**Initiated by:** Heather Gonzalez

**Recommended by:** Kelly Mutz; Senior Traffic Engineering Technician

**Studies on file:** Based on the area street network and field observations the higher volume street is June Avenue N. June Avenue N functions as the main road, with 48<sup>th</sup> Street W thru 50<sup>th</sup> Street W operating as local minor streets. There is no apparent rationale based on existing traffic conditions and street network for June Avenue N traffic to stop at each of the identified minor side streets. 48<sup>th</sup> Street W thru 50<sup>th</sup> Street W terminate to the east of June Avenue W at a canal. Reversing the stop controls will bring the intersections controls into compliance with recommended MUTCD guidelines.
