

UNDERGROUND GAS LINES/TANK AFFIDAVIT

Permit Application # _____
Property Address: _____
Contractor: _____ Phone #: _____
OWNER NAME: _____

This affidavit is for gas lines & underground tanks only. Tanks have been anchored per N.F.P.A. 58 (Sec. 6.8.1.6) and installed with correct anode bag quantity and placement per manufacturer specifications. Lines have been buried per N.F.P.A. 58 (Sec. 6.11.3.12). This does not constitute an approval of the location of installation of above ground equipment or structures. All mechanical equipment and structures must meet primary structural setbacks. The site plan submitted depicts all existing easements.

All above ground propane tanks must be tied down according to the Architect/Engineer instructions that are submitted with the permit application. Concrete pad design and construction must also match the instruction provided at the time of application submittal. (Any underground tanks submitted in a "V" zone or "Coastal A" zone must have Architect/Engineer instructions for the underground pad.)

Final 208 (Gas Line) and 209 (Gas Tank) inspections will be signed off after affidavit has been received by Plumbing inspector and performed a site visual for tank placement and this affidavit has been returned to Lee County inspections at inspections@leegov.com

Verification Pursuant to §92.525, Florida Statutes:

**Under the penalties of perjury, I declare that I have read the foregoing
Underground Gas Lines/Tank Cut Affidavit and that the facts stated in it are true.**
