nest. It eventually sat in the nest. It appeared to be brooding, but could not see young.	
Feb. 4th (0900)	1	N	Y	2	0	Observed one adult bald eagle standing in the nest with two young (approximately four to five weeks old).	
Mar. 5th (1540)	1	1	Y	2	0	Observed one adult bald eagle feeding two young (approximately nine to ten weeks old) and then it flew off. Second adult bald eagle was not seen in the area.	
Apr. 1st (1150)	0	N	N	2	0	Observed two young eagles (approximately 12 to 13 weeks old) resting in the nest. No adult bald eagles were observed in the area.	

Mike Myers - 2014-2015 ETAC Monitoring Assignments

Nest No. & Local Nest Name	Date (Time) of Observation	No. of Adults	Incubate	Brood	No. of Chicks	No. Fledged	Notes	
2014								
LE-002 St. Charles Harbour	Oct. 14th (1810)	2	N	N	0	0	Nest and nest tree appeared to be in good shape. One adult bald eagle was perched on branch next to nest. At 1815, second adult flew in and perched in nest tree near first adult.	
	Nov. 4th (1630)	0	N	N	0	0	No adult bald eagle activity was observed in the area.	
	Dec. 5th (1210)	1	Y	N	0	0	An adult bald eagle was sitting on the nest; it appeared to be incubating. Second adult bald eagle was not observed in the area.	
	2015							
	Jan. 3rd (1340)	1	N	Y	?	0	One adult bald eagle was perched on the edge of the nest and periodically looking down and poking its head down into the nest like there was young, but could not see to confirm at this point. Second adult bald eagle was not observed in the area.	
	Feb. 3rd (1230)	2	N	Y	1?	0	One adult bald eagle was at the nest feeding at least one young (four to five weeks old); it was difficult to see. Second adult bald eagle was perched in the nest tree.	
	Mar. 1st (1250)	1	N	Y	2	0	One adult bald eagle was standing in the nest feeding with one young eaglet (eight to nine weeks old) perched on the edge of the nest. Adult then flew off to the south. Although it was difficult to see, eventually observed second young branching in the nest tree. Second adult was not observed in the area.	
Mar. 27th (1650)	0	N	N	2	0	Observed two young bald eagles on the nest (11 to 12 weeks old). No adult bald eagles were observed in the area.		
Apr. 4th (1400)	0	N	N	0	2	No eagle activity was observed at the nest or in the vicinity. Assume two young eagles (12 to 13 weeks old) successfully fledged. Monitoring is complete for this nesting season.		
2014								
LE-028C Coconut Point Timeshare	Oct. 4th (1650)	0	N	N	0	0	Last year's pine nest tree appeared healthy, but the nest was very much in disrepair. No adult bald eagles were observed in the area.	
	Nov. 1st (1330)	2	N	N	0	0	Observed one adult bald eagle fly to the top of the nest tree with a fish and begin feeding. At 1340, second adult bald eagle flew in and also landed in the nest tree. There was a lot of vocalizing between the birds. The nest was still in disrepair.	
	Dec. 2nd (1205)	0	N	N	0	0	Observed no eagle activity at the nest or in the vicinity. The nest still appeared to be in disrepair.	
	2015							
	Jan. 6th (1300)	1*	Y	N	0	0	*Great horned owl was observed sitting in the nest; it appeared to be incubating. No bald eagles were observed in the area.	
	Jan. 16th (1520)	1*	Y	N	0	0	*Great horned owl was observed sitting in the nest; it appeared to be incubating. One adult bald eagle was observed flying to the north over the stormwater lake located east of the nest.	
	Jan. 30th (1445)	0*	N	Y	2	0	*Observed two great horned owl chicks sitting in the nest. Did not see adult owls in the vicinity of the nest.	
Feb. 26th (1430)	0*	N	Y	2	0	Observed two young great horned owls "branching" in the nest tree. Did not see adult owls. Did observe two adult bald eagles flying south over Coconut Road on the drive in.		
