Dear Valued Customer,

For the past 13 months we have been pleased to have the opportunity to facilitate and manage the proper and responsible recycling of your E-Waste needs.

Due to the increasing cost of both E-Waste processing and the logistics associated with the correct and responsible processing of CRT/LCD related items we are requesting a modest 10% increase to the current charge of our recycling services.

The new charge starting November 1<sup>st</sup> 2016 will be 4675.00 per tractor trailer load designated for processing.

We truly value your business and look forward to delivering on all of your expectations while servicing your E-Waste Recycling needs.

Sincerely,

NWI RECYCLING INC.
