

Thursday, July 1. Tropical Storm Elsa

UPDATE FOR MEDIA FROM LEE COUNTY – Tropical Storm Elsa

Lee County, its Emergency Operations-Public Safety team and our county partners are monitoring Tropical Storm Elsa. It is too early to determine exact impacts to Florida, but we encourage residents to take time now to be prepared. Response and recovery involves the entire community and is everyone's responsibility. You and your family can do your part by buying supplies, having a plan, downloading the LeePrepares App and signing up for Alert Lee if you've not already done so. Visit www.AlertLee.com.

Residents can also visit www.leegov.com/hurricane and take a moment this weekend to watch short instructional videos that cover everything from making your plan ahead of a storm to the recovery process that follows. With quizzes and a printable Certificate of Completion, these videos are an informative way to learn from our Emergency Management experts during the holiday weekend.

Further updates to media are expected Friday.