Mar. 22nd (1200)	0*	N	N	0	2*	No young owls were observed at the nest or in the nest tree. Assume young have fledged successfully. No adults were observed in the area. Monitoring is complete for this nesting season.		
2014								
LE-034B Davis Road	Oct. 14th (1825)	0	N	N	0	0	Nest tree dead and completely overgrown with vines. None of old nest observed. No eagle activity was noted in the area.	
	Nov. 4th (1640)	0	N	N	0	0	No eagle activity was noted in the area.	
	Dec. 5th (1220)	0	N	N	0	0	No eagle activity was noted in the area.	
	2015							
	Jan. 3rd (1355)	0	N	N	0	0	No eagle activity was noted in the area.	
Feb. 3rd (1215)	0	N	N	0	0	No eagle activity was noted in the area.		
Mar. 1st (1310)	0	N	N	0	0	No eagle activity was noted in the area. Monitoring complete for this nesting season.		
2014								
LE-038C A & W Bulb Road	Oct. 4th (1725)	0	N	N	0	0	The Australian pine nest tree was dead. Last year's nest was present, but in disrepair. No adult bald eagles were observed in the area.	
	Oct. 14th (1740)	0	N	N	0	0	No adult bald eagles were observed in the area.	
	Nov. 1st (1520)	0	N	N	0	0	No adult bald eagles were observed in the area.	
	Nov. 24th (0700)	1	N	N	0	0	One adult bald eagle was perched on the edge of the nest and then it flew off towards the west. Second adult bald eagle was not observed in the vicinity.	
	Dec. 5th (1155)	0	N	N	0	0	No adult bald eagles were observed in the area.	
	Dec. 6th (1600)	2	N	N	0	0	Observed both adult bald eagles perched together in a snag about 58 feet north of the nest tree. No activity was observed at the nest.	
	2015							
	Jan. 1st (1630)	1	Y	N	0	0	An adult bald eagle was sitting on the nest; it appeared to be incubating. Second adult bald eagle was not observed in the area.	
	Feb. 1st (1115)	1	N	Y	1?	0	One adult bald eagle was observed preening while perched on the edge of the nest. At least one eaglet's head (approximately one to two weeks old) would periodically pop up above the rim of the nest. Second adult bald eagle was not seen in the area.	
	Feb. 28th (1645)	1	N	Y	1?	0	It was raining fairly steady and one adult bald eagle was standing in the nest with wing partially outstretched as though trying to protect young, but could not see young. Second adult bald eagle was not seen in the area.	
Mar. 1st (1145)	1	N	Y	1	0	One adult bald eagle briefly fed one young eagle (four to five weeks old) and then flew off to the north. Second adult bald eagle was not seen in the area.		
Mar. 27th (1900)	2	N	Y	1	0	Two adult bald eagles were observed: one perched atop the nest tree and the other perched in a snag 50± feet to the north. One young eagle (seven to eight weeks old) was lying down in the nest.		
Apr. 4th (1415)	0	N	Y	1	0	One young eagle (eight to nine weeks old) was perched on the edge of the nest. No adult bald eagles were seen in the vicinity.		
May 11th (1800)	0	N	N	0	1	No eagle activity was observed at the nest or in the area. Assume young (11 to 12 weeks old) successfully fledged. Monitoring is complete for this nesting season.		

Mike Myers - 2012-2013 ETAC Monitoring Assignments

Nest No. & Local Nest Name	Date (Time) of Observation	No. of Adults	Incubate	Brood	No. of Chicks	No. Fledged	Notes
LE-002 St. Charles Harbour	2012						
	Oct. 6th (1415)	0	N	N	0	0	Last year's nest only partially intact in dead slash pine. No adult bald eagles observed at nest tree or in vicinity.
	Nov. 3rd (1630)	0	N	N	0	0	No new nest material appears to have been added to the nest. No adult bald eagles observed at nest tree or in vicinity.
	Nov. 13th (1720)	0	N	N	0	0	No adult bald eagles observed at nest tree or in vicinity.
