The description of services intended for purchase from a sole source is posted in accordance with section 3.9, Procurement Ordinance 23-21, and will be posted for a minimum of 15 business days.

Commodity or Service Required:
Avista Technologies Vitec 3000 Scale Inhibitor

Description:
Lee County Utilities is seeking to execute a single source purchase for Avista Technologies Vitec 3000 Scale Inhibitor for the protection of membranes at the Pinewoods, North Lee County, and Green Meadows Water Treatment Plants to protect the reverse osmosis and nano-filtration membranes from scaling.

Intended Single Source with:
Harn R/O Systems, Inc.

Justification for Single Source Acquisition:
Harn R/O Systems, Inc. is the only authorized distributor of all Avista Technologies product lines in the state for the Vitec 3000. The Vitec 3000 is a proprietary chemical manufactured by Avista Technologies. Vitec 3000 was selected as the scale inhibitor utilized for implementation across all facilities. Its use has been standardized and has significantly extended the lifespan of reverse osmosis membranes at all facilities, reducing maintenance and improving system efficiency.

Recommended Procurement Approach:
For the above reasons, Lee County Procurement Management intends to utilize the Single Source Procurement method to contract with Harn R/O Systems, Inc.

Respond to:
If your firm feels they have the ability to supply the above, please contact Kevin Walker, Lee County Procurement Management at KWalker2@leegov.com for review.
