# COUNTY

Fiscal Year 2021 Water and Wastewater Revenue Sufficiency Study

Final Report / April 14, 2021

April 14, 2021

Ms. Pamela S. Keyes P.E. Utilities Director Lee County Utilities Department P.O. Box 398 Fort Myers, FL 33902-0398

Subject: Fiscal Year 2021 Water and Wastewater Revenue Sufficiency Study

Dear Ms. Keyes:

Raftelis Financial Consultants, Inc. ("Raftelis") has completed the 2021 Revenue Sufficiency Study Update ("Study") on behalf of Lee County Utilities ("LCU") of Lee County, Florida ("County") and has presented the results of our analyses, assumptions, and recommendations in this report for your consideration. The focus of the Study was to update the forecast of utility operations and the corresponding expenditure and funding needs ("revenue requirements") to evaluate the sufficiency of the water and wastewater utility ("Utility" or "System") revenues to meet these requirements for the Fiscal Years 2021 through 2026 ("Forecast Period"). The principle objective of the Study is to provide recommendations as to the level of rate revenues needed to reasonably recover the cost of providing service, maintain compliance with the Board of County Commissioners ("BOCC") adopted Administrative Code 10-4 LCU Financial Policy ("Financial Policies"), and rate covenants delineated in Resolution No. 93-06-40, as amended and supplemented from time to time ("Bond Resolution"), as well as to promote the financial sustainability and creditworthiness of the Utility.

Based on the findings of this evaluation, which should be read in its entirety, it is recommended that the BOCC consider adjusting the monthly retail and wholesale water and wastewater system rates for service as follows for the Forecast Period:

Identified Water and Wastewater Retail and Wholesale Rate Revenue Adjustments								
	Fisca	l Year Re	presenting	October 1	Through	Septembe	er 30,	
	Recommended Rate Adjustments							
Description	2021	2022	2023	2023	2024	2025	2026	
Retail / Wholesale System Rate Adjustments [1]	0.00%	8.00%	0.00%	0.00%	0.00%	0.00%	0.00%	
Monthly Residential Bill at 5,000 Gallons [2]	\$78.64	\$84.91	\$84.91	\$84.91	\$84.91	\$84.91	\$84.91	
Monthly Bill Increase	N/A	\$6.27	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	

<sup>[1]</sup> Represents the retail and wholesale system water and wastewater rate adjustments, which are applied uniformly to all water and wastewater charges for monthly water and wastewater service.

As can be seen from the prior table, it is recommended that the County increase the retail and wholesale rate revenues for monthly water and wastewater service on a combined basis by 8.0% for the Fiscal Year 2022 with no further rate adjustments identified thereafter for the Forecast Period. The following provides a summary of the key Study findings and assumptions:

- The County last formally approved rate adjustments during the Fiscal Years 2012 through 2015 as part of a multi-year rate plan recommended in the Water and Wastewater Rate and Miscellaneous Charge Study in June 2011 ("Prior Rate Plan"). The following provides a brief summary of the key findings and changes since the Prior Rate Plan:
  - Outperformed Prior Forecasts of Revenues and Operating Expenses: The County outperformed projections of the Prior Rate Plan due to better than expected: i) growth in customer accounts currently 12% greater than previously forecasted through the Fiscal Year 2015; and ii) operating expenses currently -5% below prior forecasts for the Fiscal Year 2015.
  - Wastewater Rate Revenue Imbalance Developing: While overall water and wastewater system expenses are lower than previously forecasted, the cost of contracted wastewater treatment expenses from the City of Fort Myers ("COFM") is much greater. The Prior Rate Plan had assumed approximately \$8 million a year in contracted wastewater treatment service from the COFM; however, such expenses increased to approximately \$11, \$18, \$21, and \$16 million in Fiscal Years 2017 through 2020, respectively. Based on discussions with LCU staff, the current forecast recognizes continued spending at the escalated levels, which is assumed to average approximately \$15.6 million a year during the Forecast Period. The current Study identified that the wastewater system has an imbalance between its revenues and revenue requirements which was less than 3.0% in each year of the Forecast Period. This level of imbalance is considered reasonable, however, the County should continue to monitor the water and wastewater cost allocation to ensure equitable cost recovery among the water and wastewater rates.
  - Deferred Rate Adjustments Last 6 Years and Reduced Dependence on Debt: The greater customer growth and lower expenses resulted in: i) the ability of LCU to defer the need to adjust rates for the Fiscal

<sup>[2]</sup> Amount shown for information purposes and represents the average residential 5/8" meter monthly customer bill.

Ms. Pamela S. Keyes, P.E. Lee County Utilities Department April 14, 2021 Page 3

Years 2016-2021; and ii) an improved financial position in terms of both greater cash reserves and greater net revenues available to fund capital and reduce dependence on debt to finance future capital.

- Increased Capital Spending for Renewals, Replacements, and Growth: The Prior Rate Plan assumed capital spending at approximately \$200 million over a five- (5) year period encompassing the Fiscal Years 2011–2015. Due to the need to continue to reinvest in existing infrastructure and ensure adequate capacity of facilities to meet the demands of future growth, the current Study identifies a significantly greater amount capital spending at approximately \$459 million over the next six (6) years encompassing the Fiscal Years 2021 through 2026. Key expansion related capital improvements over the next six (6) years include the County's North Lee County Water Treatment Plant ("NLC WTP") and the related wellfields estimated at approximately \$89.6 million and expansions and betterments of Fiesta Village, Three Oaks, and Fort Myers Beach Wastewater Treatment Facilities which are estimated to total approximately \$87.9 million (includes funding for necessary force main and reuse line diversions).
- It is recommended that the County implement rate adjustments uniformly based on discussions with LCU staff recognizing that: i) the calculated cross-subsidy by the water system to the wastewater system is less than 1.6% of total rate revenues in all years of the Forecast Period; and ii) the water and wastewater system represent an integrated enterprise fund, meaning that at times a greater amount of water or wastewater system expenditures may be funded in a given year. It is recommended that LCU closely monitor this and consider system specific rate adjustments as needed to minimize greater or future cross-subsidies.
- To fully fund the Capital Improvement Program ("CIP") as identified by LCU staff, the use of debt funding was assumed. The CIP totaled over \$459 million during the Forecast Period and the average annual funding required was \$76.6 million. The capital funding plan prioritized the use of existing, available cash balances and increased capital funding and reinvestment from rate revenues referred to as "Pay-Go" as first priorities. Additional debt funding was used once all other funding options were exhausted and was kept to as minimal of an amount as possible.
- It is recommended that the County consider the use of debt financing to fully fund the CIP and reduce the potential need for additional rate adjustments during the Forecast Period. Based on discussions with County staff and the results of our analyses as discussed further in this Report, it was assumed that the County would be required to use additional debt financing of \$35 million in Fiscal Year 2023 in order to fully fund the CIP as presented. The County should work with their Financial Advisor to weigh the costs, benefits, and identify the most advantageous use of debt. For the purposes of this analysis, it was assumed that the County would issue the Water and Wastewater Revenue Bonds, Series 2023 (the "Series 2023 Bonds") to finance \$35 million in capital expenditures during Fiscal Year 2023. This analysis assumed that the Series 2023 Bonds were based on: i) a \$35 million construction fund deposit; ii) 3.0% issuance costs; iii) 2.5% annual interest rate; iv) a thirty- (30) year repayment schedule commencing in Fiscal Year 2023; and v) level annual debt service payments of approximately \$1.724 million.
- The principal drivers of the recommended rate adjustments are related to increased capital funding and reinvestment from rate revenues, referred to as "Pay-Go" capital funding, and inflation and incremental growth in operating expenses due to expanded facilities.