	Dec. 9th (1625)	0	N	N	0	0	No adult bald eagles observed at nest tree or in vicinity.
	2013						
	Jan. 1st (1500)	0	N	N	0	0	No adult bald eagles observed at nest tree or in vicinity; however, an eagle was heard calling.
	Feb. 9th (1250)	0	N	N	0	0	No adult bald eagles observed at nest tree or in vicinity.
	Mar. 3rd (1630)	0	N	N	0	0	No adult bald eagles observed at nest tree or in vicinity.
	April 9th (1310)	0	N	N	0	0	No adult bald eagles observed at nest tree or in vicinity. Monitoring complete for this nesting season.
LE-028C Coconut Point Timeshare	2012						
	Oct. 6th (1600)	0	N	N	0	0	Last year's nest intact in slash pine. No adult bald eagles observed at nest tree or in vicinity.
	Oct. 30th (1000)	2	Y	N	0	0	Two adult bald eagles observed at nest. One appeared to be incubating and the other was perched on the edge of the nest.
	Nov. 13th (1300)	1	Y	N	0	0	One adult bald eagle sitting on nest; appeared to be incubating. Second adult bald eagle not observed in area.
	Nov. 23rd (1200)	1	Y	N	0	0	One adult bald eagle sitting on nest; appeared to be incubating. Second adult bald eagle not observed in area.
	Dec. 7th (1760)	1	Y	N	0	0	One adult bald eagle sitting on nest; appeared to be incubating. Second adult bald eagle not observed in area.
	Dec. 20th (1530)	1	N	N	1	0	One adult bald eagle perched on side of nest. One young eagle observed (approximately 1-2 weeks old). Second adult not seen in area.
	2013						
	Jan. 6th (1620)	1	N	N	1	0	One adult bald eagle feeding one young (approximately 4 weeks old). Second adult bald eagle not observed in area.
	Jan. 25th (1800)	2	N	N	1	0	Two adult bald eagles perched in top of nest tree. One young observed resting in nest (7-8 weeks old).
Feb. 5th (1630)	1	N	N	1	0	One adult bald eagle perched on top of nest tree. One young observed walking around nest (8-9 weeks old). Second adult bald eagle not observed in area.	
Feb. 21st (1150)	0	N	N	1	0	One young bald eagle perched on edge of nest (10+ weeks old). No adult bald eagles observed in the vicinity.	
Mar. 3rd (1330)	2	N	N	1	0	One young bald eagle being fed by adult in nest. Second adult bald eagle perched in nest tree. Also observed one immature bald eagle fly overhead.	
Mar. 12th (1645)	1	N	N	1	0	One adult bald eagle feeding itself in nest. One young bald eagle (13+ weeks old) branching in nest tree. Second adult bald eagle not seen in area.	
Mar. 15th (1400)	0	N	N	1	1	Heard and observed one young bald eagle briefly fly to and perch in nest tree and then fly to another tree about 300+ feet to the north. The young eagle has successfully fledged. Did not observe any adults in the vicinity. Monitoring complete for this nesting season.	
LE-034B Davis Road	2012						
	Oct. 6th (1425)	0	N	N	0	0	Old slash pine nest tree dead and heavily overgrown with vines. Only a few sticks from nest remain. No adult bald eagles observed at nest tree or in vicinity.
	Nov. 3rd (1645)	0	N	N	0	0	No adult bald eagles observed at nest tree or in vicinity.
	Nov. 13th (1730)	0	N	N	0	0	No adult bald eagles observed at nest tree or in vicinity.
	Dec. 9th (1630)	0	N	N	0	0	No adult bald eagles observed at nest tree or in vicinity.
	2013						
	Jan. 1st (1510)	0	N	N	0	0	No adult bald eagles observed at nest tree or in vicinity.
	Feb. 9th (1300)	0	N	N	0	0	No adult bald eagles observed at nest tree or in vicinity.
	Mar. 3rd (1620)	0	N	N	0	0	No adult bald eagles observed at nest tree or in vicinity.
