Rob Radford
Lee County DOT-Tolls

Subject: Sole Source Justification

Dear Rob:

Pursuant to your request, please use this letter as our sole source justification for the maintenance and development of the ARCS Electronic Toll Collection System hardware and software:

Project: ARCS System Support

TransCore, LP has provided and licensed the software and systems integration services for the existing Advanced Revenue Collection System (ARCS) at Lee County (LeeWay). TransCore has continued to maintain and upgrade these systems by request of LeeWay. These systems include proprietary designs at both the Lane level as well as in the back-office revenue collection systems. TransCore is the sole provider and integrator of the aforementioned solutions.

Please feel free to contact me if you have additional questions or wish to discuss this further, as always we are open to your input and are ready to support the needs of LeeWay.

Sincerely,

Jared Lapsley
Software Engineering Manager