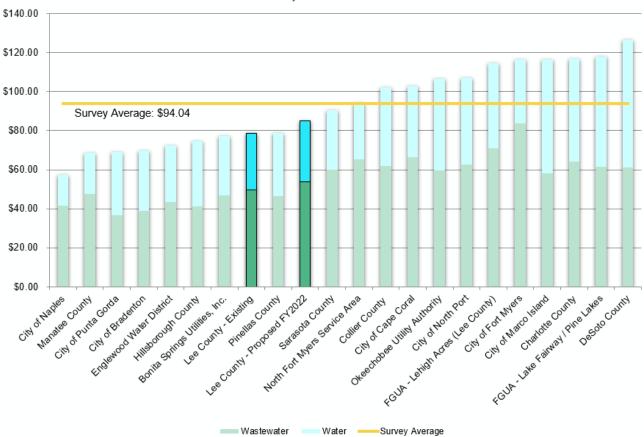

Ms. Pamela S. Keyes, P.E. Lee County Utilities Department April 14, 2021 Page 4

Assuming implementation of the identified rate recommendations LCU is expected to maintain compliance
with key financial performance indicators ("KPI") pursuant to LCU's formally adopted financial policy. The
adopted KPIs are more fiscally conservative than the requirements of the rate covenants of the Bond
Resolution and subordinate Loan Agreements of the Florida State Revolving Fund ("SRF"). This indicates
that compliance with the KPIs results in compliance with the rate covenants. The table below provides a
summary of the KPI's for the initial and final year of the Forecast Period.

Summary of Key Financial Metrics and Results							
Financial Policies	Target	Fiscal Year 2021	Fiscal Year 2026				
1.1 Operating Reserves	Min. 120 Days of O&M	295	132				
1.2 Capital Reserves	1.5% of Prior Year's Gross Assets	3.36% \$43.5 M	1.72% \$28.7 M				
2.1 Debt Capacity	50% Max of Debt to Fixed Assets	31.5%	22.4%				
2.1 Debt Coverage	Minimum = 150%	240%	235%				
3.2 Capital Reinvestment	Minimum = 10% Pay-Go \$	23.6% \$27.2 M	20.0% \$26.0 M				

• Assuming implementation of the recommended rate adjustments, the County's charges for water and wastewater services are expected to remain competitive with those charges of other surveyed utilities.

• Based on our analysis and the assumptions relied upon as delineated in this Study, the recommended rate adjustments are expected to: i) maintain the strong creditworthiness of the System and ensure adequate funding for the projected funding requirements of the water and wastewater system, including capital reinvestment and facility expansions; ii) comply with the rate covenants as delineated in the Bond Resolution and Loan Agreement with the Florida Department of Environmental Protection; and iii) maintain financial compliance with the KPIs of the County's adopted financial policy.

Ms. Pamela S. Keyes, P.E. Lee County Utilities Department April 14, 2021 Page 6

Following this letter is an attached summary report documenting recent trends, principal assumptions, and findings for your consideration. As always, we appreciate the opportunity to be of service to the County and the fine cooperation and valuable assistance given to us by LCU staff in the completion of the study.

Sincerely,

RAFTELIS FINANCIAL CONSULTANTS, INC.

Thierry A. Boveri, CGFM

# FISCAL YEAR 2021 WATER AND WASTEWATER REVENUE SUFFICIENCY STUDY

#### **GENERAL**

Raftelis Financial Consultants, Inc. ("Raftelis") has completed our financial forecast comprising the Fiscal Years 2021 through 2026 ("Forecast Period") and analysis of the water and wastewater utility system ("Analysis" or "Study") on behalf of the Lee County Utilities ("LCU") of Lee County, Florida ("County"), and has presented the results of our analyses, assumptions, and recommendations in this report. The principal goals and objectives of the Study were to:

- Evaluate the sufficiency of the Utility revenues derived from existing rates for the water and wastewater utility system ("Utility") and to identify rate adjustments, if necessary, to fund the projected expenditures and funding requirements from rates, meet the Board of County Commissioners ("BOCC") adopted LCU financial policies ("Financial Policies") and maintain compliance with Resolution No. 93-06-40, as amended and supplemented from time to time ("Bond Resolution"), authorizing the issuance of the outstanding senior lien bonds of such Utility and the various loan agreements entered into with the Florida Department of Environmental Protection ("FDEP") associated with securing State Revolving Fund ("SRF") loans which are considered as subordinated indebtedness of the Utility; and
- Identify a funding plan that would fully support the financing of the LCU capital improvement plan ("CIP") during the Forecast Period that would balance the use of external and internal sources of funding and identify the effects of such plan on utility rates. The funding plan primarily relies on internal sources derived from the use of capital reserves and funds available for ongoing capital investment derived from annual operations and new development (Utility revenues and connection fees) before the issuance of additional indebtedness.

The financial forecast was developed based on information provided by LCU staff including, but not limited to: i) detailed customer statistics to identify service area demands and trends; ii) updated financial information related to the capital improvement program and anticipated funding sources; iii) the Fiscal Year 2021 operating budget as adopted by the BOCC; iv) the recently completed financial results for Fiscal Year 2020 and Fiscal-Year-to-Date 2021 financial information; and v) other financial or statistical information.

#### **FISCAL YEAR 2020 OPERATING RESULTS**

LCU annually commissions financial forecasts in order to identify trends in expected revenues and expenditures and funding needs, and to measure or evaluate the estimated financial effects to utility rates. The financial forecast serves as the basis for rate recommendations and supports near-term and long-term capital planning for sustainability. To provide an indication of how LCU has recently performed financially, a comparison of the prior forecast and actual financial operating results for the Fiscal Year 2020 was evaluated. The following table provides a brief comparison of operating results:

Comparison of Fiscal Year 2020 Actual and Prior Financial Forecast Operating Results – Net Revenues							
Description	Actual Results [1]	Prior Year's Financial Forecast	Variance Positive/ (Negative)				
Operating Revenues and Investment Earnings	\$120,710,615	\$119,751,356	959,259				
Operating Expenses [2]	(75,739,192)	(65,542,163)	(10,197,029)				
Net Revenues	44,971,423	54,209,193	(9,237,770)				
Debt Service Payment Accruals [3]	(21,922,041)	(21,922,041)	0				
Net Revenues after Debt	23,049,382	32,287,152	(9,237,770)				
Connection Fees	13,690,129	7,849,708	5,840,421				
Net Revenues and Connections After Debt [4]	\$36,739,511	\$40,136,860	(\$3,397,349)				

<sup>[1]</sup> Amounts shown based on unaudited preliminary Fiscal Year 2020 operating results provided by County staff.

LCU underperformed relative to the prior year's forecast estimates primarily due to greater contracted wastewater treatment expenses from the City of Fort Myers ("COFM") that exceed the prior year's forecast by approximately \$3.5 million or 29%. The following table provides a summary of the comparison of actual to prior year's forecasted capital expenditures by funding source:

Comparison of Fiscal Year 2020 Actual and Prior Financial Forecast Operating Results – Capital Funding							
Funding Source	Actual Results [*]	Prior Year's Financial Forecast	Variance Positive/ (Negative)				
Capital Improvement Fund	\$14,374,828	\$58,117,486	(\$43,742,658)				
Renewal and Replacement Fund	7,740,992	16,671,999	(8,931,007)				
Bond Proceeds	0	0	0				
Connection Fees	3,562,077	20,103,247	(16,541,170)				
Capital Spending – Conservation Fund	0	300,000	(300,000)				
Total	\$25,677,897	\$95,192,732	(\$69,514,835)				

<sup>[\*]</sup> Amounts shown based on audited Fiscal Year 2020 operating results provided by County staff. Amounts shown reconcile to capital additions as shown in the Fiscal Year 2020 CAFR less capitalized interest.

