An Electric Trade permit is required when any new electrical circuits are added, extended or service is changed.

A design professional is required to install, repair, upgrade or relocate electrical boxes or wiring valued at more than \$125,000, or an aggregate service capacity of 600 amperes (240 volts) or more on a residential electrical system, or 800 amperes (240 volts) or more on a commercial or industrial electrical system.

If the project is for phone and data, audio, access control, nurse call or other low-voltage application, a Low Voltage Permit may be used.

Each permit use may require multiple work activities; therefore, refer to the applicable codes, which may include but are not limited to:

- National Electric Code (NFPA 70) (2017)
- [Florida Building Code](#) 7th Edition (2020)
- Florida Energy Conservation
- [Florida Statute Sections](#) 553.73 and Sec. 553.794
