Informed Health® Line

Audio health library 

Turning promise into practice™

audio health library 

be informed
about your health

When you have instant access to the health information you need, you tend to make informed health decisions. Try Informed Health Line and its audio health library.

Forget your library card. Aetna members can simply pick up their phone to “look up” the health information they need.

Through Aetna’s Informed Health Line, members now have **24-hour access** to an audio health library — equipped with information on more than **2,000 health topics**, and accessible on demand via any touch tone phone.

Topics are available in both English and Spanish.

Whether you need information for an upcoming office visit, medical test or surgery, or if you simply want to learn more about a particular health issue or condition, simply dial in to Informed Health Line.

The prompts will direct you through the library to the information you’re looking for. If more information is needed, the system will give you the opportunity to directly connect to a registered nurse, the heart of Informed Health Line.

Take charge of your health; get the information you need.

IMPORTANT: Informed Health Line nurses cannot diagnose, prescribe or give medical advice. Contact your physician first with any questions or concerns regarding your health care needs. The Informed health Line service is provided by Informed Health, Inc., under agreement with your health plan. Informed Health is a registered trademark of Aetna.

Not all topics discussed within the audio health service are covered expenses under your individual insurance plan.