Capital spending was less than identified in the prior forecast primarily due to: i) recognition of capital funding on an appropriated basis (i.e., a budgeted claim against available funds) as opposed to a cash basis (i.e., expected timing of expenditures); and ii) other delays from permitting or other requirements prior to initiating construction. It should be noted that such improvements are still expected to be initiated or have been initiated in the current period and that the variance between the actual spending and the planned spending has been declining over the recent period. The table presented on the ensuing page provides a comparison of the ending cash balances among the actual and previous year's forecasted results.

<sup>[2]</sup> Amounts shown exclude increase in net pension liability, increase in other postemployment benefits liability, non-departmental (GC) prior period revenue refunds and depreciation and amortization expenses.

<sup>[3]</sup> Amounts shown reflect the accrued payments deposited to the debt service sinking fund as opposed to the actual payments made during the Fiscal Year 2020.

<sup>[4]</sup> Amounts shown represents net cashflows generated from service charges and other revenues of the System after payment of expenses and debt service for the Fiscal Year 2020 available to deposit to appropriate fund balances or fund capital needs of the System.

Comparison of Fiscal Year 2020 Actual and Prior Financial Forecast Operating Results – Cash Balances							
		Prior Year's	Variance Positive/				
Funding Source	Actual Results [1]	Financial Forecast	(Negative)				
Operating Reserves	\$57,097,474	\$34,729,806	\$22,367,668				
Capital Funds Balances [2]	108,368,811	82,171,888	26,196,923				
Construction Fund (Debt Proceeds)	0	0	0				
Connection Fee Funds	80,961,073	60,362,345	20,598,728				
Total (Excludes Debt Service / Deposits)	\$246,427,358	\$177,264,039	\$69,163,319				

<sup>[1]</sup> Amounts shown based on audited Fiscal Year 2020 operating results provided by County staff and are exclusive of restricted funds related to debt service payments (i.e., sinking fund, debt service reserve fund), and customer deposits. The amounts on deposit in the restricted funds for Fiscal Year End 2020 was \$13,806,751, which totals with the amounts shown above to be \$260,234,109.

As can be seen above, the net effect of lower net revenues from operations relative to lower capital expenditures relative to capital appropriations results in a net greater amount of cash reserves. However, it should be noted that the majority of such funds are committed for appropriated capital improvements and/or minimum cash reserve policy targets. As can be seen on the table below, the majority of funds are restricted or appropriated for capital improvements.

Fiscal Year 2020 Cash Balances – Restrictions					
Line Item Description	September 30, 2020	Calculation Notes			
Total Cash Balances:	\$260,234,109	Total Cash as of September 30, 2020			
Less Restricted Cash Balances:					
30 Days' Operating Expenses on Deposit	(\$5,799,177)	30 Days of Fiscal Year 2021 Budgeted Expenses / Bond Resolution Restriction			
Debt Service Sinking Funds	(11,043,830)	Estimated Average Amount on Deposit for Next Debt Payment			
R&R Fund Requirement	(6,035,531)	5% of Fiscal Year 2020 Gross Revenues / Bond Resolution Restriction			
Customer Security Deposit	(2,762,495)				
Less Financial Policy Reserves:					
Operating Reserve [1]	(\$17,397,531)	Required 120 Days of Fiscal Year 2020 Budgeted Expenses Net of 30 Days Required by Bond Resolution			
Capital Reserve [1]	(13,376,502)	1.5% of Gross Depreciable Fixed Assets as of September 30, 2020 Less R&R Fund Requirement Restricted by Bond Resolution			

Table continued on following page.

<sup>[2]</sup> Amounts shown include funds in the Renewal and Replacement Fund, Water Conservation Surcharge Fund, Capital Improvement Fund, and the Vehicle Replacement Fund.

Fiscal Year 2020 Cash Balances – Restrictions (cont'd.)						
Line Item Description	September 30, 2020	Calculation Notes				
Less Other Restrictions						
Connection Fee Fund Balances	(80,961,073)					
Net CIP Appropriations	(78,699,047)	Fiscal Year 2021 CIP Appropriations Net of Appropriations Funded from Existing Connection Fees Already Recognized as a Restriction to Cash Balances				
Fiscal Year 2020 Contracted Wastewater Treatment Expense	(6,362,201)					
Total Restrictions	(\$222,437,388)					
Net Available After Restrictions [2]	\$37,796,721					

<sup>[1]</sup> The gross Financial Policy reserve requirement for the Operating Reserve and Capital Reserve is calculated to be approximately \$23.2 million and \$19.4 million, respectively. Amounts shown are net since the cash restricted Bond Resolution for operating expenses and the Renewal and Replacement Fund Requirement may be applied towards the Financial Policy Reserve requirements.

As can be seen in the prior table, the County reports approximately \$260 million in cash balances; however, most of such funds are restricted or designated due to Bond Resolution, Financial Policy, current period capital appropriations, and contracted wastewater treatment true-up expenses for the prior year. While net cash available has grown in recent years, it should be noted that due to the level of identified capital funding requirements in the near-term any excess cash balances are expected to be appropriated / expended by the Fiscal Year 2023 as discussed in greater detail in subsequent sections of this report.

#### **FORECAST OF REVENUES**

The revenues for the Utility are principally generated from the rates for water and wastewater service. Such revenues account for approximately 89% of gross revenues over the Forecast Period and include charges for service to both retail and wholesale customers. Growth-related fees (i.e., connection fees, tap fees, etc.) currently account for the majority of the remaining revenues at approximately 7% of gross revenues and income, while the balance of revenues or 4% of gross revenues are generated from miscellaneous service charges, rental income, and interest income on investments. Since the majority of the Utility revenues are generated from monthly rates for water and wastewater, the forecast of revenues is primarily predicated on assumptions of the estimated number of customers receiving service and their demands assumed for the Forecast Period.

<sup>[2]</sup> Net available after restrictions is presented for informational purposes to demonstrate restrictions and designations to cash balances at the outset of the current fiscal year. It should be noted that such amounts do <u>not</u> reflect any designations for unfunded Other Post Employee Benefit liabilities, which is reported at \$33,872,000 as of September 30, 2020.

