2.4 Lee County reserves the right, at the County's discretion, to award to a primary and secondary vendor.

If the primary vendor cannot perform the work in a timely manner the County reserves the right to go to the secondary vendor at any time.

3. PRICE ESCALATION/DE-ESCALATION

3.1 Offers are submitted with the understanding that no price increases will be authorized for 365 calendar days after the effective date of the contract. Upward price adjustments may be permitted only at the end of this period and only where verified to the satisfaction of the Division of Procurement as provided herein. **However, "across the board" price decreases are subject to implementation at any time and shall be immediately conveyed to the County.**

The awarded vendor(s) shall not give less than 30 days advance written notice of a price increase to the Division of Procurement. Any approved price change will be effective only at the beginning of the calendar month following the end of the full 30-day notification period. Failure by the vendor to supply the aforementioned verification with the request for price increase will result in delay of the effective date of such increase. The Division of Procurement may make such verification as deemed adequate. However, an increase, which the Division of Procurement determines is excessive, regardless of any documentation supplied by the vendor, may be cause for cancellation of the contract by the Division of Procurement. The Division of Procurement will notify using agencies and vendor in writing of the effective date of any increase, which is approved. However, the Vendor shall fill all purchase orders received prior to the effective date of the price adjustment at the old contract prices. The Vendor is further advised that price decreases that affect the cost of materials, labor, and transportation are required to be passed on to the County immediately. Failure to do so will result in action to recoup such amounts.

5.4 For copper installations:

5.5 Category 6A UTP cabling may be used for 10BaseT, 100BaseT, or Gigabit Ethernet as well as all voice applications. Lee County requires that all pairs of all installed UTP wiring is tested for full compliance with Category 6a specifications regardless of intended use. Contractors are required to provide documentation of test results for all conductor pairs of each cable. All test results will be provided in electronic format with appropriated viewer software.

5.6 After installation all cables must be tested for Category 3 5E or 6A compliance, based on the service being performed. Tests must be run from the cross-connect termination through the installed communications outlet at the workspace end of the cable.

5.7 All four pairs shall meet or exceed the following measured specifications. Any cable not meeting or exceeding the following shall be inspected for anomalies, and re-terminated or replaced if necessary to ensure compliance.

5.8 Cables shall be line mapped to verify pin-to-pin continuity, transmission levels, lack of opens, shorts, and/or polarity reversals.

5.9 The characteristic cable impedance shall be 100 Ohms +- 15% at 1 MHz to 100 MHz.

5.10 Mutual capacitance of any pair at 1 kHz shall not exceed 17nF per 1000 ft.

5.11 Ambient noise shall be less than or equal to 40 dB, (247 MV).

5.12 Signal to noise ratio shall be greater than or equal to 7 dB.

5.13 Length shall be less than or equal to 90 meters, (295 feet).

5.14 And compliance to the following specifications:

ANSI/TIA/EIA-568-B.

For fiber installations all single mode and multi mode fiber strands shall be tested end-to-end for bi-directional attenuation, 850 nm/1300 nm for multimode and 1310 nm/1550 nm for singlemode fibers. Tests should be conducted in compliance with EIA/TIA-526-14 or OFSTP 14, Method B, according to the manufacturer’s instructions for the test set being utilized.

Tests should ensure that the measured link loss for each strand does not exceed the “worst case” allowable loss defined as the sum of the connector loss (based on the number of mated connector pairs at the EIA/TIA-568 B maximum allowable loss of 0.75 dB per mated pair) and the optical loss.

After the cable is in place it shall be tested in the following manner:

- a. After termination, each fiber shall be tested with an OTDR for length, transmission anomalies, and end-to-end attenuation. Results are to be recorded and supplied to ITG in the form of hard-copy printouts, photographs of screen traces, and soft copies with appropriated viewer software.
- b. After termination and bulkhead mounting, each terminated fiber is to be tested for end-to-end loss with a power meter/light source. As above, results are to be recorded and supplied to ITG.
- c. The maximum allowable attenuation for any splice or termination is 0.3 dB.

The contractor shall review all end faces of field terminated connectors with a fiber inspection scope following the final polish. Connector end faces with hackles, scratches, cracks, chips and or surface pitting shall be rejected and repolished or replaced if repolishing will not remove the end face surface defects. The recommended minimum viewing magnifications for connector ends are 200X for multimode fiber and 400X for singlemode fiber.

All tests results should also include a copy of the test equipment calibration certificate.

All cabling runs, copper and fiber, should be installed following ANSI standards, EIA/TIA 568-B, Engineering Committee TR-42 published standards, NEC, Florida Building Code, Lee County Codes, for any installation.”

All wiring runs will be documented at termination points and other intermediary locations, with all necessary information, including far-end punch blocks or patch panels and the station locations.

Documentation will encompass: digital pictures of front, back, sides of the punch blocks and patch panels, fire wall penetrations and “as built” floor diagrams showing cabling paths on ceiling and through floors.

Complete documentation of all cabling and test results will be displayed at IDF room and delivered to the Lee County IT department at the completion of the project.

The vendor will fire caulk all sleeves and penetration required for cable installation. Vendor will provide sleeves with end bushings for project as needed. All fire walls require penetrations to be sleeved. Size of sleeves shall be determined during walkthrough based on quantities of cables needed for serviced area. Sleeves and conduit fill ratio should follow ANSI standards, EIA/TIA 568-B, Engineering Committee TR-42 published standards, NEC, Florida Building Code, Lee County Codes, to account for future growth. Digital photographs of the firewall penetration, with the technician's label, are to be included as part of the as built documents provided to Lee County ITG upon completion of the job.

Lee County ITG will provide, when available, the floor plan of the site where the work will be performed. The vendor will provide a proposed cabling path before the work is initiated. These documents must be included the Statement of Work. An updated floor plan will be created by the technician and project acceptance will be done based on the "as built" documents.

For fiber wiring services, only Fusion Splicing will be accepted. Lee County ITG reserves the right to accept different splicing methods through a formal written communication/documentation process.

All fiber terminations will be required to be inspected using a fiber connection scope to assure the connector tip is free of dirt, scratches or contaminant particles.

All terminations are required to be cleaned. A digital picture showing the status of the connector tip should be generated for every connector. All pictures will be delivered in a CD or DVD on the *.jpeg format to ITG.

Factory pre-terminated cables, for both fiber and copper installations, will be preferred for Rack to Rack installation.

All installation will be performed as a True Cross Connected Environment. This means that no direct cabling from a patch panel will go into equipment.

The vendor will cable the wall jacks to patch panel and will install a patch panel with cabling for the equipment.

This requirement is valid for both copper and fiber wiring services.

Lee County reserves the right to change any of these requirements through formal communication/documentation as needed.
