

April 16, 2026

Welcome,

Thank you for your continued interest in the Lee County Material Recycling Facility (MRF) Project. We remain committed to transparency and community involvement and will provide updates via email as the project progresses.

As a reminder, the landing page for the MRF will remain active throughout the project and can be accessed at leegov.com/solidwaste/mrf.

The design-build solicitations for the equipment and project site remain active, with anticipated requests for Board approval in the second quarter of 2026.

We have received our [Environmental Resource Permit](#) and a permitting exemption notice from the [US Army Corps of Engineers](#). We have updated permitting information, and it's available on the landing page under "Additional Resources."

The [Conceptual Schedule](#) has been updated to include our current estimate. The contract to construct off-site water and sewer improvements has been completed and these utilities are now in place. Access road construction is set to begin in the second half of this year.

Please remember that any interested resident can sign up to receive MRF Project updates by sending their contact information to swadmin@leegov.com, or they can opt-in to all Lee County communications by clicking the e-newsletter sign-up link below.

Thank you,

Lee County Solid Waste