#### **CUSTOMER AND DEMAND FORECAST**

The forecast of water service revenues relied upon a review of recent historical trends in water customer account growth and use statistics. The following table provides a summary of the recent historical and projected trends in water customer billing statistics:

Water System [1]							
	]	Retail Customers				Finished / 7	Treated Water
Fiscal Year (Historical)	Average Annual No. of Accounts	Retail Sales (000s Gallons)	Monthly Use per Account (Gallons)	Wholesale Water Sales (000s Gallons)	Total Billed Water Sales (000s Gallons)	(000s Gallons)	ADF- MGD [4]
2012	77,396	7,116,776	7,663	724,001	7,840,777	8,750,233	23.97
2013	78,452	7,082,552	7,523	705,247	7,787,799	8,422,904	23.08
2014	79,562	7,207,660	7,549	723,867	7,931,527	8,532,693	23.38
2015	80,710	7,236,506	7,472	714,624	7,951,130	8,512,833	23.32
2016	82,042	7,223,519	7,337	735,111	7,958,630	8,710,483	23.86
2017	83,255	7,540,485	7,548	742,297	8,282,782	9,039,850	24.77
2018	84,558	7,590,205	7,480	826,694	8,416,899	9,069,253	24.85
2019 [2]	86,970	7,677,908	7,357	827,350	8,505,258	9,371,558	25.68
2020	89,087	7,876,118	7,367	822,219	8,698,337	9,444,282	25.87
Annual Growth	1.6%	1.1%	(0.4%)	1.4%	1.2%	0.9%	0.9%
(Projected)							
2021	90,505	7,872,493	7,249	823,650	8,696,143	9,452,329	25.90
2022	91,906	7,898,428	7,162	825,088	8,723,516	9,482,083	25.98
2023	93,285	7,990,010	7,138	826,533	8,816,543	9,583,199	26.26
2024	94,642	8,079,461	7,114	827,985	8,907,446	9,682,007	26.53
2025	95,975	8,167,352	7,092	829,444	8,996,796	9,779,126	26.79
2026	97,282	8,253,593	7,070	830,911	9,084,504	9,874,461	27.05
Annual Growth [3]	1.5%	0.8%	(0.7%)	0.2%	0.7%	0.7%	0.7%

<sup>[1]</sup> Amounts shown derived from Table 2 and include all customer classes.

As can be seen above, the County has observed an increase in the amount of water sales for the historical period, however average water sales per account have generally declined. The exception to this trend is noted for the Fiscal Year 2017, which was considered a dry year with higher irrigation demands. Increased water sales may also be attributable to a prolonged period of economic expansion which has resulted in customer account growth and greater connection fee revenues. Based on discussions with LCU staff, it is assumed for the Forecast Period that the County may expect to experience average annual growth in customer accounts of approximately 1.5% per year.

<sup>[2]</sup> In June 2019, the Utility implemented a continuous billing policy resulting in an increase in average bills rendered and no change to billed water sales. It is estimated that monthly bills rendered will increase by approximately 2.53% upon full implementation in 2020.

<sup>[3]</sup> Reflects average annual compound growth rate from Fiscal Year 2020 through Fiscal Year 2026.

<sup>[4]</sup> Average Daily Flow ("ADF") in Millions of Gallons per Day ("MGD").

With respect to the wastewater system, the historical and projected customer account and billed flow statistics has reflected similar trends as discussed for the water system. The following table provides a summary of the historical and projected wastewater system customer billing statistics:

Wastewater System [1]							
	1	Retail Customers				Total Treate	d Wastewater
Fiscal Year (Historical)	Average Annual No. of Accounts	Billed Flows (000s Gallons)	Billed Flows per Account (Gallons)	Wholesale Billed Flows (000s Gallons)	Total Billed Flows (000s Gallons)	Thousands of Gallons	Daily Flow (ADF – MGD)
2012	55,922	4,577,441	6,821	276,247	4,853,688	5,580,066	15.29
2013	56,134	5,358,311	7,955	275,787	5,634,098	5,475,070	15.00
2014	57,347	5,403,752	7,852	277,082	5,680,834	5,883,559	16.12
2015 [2]	58,316	5,222,523	7,463	203,018	5,425,541	5,479,641	15.01
2016	59,325	5,322,918	7,477	214,637	5,537,555	5,938,595	16.27
2017	60,263	5,446,375	7,531	231,480	5,677,855	5,924,544	16.23

<sup>[1]</sup> Amounts shown derived from Table 3 and recognize all customer classes.

Trends in wastewater account growth and billed flows have been and are anticipated to continue to be generally consistent with the growth characteristics recently experienced by the water system. However, billed wastewater flows tracked more closely with wastewater account growth than for the water system. This is primarily because water sales include irrigation (discretionary use) demands, which are subject to weather conditions and can fluctuate materially from year to year. Recognizing that billed sewer flows are determined based on metered water sales, the County employs a sewer billing cap for the residential class that limits the maximum amount of billed wastewater flow to 9,000 gallons per month for this class. It is assumed any metered water use above this usage threshold is most likely for outdoor uses that do not contribute wastewater flow to the system. For the financial forecast, customer account growth and billed wastewater flow is projected to be generally consistent with that assumed for the water system and recognizes the implementation of the continuous billing policy implemented in Fiscal Year 2019.

<sup>[2]</sup> Reduction in Wholesale Billed Flow associated with the reduction of wholesale wastewater customers in Fiscal Year 2015.

<sup>[3]</sup> In June 2019, the Utility implemented a continuous billing policy resulting in an increase in average bills rendered and no change to billed water sales.

<sup>[4]</sup> Reflects average annual compound growth rate from Fiscal Year 2020 through Fiscal Year 2026.

#### **PROJECTED REVENUES**

The revenue forecast was based on: i) review of historical trends in revenues; ii) Fiscal Year 2021 operating budget; iii) year-to-date operating results for Fiscal Year 2021; iv) customer and demand forecast as previously discussed; v) assumed implementation of identified rate adjustments to fund the projected revenue requirements; and vi) discussions with LCU staff. The revenue forecast can be categorized into three (3) primary groups of revenues comprising of revenues derived from monthly service charges to retail and wholesale customers, growth / connection fee revenues, and all other revenues. Rate revenues from monthly service comprise the majority or approximately 87% of the total projected Utility revenues.

	Projected Utility Revenues								
	Ra			Wastewater/		Connection			
Fiscal	Adjustn	nent [1]	Water	Reclaimed	Wholesale	Fee	Other	Total	
Year	Water	Sewer	Service	Service	Service	Revenues	Revenues [2]	Revenues	
2021	0.00%	0.00%	\$50,371,295	\$60,973,791	\$3,810,491	\$8,483,668	\$5,232,635	\$128,871,879	
2022	8.00%	8.00%	54,685,824	66,135,277	4,067,224	9,901,283	4,444,062	139,233,670	
2023	0.00%	0.00%	55,497,392	67,034,546	4,087,035	9,731,946	4,366,490	140,717,409	
2024	0.00%	0.00%	56,126,266	67,720,329	4,096,099	9,556,029	4,153,879	141,652,602	
2025	0.00%	0.00%	56,743,481	68,395,826	4,105,206	9,389,237	3,917,253	142,551,004	
2026	0.00%	0.00%	57,348,406	69,056,917	4,114,362	9,161,759	3,817,756	143,499,200	
Growth I	Rate		2.6%	2.5%	1.5%	1.5%	(6.1%)	2.2%	

<sup>[1]</sup> Reflects identified rate adjustments applied to charges for water and wastewater retail service only.

#### **FORECAST OF EXPENDITURES**

The expenditures during the Forecast Period can be categorized into three primary groups of expenditures: operation and maintenance (operating) expenses, capital funding, and debt service. Presently, operating expenses account for the majority or 59% of gross revenue requirements, while transfers to fund capital reinvestment and reserve maintenance accounted for 23% and debt service payments account for the remaining 18%.

