Re: Cummins engines, parts, and service

Cummins Power South (CPS) is the licensed distributor for Cummins, Inc. for engines, parts, and service in the state of Florida. We maintain a dealership network and also provide for retail sales from our branches throughout the state. We are the sole source for all Cummins parts and engines sold in our territory.

LeeTran receives special pricing consideration with CPS as a transit authority. There is a code attached to the account which discounts parts, service, and engines for pricing consideration.

LeeTran is on a Cummins Inc., transit authority wholesale program. The intent and result of this program is to make the Cummins distributor the sole source for all Cummins engines, parts, and service for transit authorities in a direct way. The transit business receives a high priority at Cummins Inc. and it is their wish and intent that distributors deal directly with them to the benefit of all, hence this and other programs in place for the transit business.

Cummins now enjoys by far the largest share of the transit bus engine business in the U.S. , and with this and other programs, intends to keep it.

As always, please do not hesitate to call with any questions.  
We appreciate your business.
