Fire & EMS Safety Plan

*The special detail FMBFD transport unit is being retained until 11:00 p.m. to meet the anticipated increase in call volume generated from the event. The Life Safety Division of the FMBFD will be present to inspect the event for compliance to the plan approved during the permitting process.

MERT

The Lee County fire departments work collaboratively to provide fire and EMS protection of the waterways of Lee County. Several departments maintain fire and rescue boats to respond to emergencies on the water. The MERT Team has met with the producers of Roar Offshore and have a plan to protect the racers, participants and spectators during the Saturday race event and activities.

The producers of Roar Offshore understand that this plan may require revisions as a result of each permit review process.

Mitigation plan for Severe Weather

Severe weather in Fort Myers Beach includes tropical storms, hurricanes, and thunder storms.

The event is being held during hurricane season. Due to the nature of the event Roar Offshore Powerboat National Championship (an outdoor activity) the event management is continually monitoring weather conditions. In the event of approaching severe weather the event producers/management will advise attendees they should seek shelter and/or close the event.

Lightning or dangerous conditions prior to the event – Seek safe shelter at an establishment. Roar Offshore will observe the National Weather Service 30/30 Lightning Policy (within 30 seconds you hear thunder after lightning strike is observed you wait 30 minutes). A minimum 30-minute warm-up and check in will be held prior to the start of the race. RACE CONTROL will make final call as to the start of the race based on weather and course safety, which includes all watercraft, (safety, turns, and officials) being in place.

Lightning or dangerous conditions during the event – As determined by RACE CONTROL the course will be cleared. A "CLEAR THE COURSE" call will be made with a series of 3 long blasts on air horns or whistles, waving of orange/red flags as well as announced over all radios from the RACE Control. Racer and patrol boats will then proceed to the nearest safe location for docking to get off of the water and into a safe structure. Public will be notified of weather through Roar Offshore's live feed during the event.

Mitigation plan for civil or other disturbances

The following strategy is suggested to minimize the effects of Roar Offshore National Championships during a civil disturbance: Contact and rely solely on the guidance of first responders, Fire and Police personnel.

Mitigation plan for hazardous material incidents on and off the water.

On water plan establishes that Fast Response Towing & Salvage will operate in the event of a hazardous materials incident, oil spill, or other release on water. They are trained and qualified to minimize the exposure to or damage from materials that could adversely impact human health and safety or the environment. All Fast Response vessels carry spill containment kits.

Please see attached contract.

Point of Contact: Fast Response John Mutton Cell: 954-270-6937 email: bigtunatransport@aol.com

. EMERGENCY SPILLS on land: While petroleum spills may be just as hazardous to individuals and/or the environment as other chemical spills, additional considerations must be taken into account. An emergency spillage of a petroleum product (oil, gasoline, fuel oil, etc.) poses as an immediate threat of fire or explosion (based upon the type/quantity of spilled materials and location to nearby equipment/processes). All emergency petroleum spills should be reported to The Fort Myers Beach Fire Department immediately by calling 911. When reporting, be specific about the nature of the involved material and exact location. The individual discovering the spill should vacate the affected area at once. If possible, wait at a safe distance for the arrival of Fort Myers Beach Fire Department. Anyone who may be contaminated by the spill is to avoid contact with others as much as possible. Remain in the vicinity and await the arrival of medical/safety personnel.

Questions from public on access:

Event staff and volunteers encountering the general public demanding access to the event site without paying are instructed to explain the event is fully permitted by the town, county and state, which provides us the ability to block off, secure and charge an admission fee. Event staff and volunteers are instructed to "NOT" be confrontational and immediately contact event management, who are available by cell phone or two way radio.

Medical Emergency mitigation plan

MERT is scheduled to be on-site during the event.

Event staff is trained to immediately notify MERT and/or call 911 in case of emergency.