#### **OPERATING EXPENSES**

The forecast of operating expenses was developed based upon: i) a review of the recent trends in historical expenses; ii) the adopted Fiscal Year 2021, including review of certain year-to-date expenditures; iii) assumed growth rates / escalation factors of costs based on industry trends in such costs, projections of inflation by the Congressional Budget Office; and iv) discussions with the County staff. Pursuant to a review of operating results since the Fiscal Year 2011, the variance among budgeted and actual operating expenses has been declining. More recently and beginning in the Fiscal Year 2017, actual operating expenses has exceeded budgeted amounts due to a material increase in contracted wastewater treatment disposal costs from the COFM. Charges from the COFM were reported at approximately \$20.8 and \$15.7 million for the Fiscal Years 2019 and 2020, respectively. This contrasts with prior historical averages of approximately \$8.0 million. The significant increase in such costs are attributable to increased capital spending by COFM, which is included as a cost component of wholesale wastewater expenses. Based on discussions with County staff, the forecast recognized \$15.3 million in charges for Fiscal Year 2021, which represents an increase of \$3.1

<sup>[2]</sup> Amounts shown include non-operating revenues associated with Gateway Debt Service contributions, investment income, the sale of surplus materials and other miscellaneous non-operating revenues. Additionally, it should be noted the projected decline in Other Revenues over the Forecast Period is attributable to declines in investment income associated with the projected declines in total unrestricted fund balances (from funding of the capital improvement plan).

million above the amounts included in the Fiscal Year 2021 operating budget. Thereafter, such operating costs from the COFM were escalated at 3.0% annually for the Forecast Period. Recognizing the declining margins among the budgeted and actual operating expenses, a contingency ranging from 0.25% for the Fiscal Year 2021 and increasing to 0.75% by the end of the Forecast Period was applied to total operating expenses. The contingency results in an increase to annual operating expenses which averaged approximately \$3,301,000 a year during the Forecast Period.

The Other Post-Employment Benefits ("OPEB") cumulative liability for the recently completed Fiscal Year 2020 is reported at approximately \$33,872,000. Based on discussions with County staff, LCU intends to cash fund deposits for OPEB at approximately \$243,000 a year on average for the Forecast Period.

The principal operating expenses include personnel, contracted services, and materials / supplies accounting for over 79% of total expenses. LCU staff indicated that based on preliminary budget estimates for Fiscal Year 2022, additional staffing will be required over the coming years and provided Raftelis with estimated additional annual salaries, benefits, and vehicles expenses for Fiscal Years 2022 through 2026 to be included in the projections of operating expenses. Additionally, recognizing that shortly after the Forecast Period LCU expects to undertake an expansion of the South East Wastewater Treatment Plant which will require additional staffing, contractual services, and other operating expenditures, an allowance of \$500,000 and \$1,000,000 has been added to Fiscal Years 2025 and 2026, respectively. Furthermore, budgeted departmental capital outlays were adjusted and reclassified as a capital expenditure included in the capital improvement plan for the purpose of calculating compliance with the Bond Resolution. The forecast of operating expenses relied upon various escalation factors ranging from approximately 2% to 6% depending on the assumed costs being escalated. The following table presents the forecast of operating expenses:

Pi	Projected Operating Expenses (\$000s) [1]													
		Fisca	al Year Endi	ng Septembe	er 30,									
Description	2021	2022	2023	2024	2025	2026	Growth Rate [2]							
Salaries and Wages	\$17,711	\$19,073	\$20,251	\$21,238	\$22,191	\$22,856	5.2%							
Employee Benefits	8,732	9,021	9,320	9,628	9,947	10,276	3.3%							
OPEB	225	232	239	246	253	261	3.0%							
Contract Services, Materials, and Supplies	29,071	28,921	29,723	30,556	31,420	32,303	2.1%							
Utilities	5,529	5,623	5,741	5,868	6,503	7,135	5.2%							
Repairs and Maintenance	3,638	3,751	3,868	3,988	4,113	4,241	3.1%							
Insurance	831	845	863	882	902	922	2.1%							
Other [3]	2,315	2,766	3,104	2,669	2,651	2,669	2.9%							
Indirect Costs	2,121	2,157	2,203	2,251	2,303	2,354	2.1%							
Administrative Fees	107	109	111	114	116	119	2.1%							
Contingency	275	299	303	306	309	313	2.6%							
Total	\$70,557	\$72,797	\$75,726	\$77,746	\$80,708	\$83,447	3.4%							

<sup>[1]</sup> As shown on Table 5 at the end of this Study.

<sup>[2]</sup> Reflects average annual compound growth rate from Fiscal Year 2021 through Fiscal Year 2026.

<sup>[3]</sup> Other expenses include travel, communication, freight and postage, advertising, rentals, and other items budgeted by the County.

As can be seen above, operating expenses are projected to increase by an average annual growth rate of approximately 3.4% per year. For additional detail concerning the forecast of operating expenses, please reference Table 5 at the end of this report.

#### **CAPITAL EXPENDITURES**

Capital reinvestment and funding is integral to the continuity and quality of service delivered to customers. These expenditures, coupled with the need to meet increased regulations and the growth requirements of the Utility, contributed to the CIP. The capital costs of the Utility were based on the existing capital improvement plan as identified by LCU Staff, which encompasses the forecast period (Fiscal Year 2021 through Fiscal Year 2026). The table below provides a summary of the capital expenditures by type and corresponding sources of funding:

	Capit	al Improvem	ent Program (	(\$000s) [1]			
Description	2021	2022	2023	2024	2025	2026	Total
Capital Projects:							
Water System:							
Renewal & Replacement	\$46,535	\$10,038	\$9,807	\$10,700	\$16,969	\$15,284	\$109,332

Capital Grants	0	2,300	0	0	0	0	\$2,300
Proposed Series 2023 Bonds	0	0	24,000	11,000	0	0	\$35,000
<b>Total Funding Sources</b>	\$121,155	\$82,066	\$88,602	\$85,521	\$46,626	\$35,436	\$459,406

<sup>[1]</sup> Derived from Table 6 at the end of this report; Fiscal Year 2021 amounts include projects approved by the BOCC in prior years which are underway or active and considered as a component of construction-work-in-progress (capital project carryforwards). It should be noted that the amounts are presented on an appropriations basis (i.e., a budgeted claim against available funds) as opposed to a cash basis (i.e., expected timing of expenditures), which will differ as compared to actual project completion and spending.

As can be seen from the above table and as shown in greater detail in Table 6 at the end of this report, approximately 58% of the capital funding is associated with the renewal, replacement, rehabilitation, upgrade, and betterment (referred to as "renewals and replacements") of the existing infrastructure and is representative of the needs of a

<sup>[2]</sup> Amounts shown funded from current amounts on deposit and additional annual deposits from operations for the Forecast Period.

mature utility providing service to a large customer base. Additionally, the overall amount of programmed capital expenditures for the renewal and replacement of existing infrastructure is estimated at approximately \$266 million during the Forecast Period and averages approximately \$44 million in annual funding; when compared to the annual depreciation expense of approximately \$49.5 million as reported in the Fiscal Year 2020 Comprehensive Annual Financial Report, this demonstrates an active plan of capital reinvestment. The majority of the remaining capital expenditures are associated with extension or expansion of infrastructure including, but not limited to: i) Three Oaks Wastewater Treatment Plant Expansion; ii) North Lee County Water Treatment Plant Expansion; and iii) various water transmission main and force main extensions. To the extent possible, connection fee revenues were recognized to fund the expansion related capital needs of the System.

