

AGENDA ITEM REPORT

DATE: December 15, 2020
DEPARTMENT: Transportation
REQUESTER: Randy Cerchie
TITLE: Approve Piggyback of FDOT Contract for Purchases of Approved Traffic Equipment

I. MOTION REQUESTED

Approve Piggyback No. PB210027BAG, to utilize pricing on the Florida Department of Transportation Solicitation No. DOT-ITB-20-9034-GH FDOT APL Traffic Equipment from the pool of approved vendors, for the purchase of approved product list traffic equipment on an as needed basis, as approved in the departments' annual adopted budgets through the contract expiration date of November 3, 2022, and any renewals or extensions approved by the Florida Department of Transportation. Individual purchases in excess of \$100,000.00 will be brought to the Board for approval.

II. ITEM SUMMARY

Approves a piggyback of the Florida Department of Transportation's (FDOT) contract for State approved traffic equipment on an as needed basis, as approved in the department's annual adopted budgets, through the contract expiration date of November 3, 2022 and any renewals or extensions approved by FDOT. FDOT maintains an Approved Products List (APL), which specifies products that are authorized for use on State owned facilities. FDOT has an extensive testing program managed out of their Transportation Engineering Research Laboratory (TERL), and all traffic equipment that passes the rigorous testing is placed on the APL for use on State owned roadways. This list contains hundreds of transportation related devices that FDOT has competitively procured. The annual estimated amount that will be spent is \$850,000 and includes projects funded in the Major Maintenance Program to replace outdated signal equipment. Individual expenditures in excess of \$100,000 will be brought to the Board for approval, and a market analysis shall be completed.

III. BACKGROUND AND IMPLICATIONS OF ACTION

A) Board Action and Other History

Lee County Department of Transportation submitted a request to Procurement Management to implement a piggyback for the purchase of traffic materials, parts, and equipment utilized in repairing signal cabinets, controllers, and other traffic devices throughout the County. The Florida Department of Transportation (FDOT) solicited DOT-ITB-20-9034-GH through a competitive procurement process following State procurement regulations.

FDOT maintains an Approved Products List (APL) which specifies products that are authorized for use on State owned facilities. FDOT has an extensive testing program managed out of their Transportation Engineering Research Laboratory (TERL), and all traffic equipment that passes the rigorous testing is placed on the APL for use on State owned roadways. This list contains hundreds of transportation related devices that FDOT has competitively procured.

Approval of this piggyback will allow the County to purchase traffic equipment that has passed the FDOT testing standards at prices that have been competitively vetted through the State's procurement process. In an effort to maintain a standardization of equipment throughout Lee County, the County primarily uses traffic equipment that has been tested and vetted through the FDOT APL approval process since the County does not have the resources to employ a testing lab similar to TERL.

The County maintains all traffic signals within Lee County through interlocal agreements with FDOT, the City of Fort Myers, the City of Cape Coral, the City of Bonita Springs, Florida Gulf Coast University, and the Village of Estero. Through this piggyback opportunity, the County ensures that traffic devices and related equipment that are installed at these traffic signals meet State and Federal standards for safety and reliability.
