Dear Valued Customer,

Linde appreciates your business and looks forward to continuing to serve your medical gas requirements in the coming years. Safety, quality and reliability for our customers remain top priorities. Linde maintains a strong network of plants, distribution equipment, cylinder supply, and bulk medical supply systems, in order to continue to serve you with a focus on those values.

Linde continues on its journey of productivity improvement, cutting cost and waste, improving operating efficiency, and enhancing supply network reliability. While these efficiency gains help minimize costs, they do not eliminate increases in all areas. The capital requirements for these upgrades are significant. In addition, labor, compliance, and costs for raw materials such as power continue to rise as a result of federal and state regulations, thus requiring investments in renewable energy sources and reduced carbon emissions.

In order to provide a strong foundation for our customers into the future, Linde will continue to invest in our North American business to help drive safety, reliability, and continuous improvements in your customer experience. To support continued investment in reliability and to cover cost increases, Linde will implement a price adjustment per the terms and conditions of our agreement. The new pricing will become effective as indicated.

Other Changes That May Affect Your Pricing:

Effective January 1st, 2018, each of your Ship To locations are now assigned to one of four tiers based on its unique distance from the local Linde servicing facility. The tiers are defined in the following zones (in miles): 0 to 30, 31 to 60, 61 to 90, and 91+. On the attached letter, will see the related pricing for each of these tiers.

Please note, if you do not have Ship To locations in all four tiers, pricing may be omitted for those zones. These changes do not affect your regular delivery schedule. To obtain information regarding which Ship To locations have been assigned to each tier, please contact your medical sales representative.

Should you have any questions, please feel free to contact your medical sales representative Tierra Smith or call us at (866) 543-3427. Thank you for your support and we appreciate the opportunity to provide valued solutions and service excellence.

Sincerely,

Brian Novak

Dear Valued Customer,

Linde appreciates your business and looks forward to continuing to serve your medical gas requirements in the coming years. Safety, quality and reliability for our customers remain top priorities. Linde maintains a strong network of plants, distribution equipment, cylinder supply, and bulk medical supply systems, in order to continue to serve you with a focus on those values.

Linde continues on its journey of productivity improvement, cutting cost and waste, improving operating efficiency, and enhancing supply network reliability. While these efficiency gains help minimize costs, they do not eliminate increases in all areas. The capital requirements for these upgrades are significant. In addition, labor, compliance, and costs for raw materials such as power continue to rise as a result of federal and state regulations, thus requiring investments in renewable energy sources and reduced carbon emissions.

In order to provide a strong foundation for our customers into the future, Linde will continue to invest in our North American business to help drive safety, reliability, and continuous improvements in your customer experience. To support continued investment in reliability and to cover cost increases, Linde will implement a price adjustment per the terms and conditions of our agreement. The new pricing will become effective as indicated.

Other Changes That May Affect Your Pricing:

Effective January 1st, 2018, each of your Ship To locations are now assigned to one of four tiers based on its unique distance from the local Linde servicing facility. The tiers are defined in the following zones (in miles): 0 to 30, 31 to 60, 61 to 90, and 91+. On the attached letter, will see the related pricing for each of these tiers.

Please note, if you do not have Ship To locations in all four tiers, pricing may be omitted for those zones. These changes do not affect your regular delivery schedule. To obtain information regarding which Ship To locations have been assigned to each tier, please contact your medical sales representative.

Should you have any questions, please feel free to contact your medical sales representative Tierra Smith or call us at (866) 543-3427. Thank you for your support and we appreciate the opportunity to provide valued solutions and service excellence.

Sincerely,

Brian Novak

Dear Valued Customer,

Linde appreciates your business and looks forward to continuing to serve your medical gas requirements in the coming years. Safety, quality and reliability for our customers remain top priorities. Linde maintains a strong network of plants, distribution equipment, cylinder supply, and bulk medical supply systems, in order to continue to serve you with a focus on those values.

Linde continues on its journey of productivity improvement, cutting cost and waste, improving operating efficiency, and enhancing supply network reliability. While these efficiency gains help minimize costs, they do not eliminate increases in all areas. The capital requirements for these upgrades are significant. In addition, labor, compliance, and costs for raw materials such as power continue to rise as a result of federal and state regulations, thus requiring investments in renewable energy sources and reduced carbon emissions.

In order to provide a strong foundation for our customers into the future, Linde will continue to invest in our North American business to help drive safety, reliability, and continuous improvements in your customer experience. To support continued investment in reliability and to cover cost increases, Linde will implement a price adjustment per the terms and conditions of our agreement. The new pricing will become effective as indicated.

Other Changes That May Affect Your Pricing:

Effective January 1st, 2018, each of your Ship To locations are now assigned to one of four tiers based on its unique distance from the local Linde servicing facility. The tiers are defined in the following zones (in miles): 0 to 30, 31 to 60, 61 to 90, and 91+. On the attached letter, will see the related pricing for each of these tiers.

Please note, if you do not have Ship To locations in all four tiers, pricing may be omitted for those zones. These changes do not affect your regular delivery schedule. To obtain information regarding which Ship To locations have been assigned to each tier, please contact your medical sales representative.

Should you have any questions, please feel free to contact your medical sales representative Tierra Smith or call us at (866) 543-3427. Thank you for your support and we appreciate the opportunity to provide valued solutions and service excellence.

Sincerely,

Brian Novak