With respect to the sources of funding for the identified capital expenditures, approximately 92% of the identified funding requirements are anticipated to be financed from internal sources derived from existing cash reserves, connection fees, and increased capital transfers from rate revenues as a result of the Fiscal Year 2022 8.0% retail and wholesale rate adjustment. The County expects to receive \$2.3 million of grant funding for the Fiesta Village Reclaimed Water Main Extension Project. Commencing in Fiscal Year 2023, internal funding sources (with additional transfers from the 8.0% rate adjustment) were not sufficient to meet the overall funding requirements. Without debt funding, the recommended rate adjustment would need to be increased to allow for an additional \$35 million to be generated from monthly retail and wholesale rate revenues over the upcoming 24 - 36 months (Fiscal Year 2022 to Fiscal Year 2024) or the CIP would need to be reduced. For the purposes of this Study, Raftelis assumed the issuance of the Series 2023 Bonds to provide partial funding for the North Lee County Water Treatment Plant and Wellfield Expansion projects. The Series 2023 Bonds are based on the following assumptions: i) a \$35 million construction fund deposit; ii) 3.0% issuance costs; iii) 2.5% annual interest rate; iv) a thirty- (30) year repayment schedule commencing in Fiscal Year 2023; and v) level annual debt service payments of approximately \$1.724 million. It should be noted that the CIP is a planning document, which is presented on an appropriations basis, and the timing and completion of projects are subject to changes or delays. As a result, it is recommended that staff continue to annually re-evaluate the financial forecast and the need for additional indebtedness. However, should the County issue additional debt, Raftelis would recommend the County work with its Financial Advisor to identify the most cost effective use of debt, and if possible, issue debt for System expansion related projects.

As previously discussed, a major driver regarding the need for additional rate adjustments are the required deposits for capital reinvestment from rate revenues (i.e., Pay-Go). The following table provides a summary of the assumed transfers for capital reinvestment from rate revenues:

Annual Transfers for Capital Related Activities from Operating Revenues (\$000s) [*]													
Description (Fund)	2021	2022	2023	2024	2025	2026	Total						
Water:													
R&R Fund Transfer (20)	\$5,881	\$5,916	\$6,368	\$6,468	\$6,518	\$6,618	\$37,770

Water Conservation (35)	140	140	140	140	140	140	840						
Total	\$27,744	\$34,544	\$31,548	\$30,645	\$28,743	\$27,183	\$180,408						

<sup>[\*]</sup> Derived from Table 7 at the end of this report.

The assumed transfers were allocated among the water and wastewater systems based on the relationship of the fixed asset records of the County as adjusted for the asset additions assumed in the CIP. In aggregate, the amount of capital reinvestment from rates and other revenues (exclusive of connection fees) is projected to average approximately \$30 million annually and is considered a favorable level of capital reinvestment from rate revenues. The assumed transfers aid in maintaining compliance with the minimum capital reinvestment requirements of the County's adopted Financial Policies. The following section provides further discussion concerning existing and additional debt.

#### **DEBT SERVICE**

The County is currently in the process of refinancing two Florida State Revolving Fund Loans, including the Drinking Water Loan 361001 and Clean Water Loan 392330 to realize net present value savings. Once completed, commencing in Fiscal Year 2022 the total existing annual debt service payments for the Utility are expected to remain relatively constant during the remainder of the Forecast Period. As discussed previously in this Report, the capital funding plan utilized debt financing (the Series 2023 Bonds) to fund \$35 million of capital expenditures; the repayment of the Series 2023 Bonds has been recognized as a requirement of the System and can be seen below. The debt service requirements of the System were allocated between the water and wastewater systems based upon current transmission and treatment assets in service and those recognized in the capital improvement plan. This allocation

method was utilized because it recognizes that the historical funding of capital projects in total is more representative of the total worth of the System as compared to only the capital funded from debt. The following table provides a summary of the existing and anticipated debt service payments assumed for the development of the financial forecast by issue:

Summary of Existing and Projected Debt Service Payment Accruals (\$000s) [1]											
Description	2021	2022	2023	2024	2025	2026					
Outstanding Bonds:											
Series 2011 Bonds	\$5,794	\$5,790	\$0	\$0	\$0	\$0					
Series 2012A & B Bonds	0	0	0	0	0	0					
Series 2013A Bonds	1,428	1,430	1,428	1,428	0	0					
Series 2013B Bonds	4,005	4,013	4,008	4,011	4,011	4,013					
Series 2019 Bonds	4,163	4,164	9,959	9,950	11,383	11,377					
Refunding Bank Loan (DW361001) [2]	1,154	1,628	1,628	1,628	1,628	1,628					
Refunding Bank Loan (CW392330) [2]	969	2,115	2,114	2,114	2,114	2,114					
Additional Bonds:											
Proposed Series 2023 Bonds [3]	\$0	\$0	\$1,724	\$1,724	\$1,724	\$1,724					
Outstanding SRF Loans:											
SRF Loan DW3610010	501	0	0	0	0	0					
SRF Loan WW392330	1,222	0	0	0	0	0					
SRF Loan WW360200	1,540	1,540	1,540	1,540	1,540	1,540					
SRF Loan DW3602A0	1,311	1,311	1,311	1,311	1,311	1,311					
Total	\$22,088	\$21,991	\$23,711	\$23,705	\$23,711	\$23,708					

<sup>[1]</sup> Amounts shown reflect the accrued payments deposited to the debt service sinking fund as opposed to the actual payment over the Forecast Period.

The outstanding bonds and SRF loans were allocated among the water and wastewater system based on the treatment and backbone transmission related fixed assets of the System since these assets are assumed to be most likely debt financed. All other assets were excluded since they represent either smaller distribution and collection lines, often initially developer contributed and not debt financed, or assets with short service lives that would not qualify for long-term (i.e., 20 years or longer) debt financing. The Series 2023 Bonds funded water system expansion projects only and have been allocated solely to the water system. Furthermore, it should be mentioned that even with the issuance of the Series 2023 Bonds, it is projected that LCU will end the Forecast Period (Fiscal Year 2026) with strong debt related financial metrics including: i) 22.4% net debt outstanding as a percent of net fixed assets (Financial Policy requirement = 50.0% max); and ii) all-in debt service coverage ratio = 235% (Financial Policy requirement = 150.0% minimum and Bond Resolution requirement = 120.0% minimum). Thus, providing LCU with significant debt capacity after the Forecast Period to assist with funding the next tranche of capital improvements.

<sup>[2]</sup> Amounts shown based on preliminary information provided by County staff and are subject to change.

<sup>[3]</sup> Amounts shown calculated based on: i) a construction fund deposit of \$35 million; ii) issuance costs equal to 3.0% of the construction fund deposit; iii) annual interest rate of 2.5%; and iv) a level thirty (30) year repayment schedule.

#### **PRINCIPAL FINDINGS**

Based on the key assumptions of the Study we have determined that the existing rates for retail service will not generate sufficient revenues to fund the projected revenue requirements of the System during the Forecast Period. The following table provides a breakdown of the projected revenue requirements by System and on a combined basis.

		Fis	cal Year Endi	ng September	30,	
Description	2021	2022	2023	2024	2025	2026
Combined System:						
Operating Expenses	\$70,557	\$72,797	\$75,726	\$77,746	\$80,708	\$83,447

Surplus/(Deficiency)	\$0	\$0	\$0	\$0	\$0	\$

<sup>[\*]</sup> Amounts shown derived from Table 7 at the end of this report.

It is recommended that the County adjust the Water and Wastewater System retail and wholesale rates by eight percent (8.0%) for Fiscal Year 2022 (October 1, 2021). Based on our analyses as discussed in this Report, this one-time adjustment will be sufficient, with the use of the Series 2023 Bond proceeds, to fully fund the CIP. It should be noted that without debt financing (the Series 2023 Bonds) the County would need to: i) adopt a significantly larger rate adjustment; ii) identify alternative capital funding sources; or iii) make reductions to the CIP as presented in this Report. The primary drivers of the need for the rate adjustment include: i) projected increases in gross revenue requirements stemming from the effects of inflation on operating and maintenance expenditures; ii) significant increases in the cost of contracted wastewater treatment from the COFM; iii) the need for increased Pay-Go funding of the capital improvement program; and iv) additional debt service associated with the proposed Series 2023 Bonds.

