Household garbage and recycling collections resume

FORT MYERS, FL (Sept. 17, 2017) Lee County Solid Waste announced that garbage collection crews have resumed pick up of household garbage and recycling on regularly scheduled collection days.

If your garbage contains spoiled food, please place it in tightly sealed bags inside garbage cans with lids in order to avoid health hazards from pests. Each garbage can or bag should weigh no more than 50 pounds.

Make sure garbage and recyclable are at the curb, accessible to garbage trucks, but not blocking the road. Everything to be collected should be located away from storm debris, mail boxes and utility equipment including power poles, power lines, electric meters, fire hydrants, etc.

You can find more information on proper set out of storm debris at leegov.com/solidwaste.