	April 9th (1325)	0	N	N	0	0	No adult bald eagles observed at nest tree or in vicinity. Monitoring complete for this nesting season.
LE-038C A & W Bulb Road	2012						
	Oct. 4th (1710)	1	N	N	0	0	Last year's nest intact in dead Australian pine tree. One adult bald eagle observed perched and vocalizing from Australian pine 100+ feet north of nest tree. Second adult bald eagle not observed in vicinity.
	Oct. 31st (1225)	0	N	N	0	0	No adult bald eagles observed at nest or in vicinity. However, new sticks appear to have been added to the nest.
	Nov. 13th (1630)	2	N	N	0	0	One adult bald eagle perched atop nest tree. Other adult bald eagle perched in Australian pine 100 feet northwest of nest tree.
	Nov. 23rd (1100)	0	N	N	0	0	No adult bald eagles observed at nest or in vicinity.
	Nov. 28th (1730)	2	N	N	0	0	Two adult bald eagles perched in snag 100+ feet north of nest tree.
	Dec. 2nd (0935)	2	N	N	0	0	One adult eagle perched on edge of nest. Second adult perched in Australian Pine 100+ feet to north.
	Dec. 9th (1600)	1	N	N	0	0	No activity observed at nest but one adult bald eagle perched in snag 100+ feet to the north. Second adult not observed in area.
	Dec. 12th (1435)	1	Y	N	0	0	One adult bald eagle sitting on nest; appeared to be incubating. Second adult bald eagle not observed at nest or in vicinity.
	Dec. 31st (1640)	1	Y	N	0	0	One adult bald eagle sitting on nest; appeared to be incubating. Second adult bald eagle not observed at nest or in vicinity.
	2013						
	Jan. 1st (1430)	2	Y	N	0	0	One adult bald eagle sitting on nest incubating. Second adult bald eagle perched at the top of nest tree.
	Jan. 5th (1300)	1	Y	N	0	0	One adult bald eagle sitting on nest; appeared to be incubating. Second adult bald eagle not observed at nest or in vicinity.
	Jan. 11th (1235)	1	Y	N	0	0	One adult bald eagle sitting on nest; appeared to be incubating. Second adult bald eagle not observed at nest or in vicinity.
	Jan. 26th (1350)	1	N	Y	?	0	One adult bald eagle sitting on nest; likely brooding. Second adult bald eagle not observed at nest or in vicinity.
	Feb. 5th (1750)	2	N	Y	?	0	One adult bald eagle standing in nest, often looking and poking its bill downward into nest. Appears to be tending to young. Second adult bald eagle perched in snag 100+ feet northwest of nest tree.
	Feb. 17th (1515)	2	N	N	1	0	One young bald eagle observed in nest (2-3+ weeks old). One adult bald eagle flew in and perched in nest tree. A few minutes later the other adult flew to nest (without food), perched on edge of nest for a couple of minutes, then flew off.
	Feb. 24th (1730)	2	N	N	1	0	One young bald eagle sitting in nest (3-4+ weeks old). Two adult bald eagles perched in snag 100+ feet to northwest.
	Mar. 3rd (1700)	2	N	N	0	0	Observed two adult bald eagles perched in snag 100+ feet to the northwest. Did not observe the young bald eagles in the nest.
	Mar. 4th						Notified via e-mail by Matt and others that eaglet had fallen out of nest and was found dead in school yard. FWCC was notified and picked up the eaglet.
Mar. 7th (1750)	1	N	N	0	0	No activity observed at nest. One adult bald eagle perched in snag 100+ feet to the northwest. Met Robert Phelan, P.E. with the County while on-site.	
Mar. 23rd (1630)	0	N	N	0	0	No bald eagle activity observed at nest or in vicinity.	
April 9th (1825)	0	N	N	0	0	No bald eagle activity observed at nest or in vicinity.	
April 25th (1820)	0	N	N	0	0	No bald eagle activity observed at nest or in vicinity.	
May 5th (1100)	0	N	N	0	0	No bald eagle activity observed at nest or in vicinity. Monitoring complete for this nesting season.