Recognizing application of the recommended and identified rate adjustment, it is anticipated that LCU will maintain compliance with the BOCC's adopted Financial Policy requirements, including:

- Maintain a minimum operating cash reserves equal to or greater than 120 days or approximately 33% of annual budgeted operating expenses;
- Maintenance of minimum unappropriated capital cash reserves equal to or greater than 1.5% of the prior fiscal year's gross depreciable fixed assets;

- Maximum amount of outstanding principal amount of debt as a percentage to the net fixed assets in service being no greater than a ratio of 50%;
- Maintaining a minimum "All-In" debt service coverage equal to or greater than 150%; and
- Minimum deposit from rate revenues to capital-related funds for capital reinvestment equal to or greater than ten percent (10%) of the prior fiscal year's rate revenues.

The following table provides a summary of the projected compliance with the financial policies based on the financial and rate implementation plan as presented in this Study:

Financial Policy Compliance [1]												
		Fisc	al Year Endi	ng Septembe	er 30,

<sup>[1]</sup> Amounts shown derived from information provided on Table 10 at the end of this report.

<sup>[2]</sup> Includes the ending cash balances associated with the Revenue Fund (#00).

<sup>[3]</sup> Includes the ending cash balances associated with the Renewal and Replacement Fund (#20) and the Capital Improvement Fund (#30).

<sup>[4]</sup> Amount shown calculated assuming appropriated capital spending in the prior period is converted to a fixed asset. Differences in timing associated with when capital improvements are constructed may materially affect the calculation of compliance with the Financial Policy Debt Capacity (i.e., Net Debt to Net Fixed Asset) maximum ratio.

As can be seen from the prior table, the Utility is expected to meet or exceed the targets and benchmark ratios identified in the Utility financial policies. In order to provide additional information, the following table presents a summary of the projected cash balances by Utility fund during the Forecast Period:

Summary of Projected Ending Balances by Fund (\$000s) [1]												
		Fisc	al Year Endi	ng Septembe	r 30,							
Description	2021	2022	2023	2024	2025	2026

<sup>[1]</sup> Derived from information provide on Table 8 at the end of this report.

As can be seen above, it is anticipated that the use of existing cash reserves to finance the capital needs of the Utility will be required. The cash balances are projected to decline during the Forecast Period primarily from the increased capital funding needs. Cash reserves are projected to maintain compliance with the financial policy goals of the Utility as adopted by the BOCC for the Forecast Period. Should the County identify additional capital improvements beyond what is contemplated in this Report, it would need to identify additional funding sources as the net amount of cash above restrictions and minimum reserve requirements declines to approximately \$6 million by Fiscal Year 2026. A graphical summary of the financial results and performance measures are included within Table 1 attached to this report.

For the purposes of this analysis, a comparison of residential water and wastewater charges with other neighboring utilities was prepared to provide an indication of the competitiveness of the existing residential rates charged by LCU. Based on this comparison, which can be seen on Tables 15 through 17 at the end of this report, the existing and recommended rates for service are considered generally below average with the other surveyed utilities.

<sup>[2]</sup> Amounts shown reflect funds that have restricted uses or liability / claims against the fund and include: Customer Deposits, Water Connection Fees, Wastewater Connection Fees, Debt Service Reserve, and Debt Sinking Funds.

<sup>[3]</sup> Amounts shown reflect minimum reserve requirements pursuant to the County's adopted Fiscal Policy including: i) Fiscal Policy 1.1 Operating Reserves equivalent to 120 Days of current operating and maintenance expenses; and ii) Fiscal Policy 1.2 Capital Reserves equivalent to 1.5% of the prior year's depreciable gross assets.

<sup>[4]</sup> Represents net unrestricted cash assumed to be available or committed to fund future capital needs of the System.

#### **CONCLUSIONS AND RECOMMENDATIONS**

Based on the assumptions, considerations, and analyses as summarized herein, we are of the opinion that:

- 1. The County's existing rates for service for the water and wastewater systems are not anticipated to recover the projected revenue requirements (Utility expenditure and funding needs) for the Forecast Period. Therefore, as of the date of this report, increases in water and wastewater retail and wholesale service rates are recommended for Fiscal Year 2022. A detailed listing of the recommended rates and charges can be found on Table 14 at the end of this Study.
- 2. The capital funding analysis completed as a component of this Study, identified the need to issue \$35 million of debt to fund a portion of the North Lee County Water Treatment Plant and Wellfield Expansion Projects in Fiscal Years 2023 and 2024. Use of debt funding was required to provide funds available to appropriate to such projects. Since the CIP is presented on an appropriations basis, funding must be secured prior to the start of the project. The County should work with its Financial Advisor to identify the most beneficial use of debt and should consider using debt for System expansion related projects. Furthermore, the County should continue to monitor the total amount of annual capital spending, since delays, deletions, and/or additions of other capital projects could affect the sizing of or need for debt financing.
- 3. The County should consider further monitoring of both the water and wastewater systems on a stand-alone basis to assess if each individual system is fully recovering the costs of providing such service. Based on the preliminary analyses performed as a component of this Study, it was identified that the level of variance between the wastewater system's projected revenues and allocated revenue requirements was less than 3.0% in all years of the Forecast Period. This level of variance is considered by Raftelis to be acceptable and within a reasonable margin of error. However, should this trend become further pronounced, the County may consider adjusting wastewater rates at a greater level as compared to water.
- 4. The projected results and assumptions as contained in this Study may vary from actual results. As such, LCU staff should continue to perform annual evaluations to validate that the additional revenues generated from the Fiscal Year 2022 rate adjustments are sufficient to meet the needs of the utility and compliance with the County's Financial Policies.
- 5. Based on recognition of the additional identified rate adjustments, the Utility is expected to maintain compliance with the adopted Utility Financial Policies and rate covenants of the Bond Resolution for the remainder of the Forecast Period.

- [1] Amounts shown based on the adopted Fiscal Year 2021 budget. Projected amounts in subsequent years escalated based on the escalation reference factors listed as listed in Table 4.
  [2] Adjustments recognize the 2021 Budget provided by LCU for Fleet Services, Additional Personnel, and Other Post Employment Benefits.
- [3] Adjustments shown to the Fiscal Year 2021 adopted and reflect the reclassification of budgeted departmental capital outlay as capital costs which are recognized in the CIP as shown on Table 6.
- [4] Adjustments shown to account for additions in personnel, benefits, employee related costs and vehicles which are assumed to be included in future budget years per LCU staff.
   [5] Amounts shown reflect bulk purchases from the Florida Governmental Utility Authority (FGUA) North Fort Myers WWTP. The County has secured 1.5 mgd of capacity. FGUA charges the County for service at the County's wholesale wastewater rate. The forecast of bulk wastewater purchase costs assumes marginal growth in billed flows applied to the projected increase in the County's wholesale wastewater rate for service.
   [6] Bad debt expense calculated assuming 0.25% of projected rate revenues.
   [7] Amounts shown calculated based on a contingency factor ranging from 0.25% and increasing to 1.00% during the Forecast Period as applied to projected operating expenses in each respective Fiscal Year.

- [1] Amounts shown derived from Table 4.
- [2] Amounts shown dervied from Table 6.
- [3] Amounts shown reflect deposits to the water conservation surcharge fund based on estimated receipts of associated revenues charged to all customers whose monthly consumption exceeds the first water conservation block per monthly billing period. The revenues are internally restricted for capital improvements associated with water supply
- [4] Amounts shown primarily related to miscellaneous service charges, water tapping fees, water tower antenna rental, water conservation surcharge and other miscellaneous operating revenue
- [5] Amounts shown dervied from Table 8.
- [6] Amounts shown reflect non-operating revenues and includes debt service contributions of \$172,335 annually from the Gateway Services Community Development District (Gateway) related to the purchase of capacity by Gateway in the County's facilities. The annual debt service contribution from Gateway will terminate in 2033
- [7] Rate increases are assumed to be effective with service rendered on and after October 1st of the respective fiscal year shown resulting in 11.5 months effective in the current period.

#### Table 9

#### Lee County, Florida Fiscal Year 2021 Water and Wastewater Revenue Sufficiency Study

#### **Development of Projected System Operating Results and Debt Coverage [1]**

Footnotes (Continued):

- [5] Pursuant to the Bond Resolution, Investment Earnings pledged and available for calculating compliance with the rate covenant (Section 5.04 of the Bond Resolution) shall include all income and earnings on all funds and accounts as established through the Bond Resolution with exception to and excluding the Construction Fund and
- [6] Amounts shown reflect annual transfers from the Gateway Services Community Development District for reservation of wastewater treatment capacity and for the
- [7] Amounts shown are exclusive of depreciation and amortization.
- [8] Amounts shown reflect application of a contingency factor added to total Operating Expenses for unknown or unanticipated operating expenses. Below is a summary of

Fiscal Year	2021	<u>2022</u>	<u>2023</u>	<u>2024</u>	2025	<u>2026</u>
Contingency Factor Assumed	0.25%	0.35%	0.45%	0.55%	0.65%	0.75%

- [9] Amounts shown reflect application of a 0.25% rate revenues uncollectability factor applied to total user fee / rate revenues to recognize rate revenues may not be
- [10] Amounts shown reflect the Pledged Funds pursuant to the Bond Resolution and include Net Revenues (Gross Revenues less Operating Expenses), Special Assessment Revenues and Connection Fees for use in evaluating compliance with the rate covenant of the Bond Resolution.
- [11] Amounts shown reflect estimated collected Connection Fees for the respective fiscal years shown and do not include any Investment Earnings. Any Investment Earnings related to the Connection Fees Fund have been included as a component of Gross Revenues (recognized through Investment Earnings).
- [12] Generally, under Florida law, Connection Fees (also referred to as "Impact fees") may be validly imposed for construction of improvements and the expansion of the System to new customer growth or development that drive the need for such improvements (i.e., "Growth Pays for Growth"). Connection Fees may also be used to pay the debt service for the expansion related capital improvements funded from the proceeds of any respective outstanding indebtedness of the System. For purposes of this
- [13] Amounts shown are derived from the actual loan repayment schedules for the Outstanding Bonds.
- [14] The Series 2012 Bonds were issued in order to refinance the outstanding Series 1999A Bonds and the Series 2003B Bonds.
- [15] The Series 2013A Bonds were issued in order to refinance the outstanding Series 2003A Bonds. The Series 2013B Bonds were issued in order to finance certain capital improvements of the System related to the Green Meadows project.
- [16] The Series 2019 Bonds were issues in order to refinance the outstanding Series 2012A and Series 2012B Bonds and to partially refinance the Series 2011 and Series
- [17] Pursuant to the Bond Resolution Section 5.04 (the "Rate Covenant"), the County must maintain sufficient rates, fees, charges and other Pledged Funds in each Fiscal

  A) Net Revenues and Special Assessment Proceeds adequate at all times to pay at least 100% of i) the Annual Debt Service on all Outstanding Bonds coming due, ii) any required deposits to the Reserve Account for compliance with the Reserve Account Requirement and iii) amounts required by Sections 4.06(a) and 4.07(a) of the
  - B) Net Revenues, Special Assessment Proceeds and Connection Fees adequate at all times to pay at least 120% of the Annual Debt Service on all Outstanding Bonds
- [18] The County has secured several loans from the FDEP SRF loan program. Pursuant to Section 5.01 of the SRF loan agreement, the County must maintain sufficient rates and charges for services furnished by the System to provide Pledged Revenues, as defined in the loan agreement, equal to or greater than 115% of the Semiannual Loan Payments for all outstanding SRF loans due in such Fiscal Year. Pledged Revenues are defined in the loan agreement to mean Gross Revenues after payment of the
- [19] Amounts shown are derived from the anticipated loan repayment schedules for the outstanding SRF loans; amounts based on funding the monthly Semiannual Loan Payments (as defined in the loan agreement) representing an accrual basis and not presented on an "as paid" basis.
- [20] Pursuant to the Bond Resolution, the Reserve Account Requirement shall mean maintaining a minimum cash balance within the Reserve Account equivalent to the lesser of: i) the Maximum Annual Debt Service for all Outstanding Bonds; or ii) 125% of the Annual Debt Service coming due in such Fiscal Year. No required transfers from Pledged Funds were recognized during the projected period shown since the Reserve Account Requirement is secured through a Reserve Account
- [21] Pursuant to the Bond Resolution, the Renewal and Replacement Fund Requirement shall mean maintaining a minimum cash balance within the Renewal and Replacement Fund equivalent to either i) 5% of the Gross Revenues received by the issuer in the immediately preceding Fiscal Year; or ii) an amount as determined by the Consulting Engineer. Furthermore, pursuant to Section 4.05(b)(v) of the Bond Resolution, should the County not meet the Renewal and Replacement Fund
- [22] Pursuant to Sections 4.06(a) and 4.07(a) of the Bond Resolution, the County must repay any amounts used form the Connection Fees Funds as a result of a deficiency arising in the Principal Account or Interest Account. No deficiencies are anticipated during the Forecast Period that required the use of Connection Fees or balance
- [23] Although not a specific requirement for compliance with the Bond Resolution rate covenant calculation (Section 5.04), payment of debt service on Subordinated Indebtedness was included as a requirement for purposes of this analysis and based on the required disposition of revenues as identified in Section 4.05 of the Bond

<sup>1]</sup> Unless otherwise noted, amounts shown reflect residential rates in effect March 2021 and are exclusive of taxes or franchise fees, if any, and reflect rates charged for inside the city service. All rates are as reported by the respective utility. This comparison is intended to show comparable charges for similar service for comparison purposes only and is not intended to be a complete listing of all rates and charges offered by each listed utility.

<sup>[2]</sup> Reflects utility service area receiving wastewater service by the FGUA and potable water service by Lee County

<sup>[3]</sup> During the Fiscal Year 2020 the average monthly use for all single family LCU customers was approximately 4,375 gallons.

<sup>[1]</sup> Unless otherwise noted, amounts shown reflect residential rates in effect March 2021 and are exclusive of taxes or franchise fees, if any, and reflect rates charged for inside the city service. All rates are as reported by the respective utility. This comparison is intended to show comparable charges for similar service for comparison purposes only and is not intended to be a complete listing of all rates and charges offered by each listed utility.

<sup>[2]</sup> Reflects utility service area receiving wastewater service by the FGUA and potable water service by Lee Count

<sup>[3]</sup> During the Fiscal Year 2020 the average monthly use for all single family LCU customers was approximately 4,375 gallon
